## MANY ATTENDING SHORT COURSE

O. A. C. Doing Much for the  
Farmers and Fruitgrowers  
by Six-Weeks' Course.

A six week's course in horticulture is now under way at the Agricultural College, Corvallis, and there is a large attendance from different parts of the state, the attendance being more than twice that of last year. Some of the most interesting work in the course is yet to come. Many fruit-growers are unable to attend the course for the entire six weeks, but are able to come for a few days or several weeks. The course is open to them at any time. There will be two weeks more of apple-packing and work in budding and grafting. In addition to this special lectures are given on the various phases of fruit-growing, truck gardening and landscape gardening.

Beginning on February 8 a special course of two weeks will be given in walnut grafting. This should be of great interest to people contemplating engaging in this industry. In addition to the lectures practice will be given in the work.

In the last two weeks of the course two hours a day will be given to practical instruction in spraying, pruning, staking and setting of orchards.

Special lectures will be given by some of the best authorities on horticulture to be found in the Northwest. These courses are open to any one and may be taken up at any time.

## JOHNSON CREEK TO BE CONTROLLED

Residents Near Lents Have  
Decided to Utilize Recent-  
ly Raging Creek.

Property owners along Johnson creek near Lents Junction are very much interested in a project to improve the stream and cut out some of its numerous windings.

As the years have past, most of the timber has been removed from the land near the creek, but a lot of drift has accumulated and there are many places where it is almost entirely stopped up.

To completely remove all drift along the stream might prove a mistake, as wearing of the adjacent land would be far more rapid. As the country near Hogan, Anderson and Orient is cleared of its forests, drainage will be more rapid and high waters will be more frequent and sudden. People living in the flat valleys near the stream will be far more likely to suffer from overflows than now.

A few hundred dollars spent in clearing parts of the channel and cutting off some of the windings will relieve the trouble. It would not be necessary to make cuts to the depth of the stream bed, but if canals are cut a few feet deep they will relieve the congestion and gradually grow deeper.

The O. W. P. is preparing to guard against future washouts by putting in drain culverts every 100 feet, but while that will save the road it will not improve prospects for property-holders in the vicinity of Lents Junction. Plans are now being discussed as to plans for raising funds to carry through the work.

## ROCKWOOD

Floyd Lovelace and George Brown left for southern Oregon on Wednesday.

The house of F. H. Crane on the Sandy road narrowly escaped burning on Tuesday morning. Mr. Crane got up about 4 o'clock and made a fire in the kitchen stove which has a terra cotta chimney. The roof caught fire and was extinguished by a bucket brigade before much damage was done.

The house being built by David McKewen on the Section Line road is nearing completion.

Mrs. Sophia Duncan is spending a few days with her mother, Mrs. E. Quinn.

The dance given by the grange last Saturday was not attended by the usual large crowd on account of the bad roads but they expect a better attendance at the one given in February.

James Taylor is slowly improving.

Dexter Quesinberry is learning the blacksmith trade under the instruction of his father.

There is clearing being done on a good many places in this vicinity.
