We have hundreds of other combinations that might suit you. Write and tell us what you want and we will get it, but we only fill orders where The Herald is included. If your time is not up on The Herald send in anyhow and have your time extended.

In ordering, write carefully the names of papers or magazines wanted and amount due on them. If they go to separate addresses, the address should be written after each magazine. Use plenty of room, don't crowd the paper. The cash must accompany the order.

THE WOOD LOT.

evening for her daughter Opal, that be-Devices For Making the Cutting of Timber Less Laborious.

The increase of interest in timber raising makes the consideration of any devices of aid to the woodcutter of interest. The accompanying sketch shows a support or guide for a saw. which may readily be attached to a log or timber with ordinary tools to

NEW LOG SAWING DEVICE.

facilitate the sawing of the log. The details of this attachment are shown Says the Scientific American: "The at-Miss Violet Gould spent Sunday with tachment consists of a clamp adapted ordinary ax. The clamp comprises two jaws (B), through which a bolt is passed. The upper end of this bolt terminates in a support. The support were very entertaining. Three com- which a roller (O) is mounted to rotate. of them played at the funeral of Abra- Jaws of the clamp is fitted with a wing nut, and by turning this nut the jaws may be pressed together on the handle of the ax. In use the ax is driven into nto town and are occupying the widow the log, and the clamp is then made the back of the saw rests on the roller With the saw thus supported and guided. It may be operated in the usual manner to saw through the log. jaws, and the support must be mounted to project downward. In order to permit of removing the saw from the support it is preferable to support the returned from a season at Nome, Alaska. saw on the outer side of the roller, Rev. Parounagian went to Woodburn guiding it in the open slot formed by trict ministers meeting. He returned clamp is then applied, with the support projecting upward instead of downward." This useful attachment for

A sawhorse for household use may except that at the back instead of a narrow edge a wide edge is put, with Gresham seem to be on the decline. a top piece four inches wide. It can be made wider if desired. Two strips along the side form a box, which will The high school team will continue to hold tools and nails. It is about the handlest thing the handy man around the farm can have. To bring the forests to their full

productiveness they must be cut over. The ax is the forester's hoe as well as iest of the school team with some out- his scythe. Reaping and sowing are

eration, and cultivation is accomplishwant. There were cut from the national forests during the last fiscal year the equivalent of a little over involved cutting operations on slightly A coat of paint gives the livery stable, less than 360,000 acres of land, or area of the government's forests. In other words, hardly a beginning has been made in bringing the forests to their highest productiveness through use, and their reserve of mature timber has scarcely been touched by the operations under way. There is money in the wood lot, and the average farmer in awakening to this fact.
