GRESHAM, MULTNOMAH CO., OREGON, FRIDAY, FEBRUARY 3, 1911

Vol. 7. No. 5.

AN 80-ACRE TRACT TO BE ADDED TO GRESHAM

Chas. Cleveland Has Decided to Sub-Divide His Farm Into City Lots

Charles Cleveland has decided to convert about eighty acres of his Cedar Grove farm into town lots and acreage tracts. A surveying crew has been at work for three days past running the lines for the divisions and will soon have another addition to the city of Gresham platted and ready for investors and home builders.

The land being surveyed is the eastern half of the farm, which extends northward from the section line road about one-half mile. Twenty acres on the section line, which is the northern boundary of the city at that point, will be laid off in lots and blocks of regular city size with streets to correspond. North of that the remaining sixty acres will be divided into three and one-acre tracts with streets in uniformity with those of the other piece. Later on these lots and blocks will be placed on the map.

In making the survey Mr. Cleveland is extending the county road that now

exists along the eastern border of the city. It will be opened up and donated to the use of the public as far as Mr. Cleveland's land extends. It is intended to have the road opened to the Base Line as soon as practicable, thus making another thoroughfare into Gresham and making it more convenient for residents along the Base Line, east of the 12-mile corner, to get to the city. Besides being much nearer it will be of an easier grade than the hill at the gravel pit and less dangerous, as every one knows the great risk to teams from automobiles at that point.

The twenty acres being surveyed into town lots is just outside the corporate limits. The acreage tracts are farther away, but the whole piece is level and cleared. It has all been farmed for years and is now a meadow, but in a few years more it will be one of the most thriving suburbs as it lies close to the new railroad and will be within easy distance of the Mount Hood depot.

PLEASANT VALLEY

Miss Gladys Gessell of Portland spent Sunday with Laura Moore.

G. N. Sage is spending the week in the Klickitat looking after his ranch.

Mrs. T. E. Taylor and Florence are visiting relatives in Portland.

Leona Kesterson visited her aunt, Mrs. Hilliard, this week.

An entertainment will be given by the eighth grade pupils, all of whom passed at the recent examination. They will be assisted by other members of the school. This class consists of eight members and is the banner class of Multnomah county. The entertainment will be given Friday, February 3.

CEDARVILLE

Mrs. George Bornstedt has returned to her home at Sandy.

Archie Collins is employed on the dairy farm of C. W. Albertson.

D. M. Cathley is hauling lumber from Sandy for his new barn.

Miss Helen Brand is visiting her grandmother.

Mrs. S. C. Jones is slowly improving from an attack of the grippe and rheumatism.

Mr. and Mrs. Frank Heiney spent Sunday with the former's parents, Mr. and Mrs. Joseph Heiney.

Mr. and Mrs. Orland Zook and family have returned from a visit in the Willamette valley.

Mr. White has the contract of furnishing wood for the steam shovel on the Mt. Hood railroad.

Mr. and Mrs. Fisk and family, accompanied by Mrs. Fisk's brother, F. B. Crawford, have moved to Estacada.

Miss Echo Jones has recovered from an attack of pneumonia. She is staying with her grandmother, Mrs. S. J. Jones, attending school.

Callers at the home of little Master Albertson Sunday, were Mr. and Mrs. Bachmeyer, Mr. and Mrs. Sterling, Mr. and Mrs. S. C. Jones and sons, Hallie and Guy.

Miss Hallie Wegman returned home Sunday from the hospital, where she underwent an operation for appendicitis. She is improving very rapidly.

When her child is in danger a woman will risk her life to protect it. No great act of heroism or risk of life is necessary to protect a child from croup. Give Chamberlain's Cough Remedy and all danger is avoided. For sale by all dealers.

Lentlight is the name. See E. L. Rayburn, Lents, about it.

Gresham Wins Two Games

The Gresham high school quintet defeated the Estacada high school team Friday night by a score of 45 to 2. The Gresham forwards and center threw baskets at will, while the guards did not allow the ball to get near the opponent's basket. The line-up was as follows:

Estacada—Dale, center; Page, guard; Woodie, guard; Morton, forward; Evans, forward. Gresham—Thompson, center; Ryan, guard; Metzger, guard; Roberts, forward; Sunday, forward. Hewitt, of Portland, was referee.

Gresham girls' high school basket ball team won from Camas high school team on the home floor Friday night. A fast game was played, score being 7 to 6. Line-up was: Camas—Vera Harrington, center; Cessie Collard, guard; Maud Blake, guard; Alice Asher, forward; Edith S. Joor, forward. Gresham—Marguerite Michel, center; Mazie Schantline, guard; Evelyn Metzger, guard; Lottie Davis, forward; Maud Michel, forward. The referee was Frank Blake of Camas, Washington.

Emil Kardell Marries in California

Just as our last Friday's edition was well off the press a card was received from Long Beach, Calif., stating that Emil G. Kardell and Miss Clara N. Woodard, of Pasadena, had just been united in marriage and would return to Gresham after a short visit to California points of interest. Mr. Kardell is too well known in this part of the country to require any introduction. It is sufficient to say that the Herald and the entire community unites in a general congratulation to the gentleman and his bride. Their appearance in the town will be cause for a general rejoicing and good wishes.

Beginners' Class to be Started

If necessary a class of beginners will be started next Monday in the public school. It would be preferable to keep beginners out until next September as there are no half-year promotions in the grades, and children beginning now will be classified with those who begin next September. It would be better, however, for them to start now than later in the term.

Seed Grain Suggestions

Have you any choice seed grain for sale, or will you need seed?

If you have any good seed grain, you should send a sample to your state experiment station, stating how much you have and the price you want for it. Your name will be listed and sent to those who ask for good seed.

If you need good seed, ask the state experiment station where to get it and what it will cost.

If you produce your own seed grain, it is important to select it early out of the best part of the crop and take good care of it.

You should never fail to use a good fanning mill, selecting only the heaviest and plumpest kernels of good body for sowing, and avoid planting shriveled and dwarfed kernels. Wheat, oats, barley and rye seed may be best prepared by fanning mills, which separate by size and by weight, by means of screens and wind blast. A good fanning mill, properly used, will more than pay for itself in a single season.

If your seed appears to be mixed or falling off in yield, it will pay you to get pure bred seed of the best strain adapted to your soil and climate. If you have any doubt as to what varieties to plant, write the State Experiment Station and ask them which will do the best in your soil and climate.

Are you testing you seed for germinating qualities? It is a simple matter, and the State Experiment Station will send you full directions for doing it at home.

Do not waste your time in sowing new varieties (except on a small tract as an experiment) unless your State Experiment Station recommends them.

THE NEW PIPE IS TESTED

A second section of the new pipe line has been tested this week. It is that portion lying between Beaver Creek and A. B. Wood's place, one mile eastward. The ends of the big pipe line were capped with a metal disc and water was jumped into the main from a running stream. The lap-weld seams and all the riveted joints stood the test remarkably well and the trench is now ready to be filled in. Another section of about four miles further eastward was tested several weeks ago and accepted, and the ditch filled up, thus practically completing that much of the work. All other work from Beaver creek westward to the western boundary of Gresham has been postponed until good weather comes again.

From Gresham, westward about three miles of ditch has been opened and pipe is being laid as rapidly as possible. Rapid progress is also being made on the four miles eastward from the Lusted school house. Several more sections will be ready to test in a short time.

Teams are still hauling pipe to the Sandy bluff near Cottrell, where it is being left for further transmission when the roads get good. Nearly 400 joints of the pipe are yet to be taken out there for the line between the Sandy river and the headworks.

At the recent Commonwealth conference, Professor Joseph Schaefer presented his suggestions for a new type of normal school to meet the existing need in Oregon.

He would have the normal make itself unequivocally the leader of the rural schools, preparing teachers for these, rather than for service in the towns. To do this, it must adopt a curriculum containing some country life subjects. It should teach the principles of agriculture, employing as aids in the work practice in gardening, floriculture, orcharding, poultry raising—perhaps even dairying. It should pay special attention to rural sociology, which the speaker calls "the reflective handling of rural life problem with a view to their rational solution. In a word, the graduates of the normal should be full of enthusiasm for country life, scientifically able to meet its conditions, and eager to teach in rural communities, where they may vitalize their teaching by including some vocational work and by relating all of their work closely to the need of children living in farm homes. The normal should also provide practice teaching in rural schools for its advanced students, and try to settle its graduates, under favorable conditions as permanent teachers of rural schools.

The plan is receiving much favorable comment from school men and others and its hoped the normal school board may consider it carefully before adopting a definite policy for the new normal, at Monmouth.

We are disposed to say unkind things about the rule, but the fact remains that there are many men who are worse kickers.

The convenience of the new Lentlight. Try it. Send to Rayburn, Lents.

MAN AND HIS WIFE KILLED BY O. W. P. TRAIN

They Were Caught on a High Trestle Near Barton And Hurlled to Rocks Below

Caught near the center of a trestle 200 feet long on the Estacada division of the Oregon Water Power Company's lines, near Barton, yesterday afternoon, Lew Hughman and his wife were hurled upon the rocks in the bed of the creek, 60 feet below, by an electric engine. The woman was killed instantly. Hughman suffered a severe concussion of the skull and died while being hastened to a hospital in Portland. Mr. Hughman was employed as a woodchopper by C. Z. Lake and is said to have lived at 644 Beacon street, Portland.

The accident happened on bridge No. 19, spanning Deep creek. According to the company's version, the motor-man, Roy Jeffery, mistook the couple for bridge tenders until he was so close that it was impossible to stop before reaching them. He also called to them,

it is said, to run ahead and they would be safe, as he was rapidly getting his electric engine under control, but instead they crouched down along the side of the trestle and were swept into the rocky chasm below. The train, company officials say, stopped within 50 feet of the spot.

The train, consisting of five cars of sand and a caboose, was in charge of Conductor Adams. It was bound south. Just before reaching bridge 19 there is a sharp curve. The company has been employing bridge carpenters all along the line the last few weeks on account of the high water. When these men see a train coming they step down on benches along the sides of the trestle and allow it to pass.

Hughman was apparently between 27 and 30 years old and his wife was somewhat younger.

You cannot afford to take the chances. Let the Experiment Station do the testing of new varieties and learn the results from them.

Whenever smut appears, treat the seed grain with formalin solution. Get the formula and method from the State Experiment Station. The treatment is very simple and effective.

By attention to these rules, you can increase your crop from four to ten bushels per acre, with very little extra expense. Additional attention to cultural methods and soil fertilization will add further to the profits.

Sedentary habits, lack of outdoor exercise, insufficient mastication of food, constipation, a torpid liver, worry and anxiety, are the most common causes of stomach troubles. Correct your habits and take Chamberlain's Stomach and Liver Tablets and you will soon be well again. For sale by all dealers.

Notice to Creditors

Notice is hereby given that the undersigned has been appointed administrator of the estate of Lydia J. Callwell, deceased, by the county court of the state of Oregon, for Multnomah county, and has qualified. All persons having claims against said estate are hereby notified to present the same to me at 314 Spalding building, Portland, Oregon, duly verified, within six months from the date hereof.

First publication Jan. 14, 1911.

New Real Estate Company

Having opened a real estate office in Gresham, we wish a nice list of lands both wild and improved to offer our large list of prospective buyers. If you have anything to sell come in and see us. We are in a position to handle successfully all kinds of realty either wild or improved, large or small, town country.

If your price is right we will do the rest.

SMITH LAND COMPANY,
Office on Powell street, Gresham.

BANK BY MAIL

Our line of depositors who make deposits by mail are increasing rapidly. It's a very convenient way especially if you live any considerable distance from a bank. Deposits received by mail have our first attention. They are all attended to in the morning before the bank opens and receipts for deposits are promptly mailed.

Many of our depositors we have not seen for months.

Monthly Statements

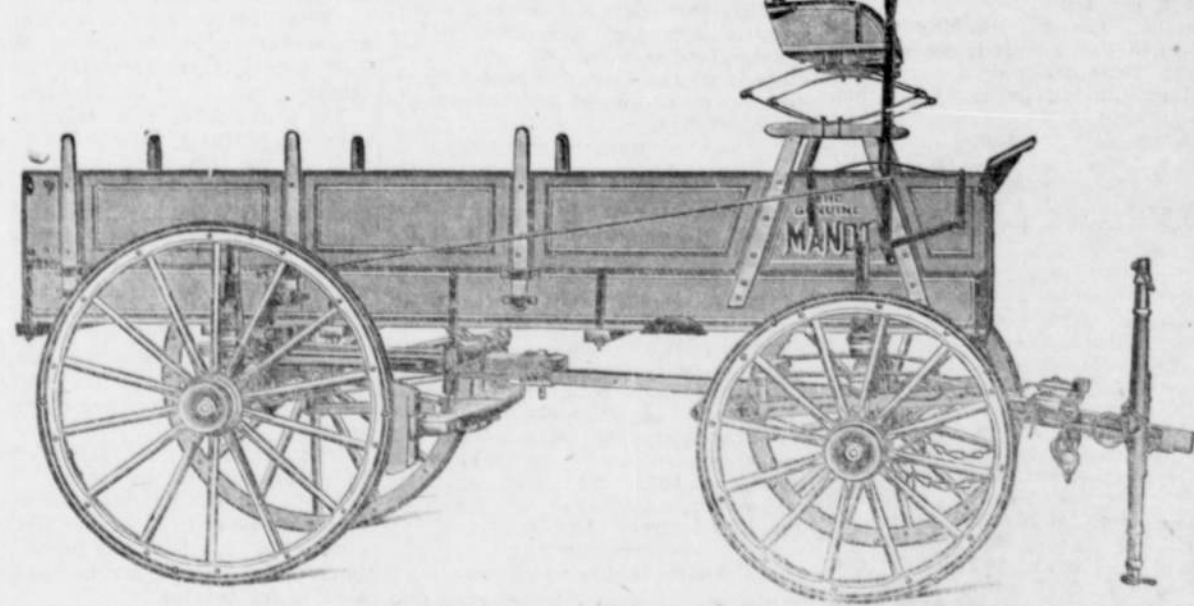

are mailed to them each month showing condition of their accounts which have proven a great satisfaction to those living at a distance. There is no need of driving over muddy roads and through the storm. Make your mail carrier do that part of it. It is quicker, cheaper and more modern. Now is the time to begin the practice of these most improved business methods.

If you wish to make a deposit without coming to our bank, write us. You will receive full instructions and will like our way of doing business. "A SQUARE DEAL."
