**She Wasn't Afraid.**  
A crowd gathered on the street to watch a handsome fox terrier that was running about, nose in air. White froth was running from the dog's mouth.  
"He's mad!" yelled a fat man.  
The fox terrier stood in the center of the group with wide open eyes, either too mad or too frightened to move.  
At this juncture the policeman arrived. A dozen voices began to tell him that the dog was mad; that it must be killed; that it had been snapping at the children; that it began to froth when it passed a pool of water, and how best to shoot.  
A tall, quiet looking woman pushed through the crowd and started toward the dog. A dozen men yelled at her. Two or three men grabbed at her.  
She picked the dog up and started out of the crowd. The policeman stopped her with:  
"Mildam, that dog is mad. He must be shot. Look at the foam coming out of his mouth."  
"Foam!" she said contemptuously. "That's a cream puff he was eating."

**Printing a Coin on Linen.**  
The print of a silver coin or medal may be made on silk or linen by dipping the fabric in a solution of nitrate of silver and stretching it over the face of the coin until the image is imprinted. The linen is sensitized by dipping it into a solution of nitrate of silver, made by dissolving sixty or eighty grains of nitrate of silver in one ounce of water. Wet the portion of the cloth which is to receive the impression in the solution and when nearly dry draw it over the face of the coin and tie it at the back. Expose to a weak light, and in a few minutes the raised design of the coin will appear on the linen. As soon as the print is dark enough remove and wash in clear water. When nearly dry iron it smooth with a warm iron, placing a piece of tissue paper over the print. In printing from the coin or medal it is advisable to paste a piece of paper on the reverse side, so that the silver will not come in contact with the sensitized fabric.
