

SKIN DISEASES HUMORS IN THE BLOOD

When the blood is pure, fresh and healthy, the skin will be soft, smooth and free from blemishes, but when some acid humor takes root in the circulation its presence is manifested by a skin eruption or disease. These humors get into the blood, generally because of an inactive or sluggish condition of the members of the body whose duty it is to collect and carry off the waste and refuse matter of the system. This unhealthy matter is left to sour and ferment and soon the circulation becomes charged with the acid poison. The blood begins to throw off the humors and acids through the pores and glands of the skin, producing Eczema, Acne, Tetter, Psoriasis, Salt Rheum and skin eruptions of various kinds. Eczema appears, usually with a slight redness of the skin followed by pustules from which there flows a sticky fluid that dries and forms a crust, and the itching is intense. It is generally on the back, breast, face, arms and legs, though other parts of the body may be affected. In Tetter the skin dries, cracks and bleeds; the acid in the blood drives up the natural oils of the skin, which are intended to keep it soft and pliant, causing a dry, feverish condition and giving it a hard, leathery appearance. Acne makes its appearance on the face in the form of pimples and black heads, while Psoriasis comes in scaly patches on different parts of the body. One of the worst forms of skin trouble is Salt Rheum; its favorite point of attack is the scalp, sometimes causing baldness. Poison Oak and Ivy are also disagreeable types of skin disease. The humor producing the trouble lies dormant in the blood through the winter to break out and torment the sufferer with the return of Spring. The best treatment for all skin diseases is S. S. S. It neutralizes the acids and removes the humors so that the skin instead of being irritated and diseased, is nourished by a supply of fresh, healthy blood. External applications of salves, washes, lotions, etc., while they soothe the itching caused by skin affections, can never cure the trouble because they do not reach the blood. S. S. S. goes down into the circulation and forces out every particle of foreign matter and restores the blood to its normal, pure condition, thereby permanently curing every form of skin affection. Book on Skin Diseases and any medical advice desired sent free to all who write. S. S. S. is for sale at all first class drug stores.

Mr. Subbubs—So you got rid of the girl at last.
Mrs. Subbubs—Yes; she left a few minutes ago.
Mr. Subbubs—Huh! she certainly took her own time.
Mrs. Subbubs—Yes, and she left the parlor clock gone.—Philadelphia Press.

Something Practiced.
Just in the outskirts of Scantlinville the man in the automobile stopped. A team of horses, driven by an old farmer, was dragging a split log over the road.
"What's all this?" asked the man in the automobile.
"Sorry, sir," answered the old farmer, "but you'll have to turn out. This is the good roads movement."

Sounded Familiar.
Eva—Uncle Tom made millions with his mines. When he went over to Europe he could afford a private cabin for himself.
Edna—Gracious! How funny!
Eva—What is funny, dear?
Edna—Why, it must have been Uncle Tom's Cabin.

OREGON STATE ITEMS OF INTEREST

PRUNE YIELD BIG. **FINDS SEEDLESS PEARS.**

Southern Oregon Produces Crop of Excellent Quality.
Myrtle Creek—The harvesting of the prune crop throughout the prune districts in the southern part of Oregon is now nearing the end. The season has been an exceptional one for the grower of fruit. Intermittent rains have produced a yield unusual and a size and quality hardly before known. The French or Petite prune is the one most extensively grown and in ordinary years fruit weighing 70 and 80 pounds to the pound would be considered good, while this season has produced fruit weighing 35 to 40 pounds to the pound.
Douglas, Jackson and Josephine counties have always produced Oregon's best French prunes. The fruit is equal if not superior to the famous Santa Clara valley prunes boasted of by all California fruitgrowers. There will probably be about 150 carloads of this fruit shipped from the packing houses of the Douglas County Fruitgrowers' association at Roseburg and 50 carloads from the E. S. French company's plant at Myrtle Creek.

In addition to the excellence of the yield this season the growers have been favored with very high prices in the Eastern market, owing to the failure of fruit crops throughout the East. The fruit will in most cases be shipped direct to the markets at New York, Chicago, St. Louis, New Orleans and other cities, while some of it will reach the markets of Europe.

Correspondence Course for Teachers.
University of Oregon, Eugene—With a view to bringing the work of the university within the reach of the teachers of the state and others who find it impossible to attend the regular sessions, the department of education of the university is announcing a number of correspondence courses. No charge is being made for tuition, and the only expense attached will be that of postage and books. The state library commission is co-operating in the matter of furnishing libraries. Courses are now being given in English Classics, (state high school course) Shakespeare, History of England, Pedagogy, and Algebra.

Successful Prune Run.
Eugene—The local fruit evaporator has just closed a very successful season's run on prunes, curing over 600,000 pounds of green fruit, which makes over 200,000 pounds after they are dried. The entire crop in this vicinity was saved this year, whereas last year perhaps one-fourth of the crop was allowed to go to waste on account of lack of drying facilities. Since then the company that operates the evaporator here has built one at Irving of similar capacity and other smaller ones have been built near Eugene. The crop this year was almost as large as last.

Reign of Wheat Kings Ended.
Pendleton—A sensation has been created here by the announcement that Agent McFarlane has received positive instructions to institute new conditions on the Umatilla Indian reservation regarding the leasing of Indian land. In the future the leaseholder must reside on the land leased, which will do away with the wheat kings of Pendleton and other places who have been farming thousands of acres of reservation land. The new rule will make smaller farms and more people on them. It will go into effect at once.

Spring Bother Excavators.
Klamath Falls—C. S. and R. S. Moore, who are constructing a large power plant on the west side of Link river, within the city limits, are experiencing trouble in the excavating on account of the heavy flow of water. There are numerous springs in that locality, and it is supposed that the source of supply has been tapped. A large pump is now being used, operated by a gasoline engine. Moore Bros. contemplate in tailing an up to date electric plant, and a franchise has already been asked for in the town of Merrill.

Ship Peaches by Carload.
Milton—For the first time in the history of this district Milton has sent to outside points straight carload lots of peaches. During the present season more than 40 carloads have been shipped direct to Spokane, Montana and the Dakotas. Heretofore the shipments have been made in smaller lots and to the commission houses. This time the shipments have been made to the dealers direct. The price ranged from \$1.25 to \$1.50 per box.

Money for Road in Sight.
Baker City—William L. Vinson, promoter of the proposed Eagle Valley railroad to extend from Baker City to Eagle Valley, has announced that the full amount of subscription to stock in Baker City, \$1,000,000, has been raised. His engineers have begun cross sectioning the line out of Baker City, and in a few days the engineers will be followed by the graders.

Big Peaches on Willow Creek.
Vale—J. T. Logan, one of the best known farmers of Willow creek, brought into Vale last week a sample of ten peaches that are prize-winners. The smallest measured a little more than 1 1/4 inches in circumference and the largest was 1 1/2 inches around. A selection of four weighed 2 3/4 pounds. This record beats the winners at the Sacramento Irrigation congress.

Open Willows Timber Land.
La Grande—Thirty-five thousand acres of the Willows forest reserve is to be thrown open for settlement October 30, and a line-up at the La Grande land office is expected to begin this week. Most of the land is said to be heavily timbered. A large portion of it has been squatted upon already.

Old Taxes; Old Law.
Salem—Attorney General Crawford has given an opinion that taxes assessed and levied in 1908 and now in process of collection must be collected under the old law and not under the 1907 legislation.

General Debility

Day in and day out there is that feeling of weakness that makes a burden of itself. Food does not strengthen. Sleep does not refresh.

It is hard to do, hard to bear, what should be easy—vitality is on the ebb, and the whole system suffers. For this condition take **Hood's Sarsaparilla**. It vitalizes the blood and gives vigor and tone to all the organs and functions. In usual liquid form or in chocolate tablets known as **Sarsatabs**, 100 doses \$1.

Welcome Home.
Pedler—Wouldn't you like some notices for your house, mum? It's very cheering to a husband to see a nice motto on the wall when he comes home.
Mrs. Dagg—You might sell me one if you've got one that says, "Better late than never."

Takes No Part.
"He" seems to be a good man, but he cheats in a horse trade. How can he reconcile that with his conscience?
"My dear sir, when a man trades horses his conscience always goes to sleep."

Distillation.
The American contractor stood at the base of the great pyramid and looked at the venerable monument in disgust.
"It's a big pile, all right," he said; "and it may do well enough for Egypt, but if a man in the United States should turn out a job of stone work like that the papers would roast him from Hoboken to Heggwack."

Not a Merger.
Jonah was explaining matters.
"It wasn't a consolidation," he said. "It was a clear case of absorption. It was merely one of the whale's assets, as it were, and landed on his feet, he resolved not to engage in any more such enterprises, and fared hopefully on his way to Nineveh."

Our Own Minister.
"Mistah Johnson, what am de difference 'tween a first class seventy dollar tailor made suit of clothes and a 'ol' dohah ready made suit?"
"That's a little too deep for me, George. You will have to tell me. What is the difference between a first class \$70 tailor made suit of clothes and a \$4 ready made suit?"
"I knowed 'yo' couldn't tell, Mistah Johnson. Ef 'yo' could, 'yo' wouldn't be wearin' dat suit 'ol' han-me-downs 'yo' got on."

A Relief to Him.
"It must be hard," said the friend, "to have your wife running off to woman's rights meetings and all that sort of thing every night."
"Hard?" replied Henpeck, "why it's great! I can sit comfortably home and not have to listen to her."—Philadelphia Press.

The Trouble.
Jones—I understand there is trouble between Mrs. Poet and her husband.
Smith—Yes. He couldn't sell his poems, and she couldn't eat them, so she left him.

Showing the Furniture.
"I tell you I was at my best last night while calling on the Smiths; Mrs. Smith laughed at every remark I made. I must be quite a humorist when I'm in the humor."
"No, it wasn't that. Mrs. Smith got her new teeth yesterday."—Houston Post.

Words and Deeds.
"There never was a time in my life, fellow citizens," exclaimed the candidate, "when I hadn't the courage to call a spade a spade!"
"Yes," spoke up an old farmer in the audience, "and there never was a time in your life when you had the courage to take one in your hand!"

Bathe in Lily Pads.
One of the prettiest sights to be seen in any of the parks that boast fountains and water lilies is the bathing of the birds. The little fellows hop from one lily pad to another until they find one that dips enough to take on water, and here, in the round, green, floating tub provided by nature, they flutter and flourish until the bath is accomplished. It is a sight of never-ending interest for bird lovers.

Variations of Cards.
There are an enormous number of possible variations of cards in card games. Every man who holds one out of his cards at whist holds one out of 35,013,559,900 possible hands. The total number of variations possible among all players is so great as almost to exceed belief. It has been calculated that if a million men were engaged in dealing cards at the rate of one deal every minute day and night for 100,000,000 years they would have exhausted only a hundred-thousandth part of the variations of the cards.
