 Sandy has always been known as a safe place in which to leave things within reach of night prowlers, but of late

axes have taken to leaving wood sheds, bacon bids good-bye to smoke houses, fruit to its berth in the cellar, etc. If the culprit has not already got his supply for the winter he had better be a little cautious for people are sitting up and taking notice.

Goats in the Orchard.

The following article from the Oregonian presents some ideas that ought to be of value to farmers: "To those who are trying to solve the problem of raising goats and a young orchard at the same time, I advise them to smear the young trees with axle grease. Take a swab or piece of sheepskin and rub it over the bark. If the grease is too thick dilute it with kerosene, then turn your goats and sheep loose and they will not hurt the trees. "I would also recommend for spraying trees a solution of saltpeter, say two ounces to a gallon of water, in preference to the poisonous compounds now universally used; spray the trunk as well; also the ground around the trees. Saltpeter is deadly to all insect life as well as animal. The wheat farmers east of the mountains who are troubled with ground squirrels, rabbits, etc., should try mixing salt with powdered saltpeter and scattering it in the vicinity of the holes. But keep your sheep and goats off the land for a time. Saltpeter being a nitrate it is a valuable fertilizer and will be a benefit to the trees. It is also good for sprinkling on all vegetables and plants. As for dogs or cats infested with fleas just give them a bath or two and you will not be bothered afterward. Saturate your pig pens with a solution and pour some over the animals as well. It costs very little. Be careful of fire or sparks around any building where saltpeter may be used."

Don't forget the "Want Ads" on page 8.

Milking a Bicycle.

The story is told of a farmer who went into a hardware store where bicycles were sold and because he was looking at a wheel the merchant urged him to buy one.

"No," said the farmer, "I'd rather have a cow."

"You'd look mighty nice riding a cow wouldn't you?" remarked the merchant. "And I'd look mighty nice milking a bicycle, wouldn't I?" replied the farmer.

Each man saw the ridiculous side of the proposition. What a pity more do not. You can find any number of farmers who would make as much milking a bicycle as from milking certain cows they keep. But they don't see how ridiculous it is to milk a good-for-nothing cow 400 or more times a year.

Womanly Wisdom.

Lift up! Give a word of good cheer! Lend a hand and make the world better for having had a place in it.

Rest your weary bones by having a chair in the kitchen in which to sit while doing work you can do that way.

If blankets are too short, sew a piece of stout muslin or cotton flannel to one end for the "tuck in."

You will spoil your nice china by washing it in water that is too hot. Use a bit of soap and have the water fairly warm. No cracked china then.

Don't try to dust with a dry cloth. That only sets the particles of dust to flying everywhere. Dampen your cloth the evening before and rinse it out in clear water once in awhile.
