Water Rights Fixed.

Salem, Or., May 7.-For the first time in the history of Oregon, a decision was handed down today by the Board of Control, which determines disputed water rights. The import ance of the Order can be understood when it is realized that hun dreds of people have been disputing over the privileges involved, the controversy in some instances leading to actual

Today's order determines in a systematic way all water rights on Willow Greek, in Morrow and Gilliam Counties; on Cochran Creek, in Grant County; and Paulina Creek, in Crok County. One copy of the order of determination for each stream has been forwarded to the County Clerk of each county in which the stream or any part thereof is located. The determination is in full force and effect from the date of its entry in the records of the Board and can be enforced by water masters, to be appointed if necessary.

Exceptions to the order can be considered by the court and a rehearing had at any time within six menths from the date of confirmation by the Circuit Court. Upon final determination by the courts, the order of the Board will be amended, if necessary, and water-right certificates issued to each appropriator in accordance

The order is tabular in form and arranged alphabetically under the name of the water user. His right is denfied by setting forth the date of priority, the amount of water in cubic feet per second to which he is entitled. the number of acres irrigated or horsepower developed, the use to which the water is to be applied, and the season for such use, the name of the ditch, and a description of the land to which the water for irrigation is made appurtenant.

There are 286 parties to the Willow
