AMERICANS IN EUROPE.

Woman Tells Why Foreign Criticism Isn't Wholly Unwarranted. From time to time Americans are agitated by the critical comments of some foreign writer, usually English, who sends his impressions to his pa pers, says Harriet Quimby in Leslie's Weekly. As an American, with all the characteristic patriotism of one born under the stars and stripes, I have always been among the first to denounce such writers as prigs ignorant of their subject; but after a season of unprejudiced observation along the famous French and Italian Riviera and continued into Egypt, the Mecca of the majority of our travelers this season, it is forcibly borne in upon me that, after all, foreign writers are not so far wrong in their criticisms of Americans abroad; but that their observa tions lacked completeness is also ob vious, for they failed to enumerate the failings of the English and also those of the Germans.

The most flagrant mistake which young feminine America makes when she has safely landed from her favorite Hamburg liner on this side of the Atlantic is the exercise of that freedom and natural coquetry which in her own country is understood, but which is in contrast to the conduct of her far less attractive, it is true, but better behaved English and German sisters is no more or less than hoydenish, and in too many instances descends to vulgarity. "We are abread and nothing matters," is the general attitude. She of good family and demure behavior in her own city coquets home and chances to read what the foreigners have thought of her.
