SIXTEEN DEAD IN WRECK.

Rock Island Train Runs Into Washout in Kansas.

Denver-Fifteen persons lost their lives and 11 others sustained more or less severe injuries in the wreck, two bound Rock Island passenger train No. 27, which was due in Denver at 8:25 Saturday morning from Kansas City.

The wreck was the result of a cloudburts which carried out 1,000 feet of a fill at what is normally almost a dry bed, turning the latter into a torrent many yards wide and 20 feet deep.

The train was proceeding on a straight stretch of track. Evidently the first intimation that the engineer had of any danger came when he realized that the forward portion of the train was running in water which had spread out over the tracks near the fill. Reversing the engine, the speed of the train was checked, but not enough to prevent the engine, baggage car and smoker going over into the depression.

The rear end of the smoker remained tilted on the earth bank and the chair car ripped its way into the smoker, Allyn. "This is twice as much as smashing it to pieces and killing or injuring many of the passengers. As near as can be learned here all

of the smoker. AEROPLANE CROSSES ALPS

Domodossola, Italy-The great feat of crossing the snow-capped Alpine barrier between Switzerland and Italy in a heavier-than-air machine was accomplished by Georges Chavez, the young Peruvian aviator.

The plucky hero of the exploit, howbadly injured as the result of an accident that happened just as he had completed the most arduous and nerveracking portion of the task. RAILROADERS UNITE

In Government Affairs

Intended Solely to Better Workers' Condition.

New York-For the first time in the history of railway unions, members and delegates representing 83,000 men of the four great divisions of railway employes in the East, voted unanimously at a meeting here to take concerted action in national and state

"The proper place to settle questions affecting labor is at the ballot box," said W. S. Stone, of Cleveland, O., grand chief of the Brotherhood of Locomotive Engineers.

"Whatever your political affiliations, do not let party lines blind you to your interest or prevent you from doing what you think is best and right. See that the men you vote for stand for the right principles, regardless of party, and support these men who meet the requirements and you will not only bedoing the best thing for yourselves, but for the public.

"This is not a political move at all, as is generally understood, but a move to get away from the old lines of parti-

san politics." In pursuance of this plan, the meeting voted to send out a series of eight questions to state and national candidates, particularly to candidates for the legislature and congress, asking for a definition of their attitude on the universal adoption of safety applimiles east of Clayton, Kan., of west- ances and an employer's liability law where such does not already exist, company pensions for superannuated employes, hours of labor and other matters of kindred interest.

CHEAP SODA DANGEROUS.

Alcohol, Coal Tar Dye and Ether

Compound Menace to Health. New York-The cheap soda water which is retailed on street corners to school children and passers by at a penny or two a glass is, in most cases, an alcoholic beverage with a larger percentage of spirits than ordinary beer, according to an analysis made by Professor M. S. Allyn, of the Massa-

chusetts State Normal school. "The syrups with which these cheapsodas are flavored frequently contain 10 per cent of alcohol," said Professor there is in beer. Take, for instance, a "strawberry flavoring which I bought at a stand on the lower East of the passengers killed were occupants Side. The red color in the syrup is obtained from a coal tar dye and the flavor is given by an ether compound."

500 CADETS ARRESTED
