WELCHES

The parties who recently purchased
H. Hamman's place have brought in a
portable sawmill and intend cutting out
the lumber with which to build a large
hostelry for the accommodation of the
summer trade. They are situated close
to the Toll Gate near some of the best
fishing and hunting in these hills and
expect to do a large business.

Mr. Faubion also intends to build a
commodious log structure on his home-
stead in the same neighborhood so there
is every prospect of visitors receiving
the best of service another year.

Recently one of those pseudo timber
locators arrived in this neighborhood
with a party of gullible people whom he
had promised to show available timber
lands that he claimed were open to
entry. He showed them a tract of very
pretty timber and gave them what they
believed to be the correct numbers after
which they came to him \$500 or \$600
before he had shown them the corners,
when he gave them the slip and headed
for Portland.

When the party reached Salmon they
learned, to their sorrow, that they had
been fleeced of their money and that
the land they saw was already deeded
property while the numbers were situ-
ated on the top of a neighboring mount-
ain. They did not get much sympathy
however for the gullible tribe is nume-
rous and those who will allow themselves
to be thus ensnared deserve all they get.
