

### We Stand the Test.

Our safe was attacked by desperate men early the morning of January 9th. who forced an entrance to the bank and attacked the safe with nitro glycerine but were unable to loosen even the first door.

A New Screw, round Door Safe is being installed in the bank and we are in better shape than ever to guard your funds.

It is well to deposit often and regular and take no chances with the desperados.

As soon as you have deposited with us your money is covered by insurance against Hold-up or Robbery.

A WORD TO THE WISE IS SUFFICIENT.

### FEED LOTS.

Brick Paved Yards With Shelter Give Satisfaction.

Muddy feed lots are an unprofitable as well as disagreeable feature in cattle feeding, especially when no provision is made for shelter. In a sum-

BRICK PAVED FEED LOT.

mary of replies to a circular of inquiry regarding the methods followed by practical feeders compiled by H. W. Mumford and L. D. Hall of the Illinois experiment station the question of muddy feed lots was considered. Notwithstanding the fact that the disadvantages of mud and dirt were recognized, only thirty-six of the 500 and more cattle feeders who furnished information on this point reported definite provisions against such conditions. Of these ten have the surface of feed lots paved or otherwise artificially covered and fifteen use rock, gravel, cinders, bricks, planks, corn cobs or sawdust alone and in combination in various parts of the lot—for instance, about the feed troughs, water tanks, sheds or gates.

Ten of the correspondents state that they have made the lots dry enough for feeding purposes by a tile drain, while two report that the yards have been graded and the mud and manure removed by means of dirt scrapers. Several of those who use coal cinders for filling the muddy portion of the lot state that care must be taken to keep them covered with straw, corn stalks or other bedding material in order to avoid injury to the feet.

The first cut shows a brick paved feed lot, with convenient shelter, water and feeding arrangements, arranged to accommodate about fifty cattle, which has given satisfaction. The pavement is 24 by 80 feet and is made of brick laid flat on six inches of gravel packed until solid. The curbing consists of curbstones eighteen inches wide and three inches thick set edge-wise. Feed bunks were placed in the shed. The shelter consists of a building 20 by 24 feet, with two wings, both 20 by 30 feet. The upper floor of the middle portion is used for storing dry corn fodder, which can be conveniently cut and fed through an open shaft to the feeding bunk below.

The second cut is a feed bunk, with platforms for use in a muddy lot, which is inexpensive and has proved satisfactory. Platforms of the sample described were 16 by 6 feet and were

FEED BUNKS FOR MUDDY LOTS.

(There are three advantages in the floors. The feeder always has a dry place to walk when putting in feed; the cattle

are out of the mud and not in a strained or cramped position while feeding; by having the floors six feet wide all waste feed and droppings fall upon the floor, and the hogs get all before it is lost in the mud.)

### Needs Tending To.

Uncle Sam may be obliged to take the powder trust over his knee and fondle it lovingly with a shingle.

Just because it sees him spending money recklessly for candles, lead pencils, ink wells and such necessary articles the powder trust thinks that the uncle under discussion has a lot of money that he doesn't know what to do with, and it proceeds to put up the price in a way that would cause an iceman to blush.

Knowing that Uncle Sam was one of its best customers, it would watch for him and every time it saw him coming would put up the price a few notches. Then, if he walked by without purchasing, the price would be still higher when he came back.

So if you hear a loud report some morning in the direction of the powder trust, followed by a big puff of smoke, do not be startled. It will only be Uncle Samuel having a little choice revenge.

The hair that he hasn't got is always calling attention to the baldheaded man.

### GRANGE NOTES

ESTACADA, Ore., Jan. 10, 1907.—The Clackamas County District Pomona grange met in the hall of Garfield grange yesterday.

The Garfield grange held a short special meeting to confer the 3d and 4th degrees on Rachel Davis and Virgil Wagner.

About 110 members were present and

all were very enthusiastic. A resolution was adopted favoring the imperative mandate, or the right of the people to recall their officers for malfeasance in office or omission of duty.

A resolution was unanimously adopted asking the repeal of the law allowing the swearing in of voters on election day by six free holders. This has proven such a source of fraud that there was no opposition whatever to the resolution.

A motion was adopted approving the move to employ convict labor on the public highways.

E. C. Huffman and R. W. Gill of Russellville grange were visiting members.

A good program was rendered in the evening, the following taking part, Mrs. M. K. Irvin, original poem; Mrs. Sadie Anders, recitation; W. H. Holder, history of Garfield grange; F. M. Gill, comic essay; R. W. Gill, stump speech, endorsed and responded with the "Murder of the Potato Bug."

A class of seventeen was initiated into the fifth degree.

The next Pomona will meet at Logan with Harling grange the second Wednesday in April.

Something Like It.

"Senator Hayseed is doing a new electioneering stunt."

"What is it?"

### Vote Was By Secret Ballot.

We received a pleasant visit from Mr. Roy Gibbs this week, who called our attention to the fact that the vote taken by the new city council a week ago last Wednesday night on the question of how the council felt as to a closed or an open town, was not on an open vote as recorded in the Herald but was taken by secret ballot resulting with six votes in favor of Sunday observance and one vote against it. It is therefore undecided as to who cast the vote for an open town on Sunday.
