next following election. Take an example: The people of Oregon, like the people of Ohio, had for many years demanded that the big public service corporations pay their just share of the taxes. Finally a bill taxing these corporations 1 per cent on their gross incomes was introduced into the legislature of that state, only to be killed in committee—the usual fate of a people's measure. The grangers of Oregon secured a copy of that bill, raised the percentage to 3, printed it on petitions and circulated it all over the state. When 8 per cent of the voters had signed it was filed with the secretary of state and went to a vote of the people in June, 1906. It was approved by a vote of ten to one and thus became a law.

The Ohio amendment also provides for the referendum—that is, the power of the people to require that any law passed by the legislature unsatisfactory to the people may be remanded to a vote of the people at the following general election if a petition of 5 per cent of the voters (about 50,000) is filed against the bill within ninety days.

Note that the initiative and referendum is called into action only when the people may see fit to use it. So long as the legislature truly represents the people there is no need for it.

What is Meant by the Initiative and Referendum.

The national grange and many state granges are discussing the merits and demerits of what is called the initiative and referendum. Ohio granges are particularly active this winter in this discussion. The legislature of that state will pass upon the question at its present session. Oregon has had the system in operation for five years. Maine and Missouri have it on trial. What is this new method of dealing with public questions on the part of the people? By the initiative is meant the right of the people to propose laws to the legislature to be by it acted upon and, if not enacted, to be referred to a vote of the state at the
