SOME GRANGE HISTORY.

Men Who Founded the Order Just After the Civil War.

About forty-two years ago in the city of Washington a few men put their heads together to see if something could be done for the farmers of the southern states, where agriculture then lay prostrate because of the civil war. I believe that the coming together of these men and what resulted from their coming together was momentous in its results in the interests of the farmers of America and even the world. I believe that their names will live when the names of many now of fame will be forgotten. Let me name them here. They were O. H. Kelley, John Trimble, F. M. McDowell, J. R. Thompson, A. B. Grosh, William Saunders and W. M. Ireland.

What was it that these men did that, as it seems to me, was of such consequence and importance? They organized and put into actual working condition the Order of Patrons of Husbandry, commonly known as the Grange. So far as I know it was the first organization of real farmers in their own interest in the history of the world. The fact last stated, if it be a fact, is in itself of profound significance. Through the ages men and women, too, have toiled upon the land. But through the ages it was not until the last half of the nineteenth century that conditions were so that these toilers could get together and consider why and how and for whom they toiled and wherein their toil could be a better, a brighter, a nobler thing for them, and not for them only, but for all. The time has not yet come when this has been appreciated, but it will come.

Once fairly started, the order spread with astonishing rapidity until it overran the country. Is it surprising that in the flush of this unexpected success these farmers would go too fast and too far and that reaction would come? Certainly not. It could hardly be otherwise. The reaction came, and with it for a time discouragement and obloquy. But let it be noted that before this decline in numbers and influence the Order had done something to such benefit not only to farmers, but to the country at large, that if it had done nothing else its existence could have been more than justified.

But, though decline and depression came to the Grange, death came not. Its sickness only proved the vitality and strong constitution of the patient. This, too, is significant. If the time had not at last come when farmers were able to work together the Grange would have gone down to rise no more. Since then the steady, healthful growth of the Order and its work and achievement in the interest of the farmers is a thrice told tale. Its membership is great and constantly increasing.—Michigan Grange Bulletin.
