Harry Cummings has been busy the past week removing some of the ancient landmarks on Chase street. He has been taking out the row of big poplar trees in front of the S. W. Spencer property and their removal creates a large vacancy. These trees have stood for thirty-five years or more and had reached the proportions of giants. In fact they had become so large that they sapped the ground and made it difficult for other vegetation to grow anywhere near them.

J. L. Kincaid was up from Ione on Monday squaring himself with the sheriff and liquidating the last half of his taxes. He is one of the old residents of this county and has remained at his post a long number of years, being successful as a farmer. His ranch in the country southwest of Ione has always been a producer and regardless of seasons Kincaid has come through with a crop and had something to sell. He turned off 1437 sacks of good club wheat this fall.

Prof. Hoffman returned on Monday evening from Portland where he went on Friday last to make arrangements for the buying of a piano for the High School. These people have a small fund on hand that will be turned in this direction, and Prof. Hoffman has made such arrangements for the purchase of an instrument that the future payments can be nicely handled and the school thus furnished with an instrument that they stand much in need of.

The concrete walk between the First National and the Palace was finished up this week by Contractor Ayers. It is a fine looking piece of work and if it holds out will be a great improvement over the rock walk it has taken the place of. The city will put in other crossings similar to this one if the experiment proves good. The paving of Main street in the business portion of town would settle the question of crossings for all time to come.

H. A. Emerson has disposed of his property in this city to I. B. Esteb, formerly a resident of Morrow county. These gentlemen have swapped places, Emerson taking property at Lents, Oregon for his place here. Mr. Esteb will move to Heppner to reside, and in the meantime Mr. and Mrs. Emerson are looking for a place to live as they do not expect to leave Heppner.

J. P. Hadley, of Hardman, was a caller at this office yesterday. He states that he has his fall wheat in and that it is up some three or four inches already and looks mighty fine. There will no doubt be a bumper crop in this section the coming season. The conditions for fall sowing were never better in this county and the farmers are busy taking advantage of it.

Mr. and Mrs. Emmet Cochran, of Monument, were in Heppner the first of the week. Mr. Cochran brought over some cattle and disposed of the steers to Matt T. Hughes, and the balance of the stuff, some cows and calves, making about half car, were shipped to Portland on Tuesday.

Will Investigate.

In the last issue of the Gazette, attention was called to the large number of horses that were dying in this county from an unknown disease, and the fact also stated that the State Veterinarian was not giving the matter any attention. Dr. Winnard killed and dissected one of Charley Jones horses and forwarded specimens of brain, spinal cord and lungs to the office of Dr. Pernot of the Portland Bacteriological Laboratory and also brought it to the attention of Calvin S. White, secretary of the State Board of Health, and the physicians are greatly interested in the cases and promise to give attention to them at once.

Dr. White has this to say, in his reply to Dr. Winnard.

Dear Doctor; The horse's brain sent by you to the laboratory a few days ago arrived in such an advance state of putrefaction as to make any correct study of it well nigh impossible. However, it contained some unusual organisms that Prof. Pernot is anxious to investigate further. If, too, you can hear of any other cases in the neighborhood bearing the same symptoms as the one sent, I wish you would wire or 'phone at our expense and I will have Prof. Pernot go up there and make some investigation on the ground. This is a matter of very great importance and we would like to make further study on same. Appreciating your co-operation. I am, Yours very truly,

CALVIN S. WHITE,
State Health Officer."

Dr. Winnard also has the following word from Dr. Pernot, who is acknowledged leading authority on bacteriological diseases:

"Dear Doctor: From the specimens received from you on the 22nd, I have discovered the cause of so-called walking disease of horses. I wish you would kindly let me know when a horse in the last stages of the disease is available as I wish to post it.

Very truly yours, E. T. Pernot."

From these letters it will be seen that the State Board of Health is going to do something for the relief of our suffering people. This is a step that should have been taken many months ago, and had the State Veterinarian done his duty there is no doubt but that a remedy would have been found and our farmers saved the loss of many valuable work horses.

Frank Turner desires to have it announced to the public that he is a very kindhearted gentleman, and withal very thoughtful of his better half. He purchased a brand new wood saw last evening and made his wife a present of it and there will be something doing from now on. His kindness should not go unrewarded.

Joseph T. Knappenberg came up from Ione last evening, accompanied by his wife. The late rains have made a vast difference with the people down his way and cheered them up wonderfully. They anticipate an abundant harvest the coming season, and here's hoping they may never be disappointed.

"It Could Not Suit Me Better If It Had Been Built to Order for Me."

This is a common expression where the Royal Standard Typewriter is used. Court Reporters, Telegraph Operators and Expert Stenographers in all lines of business find in the Royal those "built-to-order" qualities that represent to them the ideal writing machine. You will say the same when you have become the owner of a
