GRESHAM LOCALS

Mrs. O. Thomas, who was reported quite sick early this week, is improving and is expected home soon. Mrs. Thomas with her daughter, Mabel, and niece, Mrs. Jenkins, and daughter of Elkhorn, Wis., have been spending a few days at Seaside.

The band concerts on Saturday nights are well attended and greatly enjoyed by the citizens and strangers. They are a fine thing for the town. Many names have been put down on a list to help reimburse the boys. The list is in the hands of the librarian.

Rev. C. O. Branson was in town last Wednesday. He is taking a summer's rest from evangelic labors by engaging in physical labor on his place near Melrose.

The recent rains have given the potatoes and gardens a spring-like freshness. While a little hay may have been more or less injured, general benefit to the growing crops resulted.

The Howitt building is nearing completion. The plasterers have begun their work. This building will be a substantial addition to the business blocks in the town.

Mr. Stensland called on The Herald Wednesday. He is now showing up Eastwood Nursery stock and introducing a new map that is proving to be of interest to housekeepers.

John Brown of Rockwood is located in his new, roomy building. He has enlarged his stock and added several conveniences.

Rev. M. B. Paroungian will lecture tonight at Kelso for the benefit of the organ fund of the Sandy church. Good congregations attended services at the Linnemann Memorial church last Sunday. Several persons were baptized and received into membership.

J. O. Wing of Washougal was a caller at The Herald office Wednesday.

Mrs. L. P. Manning favored The Herald force with a fine treat of Royal Annes this week.

That Gresham is growing is verified by the new addition being built to the bank building on the north side. This part will be 12x25 feet, two stories high and another story added to the present building. A water system is being installed.

While skating last Saturday afternoon Alice McKinney had the misfortune to break her left arm.

During August the Gresham Reading Room will be open in the evening only, from 7 until 9 p. m.

Mrs. Rose Metzger and Mr. George Metzger were called to Weiser, Idaho, to the bedside of their sister, Mrs. Minnie Atkinson.

Mrs. P. A. Dailey and daughter, Alma, left yesterday for a visit at San Francisco and other California points.

Mr. and Mrs. Oliphant have recently purchased three lots in Whitehead's addition and will build a bungalow soon.

W. F. Gunn of Boring has purchased the lease to the Central hotel and has moved his family to Gresham and taken charge of the hostelry.

Solid Facts.

Did you know that the Acme Washing Machine sold by R. R. Carlson has never been equaled by the number of good points in its workings by any other machine. These facts are not disputed by anyone. Regrets are frequent from purchasers of other makes, that they had not seen the Acme before buying.

Chamberlain's Colic, Cholera and Diarrhoea Remedy the Best and Surest.

"It affords me pleasure to state that I consider the preparation known as Chamberlain's Colic, Cholera and Diarrhoea Remedy the best and surest of good results of any I have ever used in my family," says P. E. Herrington of Mount Aerial, Ky. This is the universal verdict of all who use this remedy. Its cures are so prompt and effectual that people take pleasure in recommending it. For sale by Gresham Drug Co.

A Blotched Complexion

Or the presence of any skin eruption is unsightly always. But that is not the worst. The worst is that the blood is out of order and if proper precaution is not taken something serious may follow.

A. D. S. Blood Mixture
rids the blood of impurities. No remedy will do it quicker than this one, few will do it as well.

Price \$1.00

MT. SCOTT DRUG CO.

LENTS, OREGON

Twenty-Five Cents is the Price of Peace.

The terrible itching and smarting, incident to certain skin diseases, is almost instantly allayed by applying Chamberlain's Salve. Price 25 cents. For sale by Gresham Drug Co.

LUSTEDS

Mr. Roach and family have moved from Arleta into Gust Carlson house on the pipe line which he has rented.

Mrs. Thompson of Portland is visiting her mother and brother.

J. Goff and wife is visiting her parents, Mr. and Mrs. G. Lusted.

Several of the boys from here attended the ball game at Boring on Sunday.

Mrs. A. C. Wilson is very ill at this writing.

Frank Wostell is out for a vacation.

Mrs. Belle Linnemann of Nashville near Lents, is visiting her sister, Mrs. G. Moulton.

Rev. Enster, pastor of the Sunnyside M. E. church, and son, Willie, were callers at E. D. Hamilton's on Monday.

COTTRELL

Bert Edwards is building a house for his brother, C. H. Edwards, and when completed it will be quite an improvement.

Mrs. B. Edwards is still in the hospital, but is said to be improving.

Stillman Andrews is building a very fine residence.

C. Donahue has just returned home from Portland where he served on the Federal jury.

Stillman Andrews sold two fine cows to a man at Lents.

Mr. McCormack has matched a race with Charlie Delore of Cherryville for \$50 in Lovers' Lane near Sandy, at two o'clock, Aug. 7. There will be several other races.

When you advertise in The Herald you reach the buying class throughout eastern Multnomah county.

Coffee Talk No. 3

HOW COFFEE IS GROWN

THE COFFEE PLANT thrives best in a hot, moist climate at considerable elevation in a rich soil.

The rainfall should be from 60 to 100 inches every year, well distributed over all the seasons. The drainage must be good, as the plant languishes in soggy ground. As the tap root is about 30 inches long, the drainage must extend to that depth. Where nature does not provide soil and moisture, fertilizers and irrigation have to take their place. Irrigation is practiced in Arabia and Mexico.

The young plants are obtained in three ways: First, by using seedlings that grow up spontaneously;

Second, by sowing seeds in nurseries and afterwards transplanting them, and

Third, by sowing them in the places which they are to occupy finally.

The better plan is the second, as in this manner only the thriving plants are transplanted into the permanent fields, thus reducing the loss by reason of trees not maturing to a minimum. In this manner, also, only healthy trees are planted.

In about a year coffee plants attain a height of 18 inches and are then ready for transfer to their permanent position on the plantation. But better results can be obtained by permitting the plants to remain in the nursery two or three years before transplanting.

In the wild coffee trees grow to about 18 feet in height, but for convenience of gathering the berries the trees on the plantation are kept pruned down to about 12 feet. The trees are planted in rows about eight feet apart, thus allowing full circulation of air, and about 350 to 400 trees are planted to the acre. The ground around the trees is cleared of all wild growth from three to five times a year by the natives.

Coffee trees begin to bear in some sections as early as the third year, others not until the fifth or sixth year, and reach their best bearing period at about the tenth year. It is said that coffee trees yield profitably 15 to 20 years, but it is known that trees much older yield plentifully.

The coffee berries should not be gathered until they have assumed a dark red color, verging on brown. If gathered at an earlier stage when they are bright red, the aroma is less rich. The berry when ripe is in size and appearance somewhat like a small cherry or cranberry.

There are six different parts to the coffee berry: 1st, the outer skin; 2d, a soft pulp that adheres to the outer skin; 3d, a soft glutinous substance that is sugary; 4th, the parchment, a tough, yellowish-white shell, thinner than the husk of wheat; 5th, the silver skin which adheres closely to the beans and enters their folds; 6th, the two coffee beans which lie against each other on their flat sides.

In the low lands, as in Brazil, shade trees are required to protect the coffee trees from the sun. The German planters in Guatemala and Mexico, at an altitude of 3000 feet, whose plantations are regarded as models of scientific management, have arrived at the conclusion that shade is not beneficial nor even necessary.

The plantations of the German-American Coffee Company are situated in southern Mexico, at an altitude of between 3000 and 5000 feet, where the highest grade of coffees are raised, thus offering to the public, in its sealed packages, Coffees of the highest type and best flavor.

The German-American Coffee Company's coffees are always uniform and sold at popular prices, and are now on sale by us.

Beware of unscrupulous peddlars who will sell you cheap and inferior coffee at larger prices not giving you what they should for the money expended.

CORBETT

Miss Dolly Blackhall of Portland visited her sisters last week.

Mr. Beals of Portland spent Sunday here.

Fred C. Reed went to Portland Saturday evening for repairs for his gasoline engine.

Mr. Fleury came over from Portland Saturday evening and remained over Sunday with his family.

Mr. and Mrs. Hughes enjoyed a visit with the former's sister from Montavilla the latter part of the week.

Geo. Dressell was in Portland on business Thursday.

W. H. Reed recently purchased two acres of cherry orchard from Mr. Burbower.

Miss Laura Reed spent last week in Portland.

Mr. Burbower has sold his farm here to a lady from St. Johns who expects to take possession this week.

Mr. and Mrs. T. L. Evans went to the beach in their auto last Wednesday.

Mrs. Garland of Portland is a visitor at the F. E. Reed home.

Cyril Nutley of Hood River is visiting at the home of Mrs. M. E. Reed.

The funeral of Mrs. L. H. Rickert, who died last Thursday at the Good Samaritan hospital was held Saturday afternoon at 2 o'clock at the Grange hall and the remains taken to their last resting place in the cemetery near here. She leaves a husband and daughter besides several grandchildren.

While operating a gasoline engine in his launch, F. C. Reed had the misfortune to smash his finger so badly he was compelled to go to Washougal and have it dressed.

Mrs. A. B. Leader is having her residence re-shingled.

Mrs. Sarah Kincaid has been suffering from an attack of influenza.

Mrs. Evans returned from Mosier on Wednesday and reports that the health of her daughter, Agnes, is improving.

Mrs. E. D. Chamberlain is visiting friends at Everett.

Mr. Dial has begun the erection of a barn on his place.

Help for Those Who Have Stomach Trouble.

After doctoring for about twelve years for a bad stomach trouble and spending nearly five hundred dollars for medicine and doctor's fees, I purchased my wife one box of Chamberlain's Stomach and Liver Tablets, which did her so much good that she continued to use them and they have done her more good than all of the medicine I bought before.—Samuel Boyer, Folsom, Iowa. This medicine is for sale by Gresham Drug Co. Samples free.

Sale Notice.

At the home of Mrs. M. C. Calvin, 1 1/4 miles east of Pleasant Home, on Saturday, July 31, beginning at 1 p. m. sharp, will be sold at auction to the highest bidder the following articles of household goods, to wit:

Stoves, tables, chairs, bedsteads, springs, mattresses, bureaus, commodese, bookcase, books, lounge, kitchen safe, kitchen treasures, china closet, dishes, carpet linoleum, pictures and other articles too numerous to mention. Terms cash.

R. I. ANDERSON, Auctioneer.

How to Keep Ferns in Good Condition.

Ferns should not be placed in halls or situations exposed to drafts. They require great care in watering. People often think they have watered their plants when the water has only gone over the surface and around the sides of the pots, the center of the ball being still quite dry. This is especially the case when the pots are filled with roots. It is necessary that the ball should be thoroughly soaked. There is no regular rule as to the time for watering. Plants in vigorous growth require more frequent watering. Evaporation also has much to do with it. On dry, warm days, when evaporation is great, water may be needed twice a day, while if the air is cool and moist two or three days might intervene without water. A healthy, vigorous plant absorbs much water, while a delicate one can absorb but little. The soil should be examined always and if dry watered; if not, refrain from watering. When leaves shrivel and turn yellow the soil has been too dry. If they turn yellow without shriveling it indicates too much water has been given. In either case the roots have been abused and lost their power of absorption.

How to Preserve an Umbrella Jar.

The housekeeper who has suffered from having her umbrella jar broken by hastily pushed in umbrellas should welcome the contrivance of a clever woman who declares she has learned how to prevent breaking. From an old rubber mat she cut two circles that just fitted the bottom of the jar. These were put one on top of the other, and when an umbrella was pushed in hurriedly it struck a soft surface instead of a breakable one. If one does not possess the rubber mat it will be found worth while to buy enough sheet rubber such as is used by plumbers. Its cost is nothing compared to a new umbrella jar.

How to Piece Lace.

To piece lace take the figure at the end of the lace and, commencing at the end of the scallop, cut around it close to the thread that outlines the figure, being careful not to cut this thread. If there is plain net at the top cut straight through it. Baste this figure over a similar one, being careful that every point and dot is exact. With a fine thread, silk or cotton, according to the lace, sew the cut edge of the lace down, sewing over the outline thread with fine stitches. Then cut away the extra lace on the wrong side, leaving only a very narrow seam. If carefully done the seam is almost invisible.

How to Make Bedroom Coverings.

Pretty coverings for a bedroom may be made of heavy unbleached muslin. For the bedspread buy cloth of double width to avoid a seam in the middle. Turn a two inch hem and hem tightly by hand. Then from soft colored cretonne or sateen cut wreaths of flowers or figures and fell them on to the cotton in any way that appeals to your taste. Curtains, pillows and bureau covers may be made in the same way. The materials are cheap, and the effect is pretty.

How to Make Oatmeal Cakes.

Three cupfuls boiling water, one cupful of oatmeal, one scant teaspoonful salt. Pour the water on the oatmeal, add the salt and cook three hours in double boiler. While still warm add one large tablespoonful of butter and one-half cupful of sugar. When cool add one-half cupful of yeast and flour to make stiff dough. Let it rise overnight. In the morning bake in gem pans twenty minutes, or until brown.

GRESHAM WOODSAW

DOES ALL KINDS OF WOODSAWING
Phone 28
Gresham, Oregon

Record prices were reached in the hog market at Portland during the past week. Last Thursday hogs advanced to \$9 per 100 pounds, this being the highest value ever recorded within the memory of the trade. A shipment of 77 hogs from the Willamette Valley received this attractive figure. The hogs averaged 184 pounds each and brought the unusual price of better than \$16.55 a-h.

Lots For Sale.

Lots 1, 2 and 3, Block 1, Thompson's Addition to Gresham, \$425 cash. L. E. Thompson, 324 Worcester Bk, Portland.

It is now very probable that Harry Thaw will regain his liberty. He has been "insane" about long enough to regain his freedom. Easy, isn't it.

How to Cook Bananas.

Few persons know the convenience and delicate taste of cooked bananas. Few not to bananas learn realize their nutritive value. Yellow bananas can be employed in many excellent ways. They are fine plainly boiled in their skins and served with cream or sweet butter for breakfast. They may be boiled with salt pork or baked around a leg of fresh pork (peeled in last instance) or fried and served with broiled lamb kidneys and bacon. Used in this way, both the kidneys and the bananas take on an added flavor by being together. Select fruit which, while ripe, is yet perfectly firm. Ten minutes are required for boiling and five or a little more for frying. The fruit will let you know when it is done, for it falls into a pulp as easy to digest as baby food. Baked bananas may take the place of potatoes on a luncheon table, as they are excellent with all meats. Bake them in their skins in a hot oven and punch them occasionally with the fingers to see how they are progressing.

How to Make Cleaning Balls.

Cleaning balls are easily made and cost less than if bought of a chemist. To make them take half a pound of dry fuller's earth and moisten it with a little lemon juice. Then add half an ounce of finely pulverized pearlash, and make all into a thick paste. Form into little balls, and dry them in the sun or at some distance from a fire. In a few hours the balls will be ready for use. When required the stained cloth should be moistened with warm water and rubbed with a ball. Let the garment dry, then brush off the powder, and wash it out if necessary.

How to Wash Delicate Materials.

To wash silks and pongees and dainties so that they will look like new wash them in bran water. For one waist take a pint of bran, put in a white muslin bag and pour enough hot water into the basin containing the bran to wash the waist. When the water is cool enough to bear the hands in squeeze the bag several times in the water. Add a teaspoonful of borax and wash the waist in the prepared water, rinse and when dry iron on the wrong side. No starch is needed, for the bran will stiffen the waist sufficiently.
