

OWES HER HEALTH

To Lydia E. Pinkham's Vegetable Compound

Scottville, Mich.—"I want to tell you how much good Lydia E. Pinkham's Vegetable Compound and Sanative Wash have done me. I live on a farm and have worked very hard. I am forty-five years old, and am the mother of thirteen children. Many people think it strange that I am not broken down with hard work and the care of my family, but I tell them of my family's good friend, your Vegetable Compound, and that there will be no backache and bearing down pains for them if they will take it as I have. I am scarcely ever without it in the house.

"I will say also that I think there is no better medicine to be found for young girls to build them up and make them strong and well. My eldest daughter has taken Lydia E. Pinkham's Vegetable Compound for painful periods and irregularity, and it has always helped her.

"I am always ready and willing to speak a good word for the Lydia E. Pinkham's Remedies. I tell every one I meet that I owe my health and happiness to these wonderful medicines."

—Mrs. J. G. JOHNSON, Scottville, Mich., R.F.D. 3.

Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs, contains no narcotics or harmful drugs, and to-day holds the record for the largest number of actual cures of female diseases.

HOW PHAROAH WAS DROWNED

Talored Minister Insisted Egyptians Broke Through Ice After Children of Israel Had Crossed.

There is a story of an old colored minister, which I am fond of telling, that illustrates what I mean. The old fellow was trying to explain to a Sunday school class how it was and why it was that Pharoah and his party were drowned when they were trying to cross the Red sea, and how it was and why it was that the Children of Israel crossed over dry shod. The old minister explained it in this wise:

"When the first party came along it was early in the morning and the ice was hard and thick, and the first party had no trouble crossing over on the ice, but when Pharoah and his party came along it was 12 o'clock in the day and the sun was shining hot on the ice, and when they got on the ice it broke, and they went in and were drowned."

Now, there happened to be in this class a young colored man who had had considerable schooling, and this young fellow turned to the old minister and said:

"Now, Mr. Minister, I do not understand that kind of explanation. I have been going to school and have been studying all these conditions, and my geography teaches me that ice does not freeze within a certain distance of the equator."

The old minister replied: "Now, I've been expecting something just like this. There's always some fellow ready to spile all the theology. The time I've talked about was before they had geographies or 'quators either."

Now, this old man, in his plain and simple way was trying to brush aside all artificiality and to get down to bedrock. So it was with me—Booker T. Washington, in World's Work Magazine.

Shake Into Your Shoes
Allen's Foot-Ease, a powder for the feet. It cures painful, swollen, smarting, itching feet. It keeps new shoes easy. Sold by all Druggists and Shoe Stores. Don't accept any substitute. Sample FREE. Address A. S. Olmsted, Le Roy, N. Y.

Depends on Crops.
The financial barometer rises or falls with assurances of promise or greater or lesser crops. With large crops every interest of manufacturers, trade, transportation and commerce is active with promise of general prosperity, and no private interest should be able in any manner to obtain preference or advantage over its industry upon which the prosperity of all great interests are so largely dependent.

Never an Overproduction.
So long as there are thousands of poorly nourished and underfed men, women and children in every large city, many of whom are sustained by charitable aid, there can be no overproduction of foods. In every large city there is an enormous underconsumption not only of foods but of other necessities that are having a serious effect upon the best development of cities.

Constipation causes many serious diseases. It is thoroughly cured by Doctor Pierce's Pleasant Pellets. One's laxative, three for cathartic.

Industry in Switzerland.
Dairy farming constitutes an important industry in Switzerland. The production and handling of large quantities of milk, consumed in numerous chocolate factories and milk-condensing concerns in the confederation, the domestic consumption of milk, butter and cheese and the manufacture of cheese for export engage the attention and services of a large number of people.

Specialized Farming.
Miss Jessie Nicholson inherited a farm of 225 acres in New Jersey, which her father had farmed in the old way. When she took it she realized that the new way to do things is to specialize, so she began to do this on the farm. She raises Canada field peas, her own hay and makes a silo, sells chickens and milk, and that is all. There are 100 cows and she puts away \$2,000 each year.

One on the Agnostic.
A tiny girl once taught an agnostic a lesson with simple impressiveness and force. "God is nowhere," so the agnostic wrote on the small maiden's slate. The child unsuspiciously read: "God is now here."

CLOSSET & DEVERS
PORTLAND, ORE.

Into this space pipe fits. The iron ring at g holds the halves firmly together, says the Orange Judd Farmer. This protection might, and probably would, in actual practice, continue on through the wall of the building. It could be arranged for by setting the pipe at a greater angle.

Fresh Manure Dangerous to Trees.
When an old orchard is renewed the soil may probably receive a liberal application of well-rotted manure. This should be applied only under the extremities of the branches and worked well into the soil. Fresh manure should not be applied. Ashes may be used in addition to the well-rotted manure, or it may be thrown near the base of the tree to destroy many of the insects there.

Method of Running Ventilator Flues. Fresh Air is Admitted at the Bottom and Foul Air Taken Out at A and B.

Too much stress cannot be laid on the fact that we have no better disinfectant than good, old-fashioned sunlight. For this reason in planning our barns much more attention should be paid to the question of securing sufficient light. It is said by authorities on the subject that four square feet of window light should be allowed for each cow in the barn. Long windows reaching well to the ceiling have been found the most satisfactory for the reason that the light coming through them can reach all parts of the barn better than if the short windows are used. It is also of importance to remember that there is no better way of preventing the spread of tuberculosis in our herds than by admitting plenty of sunlight and fresh air into the barn.

The height to ceiling differs somewhat according to different ideas of the builder, but the height should be sufficient to give ample air space in the structure.

IMPORTANT FEATURES OF GOOD VENTILATING SYSTEM

In Order That Our Dairy Products May Rank Higher More Attention Must be Given to Health and Sanitation—One Plan.

Method of Running Ventilator Flues. Fresh Air is Admitted at the Bottom and Foul Air Taken Out at A and B.

(By J. H. FRANDSON.)
Through mistaken ideas of some writers, many of our farmers have developed the idea that to keep cows healthy and comfortable and to produce sanitary milk it is absolutely necessary to have expensive barns. As a matter of fact many of the dairy barns where sanitation is the primary object are quite inexpensive.

On the other hand if it is to be conveniently arranged to embody the most accepted sanitary features, it is very essential that some attention be given to the plans and specifications of the barn that is to house the dairy herd to the best advantage. Every detail of a new barn should be carefully worked out before actual construction takes place.

The illustration here shown will, it is hoped, give the builder some new ideas as to how the barn can be made more sanitary.

In building a dairy barn, or any other kind of a barn for that matter, the plans must be worked out to suit different conditions and locations. Hardly any two sites would permit exactly the same plan being used.

If wholesome and sanitary milk is to be produced the farmer should realize that the cows must be kept out of the mud as much as possible. Conditions in and around the barn can, in many cases, be greatly improved by draining and grading. Draining is not of itself sufficient, as the tramping of the cattle soon puddles the surface, thus practically preventing the water from reaching the tiles below.

The barnyard should have good slope, such as will insure good surface drainage, and should have a good top layer of gravel or cinders. In many places this may involve a great deal of work, but even if the grading cannot all be done in one year arrangements should be made by which at least part of it is done every year.

KEEP FROST FROM PIPES
Illustration Shows Excellent Method of Protecting Water Pipes During Severe Weather—How Done.

This diagram illustrates one way of protecting water pipes against frost. In the cut a is the pipe, b a partition through which the pipe runs, c the water tank, d the ground, f a wooden post and g an iron ring. In operation the post, which may be six to eight inches in diameter, is split in the middle, as shown at e. The center is hollowed out slightly in each half, and

IN TANNING SMALL SKINS
Excellent Methods Given for Preparing Hides of Rabbit, Muskrat or Rabbit for the Market.

The skins should—first be heated by sprinkling fine salt over the flesh sides—then roll up and allowed to remain for 12 months. If the pickling method be preferred, the skins may be immersed in a strong solution of brine. After being treated with the salt, wash in cold water, and then all the flesh and fat scraped off. Then sew together to form pouches with hair inside and placed in weak wattle bark solution. The wattle bark solution is made by boiling the bark and having the decoction stand for 24 hours, then taken out and skins are left in this bark solution for 24 hours, then taken out and allowed to draw. The strength of the solution is increased by the addition of more oak bark every day for six days. At the last day take out the skins, wash off, and coat the flesh side with dubbing. The skins are then thoroughly worked and stretched until they become soft and pliable. The skin side should then be thoroughly rubbed with prepared chalk.

Grooming Improves Animal.
Grooming the horse every day not only cleans the skin, but prevents parasitic disease as well. The modern horse is an artificial product, living under artificial conditions. In order to do his best he needs the care of man.

The Game Went Wrong.
The stranger laid down four aces and scooped in the pot. "This game ain't on the level," protested Sagebrush Sam, at the same time producing a gun to lend force to his accusation. "That ain't the hand I dealt ye."—Lippincott's.

Turkish Progress.
The whirling dervishes of Scutari have gone on strike. "This game ain't on the level," protested Sagebrush Sam, at the same time producing a gun to lend force to his accusation. "That ain't the hand I dealt ye."—Lippincott's.

Dr. Pierce's Favorite Prescription

Is the best of all medicines for the cure of diseases, disorders and weaknesses peculiar to women. It is the only preparation of its kind devised by a regularly graduated physician—an experienced and skilled specialist in the diseases of women.

It is a safe medicine in any condition of the system. **THE ONE REMEDY** which contains no alcohol and no injurious habit-forming drugs and which creates no craving for such stimulants.

THE ONE REMEDY so good that its makers are not afraid to print its every ingredient on each outside bottle-wrapper and attest to the truthfulness of the same under oath.

It is sold by medicine dealers everywhere, and any dealer who hasn't it can get it. Don't take a substitute of unknown composition for this medicine or known composition. No counterfeit is as good as the genuine and the druggist who says something else is "just as good as Dr. Pierce's" is either mistaken or is trying to deceive you for his own selfish benefit. Such a man is not to be trusted. He is trifling with your most priceless possession—your health—may be your life itself. See that you get what you ask for.

THE Famous Rayo Lamp
Once a Rayo user always one

The Rayo Lamp is a high grade lamp, sold at a low price. There are lamps that cost more, but there is no better lamp made at any price. Constructed of solid brass, nickel plated—easily kept clean; an ornament to any room in any home. There is nothing known to the art of lamp-making that can add to the value of the RAYO Lamp as a light-giving device. Every dealer everywhere. If not at yours, write for descriptive circular to the nearest agency of the

IN LATE WINTER AND EARLY SPRING
We seldom feel JUST RIGHT

At such a time KASPARILLA is the best and safest Blood Purifier, the most successful prescription for spring humors and such disorders of the blood as boils, pimples, pustules, blotches, sores and cutaneous eruptions. Kasparilla is admitted to be the best remedy for that lack of energy and the peculiar debility so prevalent during the close of winter and the opening of spring. For derangements of the digestive organs it is a natural corrective, operating directly upon the liver and alimentary canal, gently but persistently stimulating a healthy activity. Its beneficial influence extends, however, to every portion of the system, aiding in the processes of digestion and assimilation of food, promoting a wholesome, natural appetite, correcting sour stomach, bad breath, irregularities of the bowels, constipation and the long list of troubles directly traceable to those unwholesome conditions. Kasparilla dispels drowsiness, headache, backache and despondency due to inactivity of the liver, kidneys and digestive tract. It is a strengthening tonic of the highest value.
