Alaska-Yukon Exposition Notes.

Oregon will be the first state to install its exhibits at the Exposition.

The first Alaska exhibit for the Exposition arrived from the north October 25. The exhibit consists of a number of curios and furs.

Hawaii will have a novel exhibit. It is planned to show the islands in their relative size and direction from one another.

The sale of \$350,000 worth of exposition bonds has removed the last obstacle to the success of the Exposition and it is now certain that the 1909 fair will have the distinction of being the first big exposition to be entirely completed in time for the opening date. The progress that is being made on the construction of the buildings and grounds is a guarantee that no detail will be left unfinished when the fair is formally opened June 1, 1909.

Already three of the permanent buildings are finished and are ready to be turned over to the University of Washington at the close of the fair. By the first of the year the fourth permanent building will be completed and a number of the temporary structures finished. The mining palace and the fisheries building and the hospital and fire station are in use; and the Oregon building, the first state building to be completed, is ready to receive exhibits. Oregon will begin the shipment of its exhibit about January 1. The first consignment will be 3,000 boxes of apples, which will be placed in the cold storage plant, in the basement of the Oregon building, until within a few weeks of the opening date.
