**LATE INVENTIONS.**  
A draining rack for wet dishes, to be hung on one side of a dishpan, is a new convenience for the housewife.  
It is claimed for a new electrical melting pot for glass that it keeps its contents at a perfectly even temperature.  
An improved cover for street manholes, recently patented, screws into its socket so that wagons cannot knock it out of place.  
A new tool for painters consists of a reservoir for paint, which is fed out upon an embossed roller to stripe flat surfaces or to apply ornamental designs.  
For thawing dynamite a metal kettle has been invented in which the explosive is placed in an inner compartment, which is surrounded by hot water.  
About the size of a lawn mower is a new machine designed to sow lawn grass seed, disks cutting into the earth receive the seed, which is covered by a following roller.  
A single turn of the handle of a new letter stamping machine cuts a stamp from a strip, moistens, and affixes it, registers the transaction, and ejects the stamped letter.  
A double frying pan, hinged in the center, has been patented by an Iowa man, so that two articles can be cooked at once and to save space by folding it when not in use.  
To test the speed of projectiles driven by modern high power explosives British scientists have perfected a chronoscope which measures time to the millionth of a second.  
A new range employs both electricity and steam, a current of the former, used to cook food on the top of the range, also heating water to produce steam to operate the oven economically.  
A new shoe salesman's stool is provided with small mirrors on each side of the foot rest, to enable the customer to get side views of a shoe he is trying on and also to afford a degree of privacy.

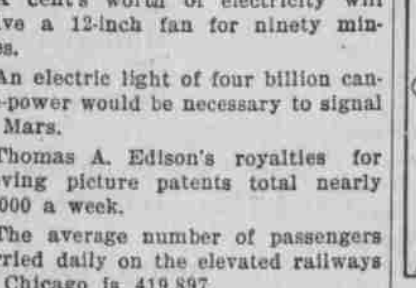

**FRANK H. HITCHCOCK, TO GET DESERVED REST**  
FRANK H. HITCHCOCK, postmaster general, has gone to Europe to get a short rest. He deserves it. When a man, in the short length of time that Mr. Hitchcock has been in office, cuts down a postal deficit from \$18,000,000 to \$10,000,000, to use round numbers, he has worked hard enough to earn recreation. This is the accomplishment of Mr. Hitchcock and no one will begrudge him all the rest he can take during the hot months. He said when he left that he expected to be gone only a few weeks, so he'll be back at his desk before long fighting that deficit again.  
To look at Hitchcock a person wouldn't think he ever would get tired. He's a six footer and built like an athlete. He's not only built like an athlete, but he once was one of no mean ability. He was the champion heavy-weight boxer at Harvard. But the strongest of men sometimes get tired and Mr. Hitchcock is like the rest of us.  
Had Frank H. Hitchcock chosen to be a pugilist—his sensitive nature prohibited even such a thought—it is likely that he would have been the champion. He had the size, the strength, the skill, and, best of all, the intellect.  
A story has been told of a bout that came off at the White House one day and as it never has been denied, although Mr. Hitchcock, even with his closest friends, has refused to discuss it, it is repeated here.  
Everybody knows that Theodore Roosevelt is no slouch with the gloves. He is a scrapper of the Tom Sharkey type and likes to slug.  
One day Hitchcock was at the White House on business and President Roosevelt invited him down to the gymnasium in the basement. The president tossed a pair of gloves to Hitchcock and said: "Put 'em on." At the same time he drew on another pair. Mr. Hitchcock peeled off his coat and vest and followed orders.  
In a minute the president of the United States and the then assistant postmaster general were at it. Roosevelt didn't like it because Hitchcock was using only slight taps.  
"Hit," he shouted. "Knock me out if you can."  
Again Hitchcock obeyed orders of his chief. Smash! went a straight jab on the presidential face. "Bully," grunted Roosevelt. "You can't do it again." Bing! A right swing staggered the president.  
"I guess that's enough," exclaimed Roosevelt. "I can't afford to be going around with a black eye. But if I were not the president I'd like to fight this out with you."  
"Any time you say, Mr. President," replied the obliging Mr. Hitchcock.

**FASHION HINTS**  
A dainty little dress, and a practical dress when it comes to the question of ironing, is the style sketched here. It buttons under the arms, which can be made decorative as well as a practical feature if the edges are buttonholed. Lawn or dimity are good materials to use if it is to be a "best dress."

**SPARKS ELECTRIC.**  
New York boasts an electrically lighted hearse.  
The quarter-in-the-slot electric meter has made its appearance.  
A cent's worth of electricity will drive a 12-inch fan for ninety minutes.  
An electric light of four billion candle-power would be necessary to signal to Mars.  
Thomas A. Edison's royalties for moving picture patents total nearly \$7,000 a week.  
The average number of passengers carried daily on the elevated railways of Chicago is 419,897.  
Eight thousand passenger elevators in New York carry more than six million passengers in a day.  
The express elevators in the Board of Trade building, Chicago, are the fastest in the world, having a speed of 570 feet a minute.  
Plans for a \$16,000,000 tunnel between the North and South stations of the New Haven railroad in Boston are about to be approved.  
An electromagnet is being used to recover sunken iron cargoes such as nails, steel strips and rolls of wire, in the Mississippi river.  
Television is the latest. You talk with a friend a hundred miles away and you see him as plainly as though you were in the same room.  
Officers of the new battleship South Dakota, which is equipped with Curtis turbine engines, say there is absolutely no vibration of the fire control masts, a difficulty always found in the reciprocating engine-driven vessels.

**LOEB MAY GO BACK TO ALBANY AS GOVERNOR**  
IF WILLIAM Loeb Jr. runs for governor of New York and is elected he will return to the quarters at Albany where he once was a stenographer, but which he left as private secretary to the chief executive.  
Loeb started his public career as a stenographer in the general assembly of New York, became private secretary to several public officials, reporter of the New York constitutional convention and in 1894 district attorney. Next we find him a stenographer in the office of Governor Roosevelt. He attracted the attention of the future president and was made private secretary. He held this position until Roosevelt's term of governor expired and then became the colonel's secretary while Roosevelt was vice-president. When Roosevelt was made president upon the death of McKinley, Loeb followed him to the White House and after Mr. Cortelyou was appointed postmaster general Loeb became private secretary. In his term of office at the White House the title was changed from private secretary to that of secretary to the president.  
There have been many secretaries to presidents or private secretaries as you may wish to call them, but there have been few who had anything on Mr. Loeb.  
It is doubtful if any other secretary had such tasks to perform as were those set by Roosevelt for his aid.  
Loeb was an ideal buffer for a president. He had a knack of handling big matters quickly and expeditiously. If mistakes were made he could shoulder the blame in a flash and often did. He knew the men the president wanted to see and the ones he didn't and it was seldom that the wrong person got past him.  
From the White House Mr. Loeb went to New York as collector of the

**JUDGE LANDIS AGAIN AFTER TRUST MAGNATES**  
JUDGE KENETH MOUNTAIN LANDIS of \$29,240,000 Standard Oil fine fame is at it again. This time it is the beef trust magnates for whom the federal jurist of Chicago has gone gunning. In instructing a grand jury a few days ago Judge Landis as much as told the members to indict the individual packers.  
Only a short time before the judge had sustained a demurrer to indictments against the corporations comprising the beef trust. Now it is Armour, Swift, Morris, et al. who have to look or they will find themselves charged with violating the Sherman anti-trust law.  
No jurist on the federal bench is more vigorous than Judge Landis and it is probable that the packers would rather find themselves facing most any other man in court. Judge Landis is fair and above all honest, and he requires the same of all of his court officials. He has been known to fine a poor unfortunate in cases where there were extenuating circumstances the smallest amount possible and let them off just as lightly as he could, but where it is an old offender or a case requiring drastic action he is just as quick to apply the full penalty of the law.  
Prices of meat are of interest to every man, woman and child in the country, and if it is found that there has been any conspiracy to increase the cost, the grand jury indicts and a trial jury finds the magnates guilty. Judge Landis may be depended upon to do the rest.

**LOOKS THAT WAY.**  
"I'm afraid that bard is a schemer."  
"How now?"  
"He's advertising for a young man with \$500 to learn the poetry business."

**AVIATION ISN'T SAFE YET AND THERE'S NO TELLING WHEN THE AEROPLANE IS GOING TO BUCKLE OR THE GAS BAG IS DIRTYBLE EXPLODE, SO IT'S A SAFE CONJECTURE THAT EMPEROR WILLIAM OF GERMANY, KING GEORGE OF ENGLAND, KING ALFONSO OF SPAIN AND SOME OF THE OTHER MONARCHS ARE NOT GOING TO RISK THEIR ROYAL HEADS IN THE AIR AND PUT THE AFFAIRS OF THEIR COUNTRY IN JEOPARDY JUST TO GO SOARING AMONG THE CLOUDS.**  
Imagine President Taft up in an aeroplane. To put it another way, imagine the aeroplane that would carry the 300 pounds of the chief executive of the United States. It's probable that Theodore Roosevelt would enjoy nothing better than a trip to the clouds. His daughter, Mrs. Longworth, is said to have expressed her eagerness to make a flight and may yet do so, but it's safe to say that the royal rulers of the empires across the pond are not going to follow the example of Ferdinand of Bulgaria, who at Harselle, near Liege, enjoyed the experience of flying twice around the Kiewit aerodrome on a machine piloted by Chevalier de Lamme.  
When he started out with his son, Boris and Cyril, to watch the flights, his majesty had not the faintest intention of leaving terra firma, but after seeing the chevalier's exploits his natural enthusiasm and love of sport got the better of his discretion.  
Ferdinand mounted the aeroplane with the chevalier and it rose gracefully and easily into the air, remaining up eight minutes and a half. After he came down the king said his experience had been a delightful one.  
"I have never," he said, "experienced anything that made me forget affairs of state so completely. I shall do my best to introduce aviation into Bulgaria."  
Some of the others would like to forget the affairs of state, but they will hardly take to the clouds for the purpose.
