Mr. and Mrs. J. H. L. Maybee and their daughter, Alma, spent Saturday and Sunday with Mrs. Maybee's parents, Mr. and Mrs. Cline.

Mrs. Kellogg is visiting relatives in Portland this week.

Wash For Nursery Stock.

Dipping nursery stock in lime sulphur wash or other insecticides has recently been much advocated as a substitute for fumigation with hydrocyanic acid gas. The station at Geneva, N. Y., finds, however, that this treatment, if used at all, must be handled with care to secure scale destruction without injuring the trees, With the sulphur wash, exposure of the trees for too long a time or at too high temperature resulted in injury. while with any of the materials used exposure of the roots to the mixture resulted in serious injury to the stock. For nurserymen the station still recommends fumigation as most effective and least liable to injury and would advise orchardists to use the lime sulphur as a spray after the trees are set rather than as a dip when they are received.

French stonecutter, who came to Des Moines in 1875 to work on the con Jerome Cockelreas is on the sick list. struction of the state capitol. But stonecutting is an unhealthy business, and one day he determined to quit it. He bought a farm within sight of the golden dome of the statehouse he had

helped to construct and struggled along for years, paying off the mortgages and at the same time raising a family. Seven years ago he died, and his son, Francis, took the active management. It is he who has worked the miracle of the soll.

He has turned his farm into a truck garden, which is now said to be the finest truck farm west of the Missis-CAR sippi river. The beauty of his success is that, unlike truck gardeners of the RES east, he does not have to spend great loga sums of money for fertilization. During all these years his fertilization has not cost him more than 50 cents an

acre a year. Among the permanent improvements built since 1901 and paid for from this small farm are an \$8,000 house, under CAZA which is a modern cold storage; a

steam pumping plant that draws water from the river a half mile away and lifts it 145 feet into a monster res-

ervoir and eight greenhouses. Mr. Sestler by his management is making his farm yield a gross income of \$300 or \$400 an acre. Like every successful man, Mr. Sestier can handle some things better than others. Tomatoes seem to be his favorite crop. He introduced the method of raising tomatoes on poles and plants 3,000 vines to the acre, getting a yield of 750 bushels of perfect fruit that brings the highest price on the market.

He makes as much as \$2,500 on let-

son of a French stonecutter who knew nothing of agriculture and who never attended an agricultural college.

Bronson-I understand he painten cobwebs on the ceiling so perfectly that the maid wore herself out trying to

an artist, but there never was such a housemaid.-Puck.
