Making Men's Hats.
Men's hats, stiff or soft alike, are made from the fur of the rabbit. A copper cone, whose very top is more or less the shape of the crown of a derby hat and whose sides are covered with minute holes, is revolved very swiftly over a suction fan. The fur is fed on to the cone, and the suction and the swift revolution draws this against the cone in the form of a fur cone very far in shape from the finished hat, but which rapidly becomes a finished hat by sizing, shrinking, shaping and trimming. Individual skill of a very high order counts for everything.—Argonaut.

A French Joke.
Two tramps on the banks of the Seine:
"How can we raise the wind?"
"I have it. You throw yourself in, and I'll jump in after you and take you out. Then I'll get the reward from the Humane society."
"Good! Here goes!" He jumped into the water, and after floundering about for some time he was getting tired out. "Well," he asked, "how long are you going to remain sitting there? Why don't you come in and take me out?"
"Because I think I might make more out of you in the morgue."—Paris Journal.

An Optimist.
"I am going to buy a raven," a gentleman informed his neighbor.
"Really?" rejoined the latter. "What for?"
"I want to see if these birds really do live 300 years, as people say!"—Westminster Gazette.

A GOOD POSITION can be had by ambitious young men and ladies in the field of 'Wireless' or Railway telegraphy. Since the 8-hour law became effective, and since the Wireless companies are establishing stations throughout the country there is a great shortage of telegraphers. Positions pay beginners from \$70 to \$90 per month, with good chance for advancement. The National Telegraph Institute of Portland, Ore., operates six official institutes in America, under supervision of Railroad and Wireless officials and places all graduates into positions. It will pay you to write them for full details.
