One of the greatest surprises that has come to Lents in many a day came when Al Lerch left town last week, deserting his good wife and child, and leaving a lengthy list of debts and other obligations. Lerch has been a prominent Odd Fellow and the members of the Mt. Scott lodge will feel compelled, under the circumstances, to take action on account of his conduct, to a strike his name from the list of members.

There is a new sentiment awakened in this town that is causing more talk and discussion than anything has in this neighborhood for years. Now that the Mt. Hood railroad has resumed operations it is almost an assured fact that the new electric line will hit Sandy and this will be a principal distributing point for the surrounding country. The event of a railroad coming here means much to Sandy, which has always been lacking transportation facilities. Several prominent men of the town have expressed themselves as being strongly of the opinion that in the near future Sandy is going to boom and much improvement has already been talked of.

In localities where quack grass is getting a foothold, as it is in many eastern and central states where summer rainfall is usually abundant, a fellow should be a bit cautious about using raw manure got from stockyards and livery barns where there is likelihood that hay containing the mature seed has been used. This suggestion is made because, as every farmer knows to his sorrow who has had experience with the pest, it is a far simpler matter to get land fouled with the grass than it is to get rid of it after it gets a foothold.
