The demand for alfalfa meal has shown a wonderful growth during the last few months, until the capacity of the single plant at Echo has been overtaxed. The same management is now starting the erection of a new plant at Wapato, Wash. The latter plant will have a capacity of 50 tons a day, or double the size of the grinder at Echo.

Welcome Showers.

The much needed moisture came Tuesday night and yesterday. The fact that the weather is very warm for the time of year, will make the grass and grain grow rapidly with the moisture that was badly needed.

Good Potatoes.

W. E. Severance, of Hardman, sent to the Gazette office this week a box containing 15 potatoes that were the finest that we have seen. They are the Polaris variety and the 15 spuds weighed 29 pounds, being smooth and solid. The combined length of the 15 potatoes when laid end to end was 11 feet and 3 inches.

Treasurer's Notice.

Alfalfa for Oregon.

(Continued from page one.)

tons an acre, were made. An experiment showed its great soil enriching qualities. Wheat grown after alfalfa yielded 61.5 bushels per acre and after timothy sod 42.1 bushels. In the two succeeding years the alfalfa sod produced 30.2 bushels of barley and 24 bushels corn, while the timothy sod produced 19.7 bushels barley and 17.9 bushels corn. The three crops on the alfalfa sod were worth about \$90 while those on the timothy sod were worth about \$58.

At the Oregon Agricultural College alfalfa has been growing successfully for several years, and tests are being made by the agronomists with different varieties to determine which will suit the conditions best in this state. The station men are glad at all times to answer questions in regard to its cultivation.

A few miles from Corvallis, Mr. W. Hamlin cut this year 200 tons of alfalfa hay. It yielded about 2 1/2 tons to the acre in two cuttings. Before seeding to alfalfa the land had been "cropped out." In fourteen years fourteen grain crops had been taken from the land, and Mr. Hamlin explains that on richer land the yield is much heavier. He further explains that the oldest stand yields the best, showing that it takes several years on certain classes of soil for the alfalfa to make a good growth.

It looks as though an alfalfa campaign would be worth millions to this state.
