RHEUMATIC FOLKS.

Are You Sure Your Kidneys are Well?

Many rheumatic attacks are due to uric acid in the blood. But the duty of the kidneys is to remove all uric acid from the blood. Its presence there shows the kidneys are inactive.

Don't dally with "uric acid solvent." You might go on till doomsday with them, but until you cure the kidneys you will never get well. Doan's Kidney Pills not only remove uric acid, but cure the kidneys and then all danger from uric acid is ended. Here is Heppner testimony to prove it.

Henry Howard, of Heppner, Oregon, says: "For thirty years I suffered from rheumatic pains in my back and hips. Seeing Doan's Kidney Pills advertised, I was induced to try them and I wish to express my appreciation of their good work. Doan's Kidney Pills gave me great relief and I only hope that my statement will be the means of leading other kidney sufferers to try them."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Oregon Sheep Healthful.

"Oregon sheep are considered generally to be in a most healthful condition," said State Sheep Inspector Lytle.

"The greatest trouble we have had with sheep in Oregon has been in regard to the 'scabies,' a disease that was prevalent in nearly all the flocks four years ago. At first it was very difficult to get the sheepmen to see our way in the proper care of the sheep and they disliked the new methods we introduced. However, they soon discovered that two healthy sheep were much better than 20 sick ones."

"In order to eradicate the 'scabies,' it was necessary that every sheep-raiser should dip all his sheep thoroughly once and sometimes twice a year. This work required considerable time and extra expense of the sheepmen. Frequently we had to compel some flocks to be redipped as stockmen would fail to do the work properly."

"Another matter that we had to watch closely was the shipping of sheep out of the state. While this was within the province of the federal inspectors, we were desirous of protecting the industry of our own state and co-operated with the government inspectors in every way possible."

"It has taken several seasons of strenuous work on the part of the inspectors to carry on the campaign for better and cleaner sheep, and we feel that we have now succeeded in our purpose. I believe that the sheep in Oregon, on the whole, are in as fine a condition as those in any of the states. The quality of wool has also shown a marked improvement during the past year or two."

Galgallus Wheat.

Pendleton, Or., Aug. 10.—Dell McCarty, a former University of Oregon athlete and graduate of that institution, who is now engaged in farming on his father's ranch in the light-land section, west of Pendleton, believes that he has found the wheat best adapted to the light soil and semi-arid portions of Eastern Oregon. It is called Galgallus, and while it is not an entirely new variety, it is believed that Mr. McCarty is the only farmer in Eastern Oregon who has given it a fair trial.

He says that for milling purposes it is second only to bluestem, and that its ability to withstand droughty conditions makes it a better producer in the light-land sections than either Dale or Club.

Galgallus is a variety of wheat propagated by the Department of Agriculture at Washington, and he secured his first sample from the department three years ago, upon the recommendation that it was a good drought-resisting variety. They have grown the wheat for each of the past three years, and have found it all that the department claimed. It has always yielded better than Dale or Club under the same conditions. For instance, this year they had Dale wheat and Galgallus in the same field, seeded under exactly the same conditions. The Dale turned out 20 bushels per acre and the Galgallus 26.

McCarty is therefore well satisfied with this experiments, especially since it is said that the mills will pay bluestem prices for the new variety.

Would You Like a Peek at the New Fall Arrivals

WE are just opening up our Fall Goods--the first shipments. There is one big case of SINCERITY CLOTHES which we have just finished unpacking, assorting and pricing. They are all up in the cabinets ready for inspection and such clothes as was never our good fortune to see before. They are marvels in the ready-to-wear tailoring line. If you don't agree with us, either your taste or ours is at fault. Then there is another shipment of the new Fall colors and weaves in neckwear. We will let it talk for itself. The fact that it comes from one of the greatest neckwear houses may have something to do with its attractiveness. Then there are the new hats, all ready for inspection--a trifle early for most of you, perhaps, but it will take you a little while to get used to yourself in a new style after wearing light weights and light colors all summer; in short, everything in the store has an air of newness and novelty, and the man who wants to be first on the ground will be as enthusiastic over our new styles as we are ourselves. Although you will find some things in the windows, most of them we are holding for a little later; but if you come in and ask for them we will gladly show them to you.
