**HAVE CLUB FOR EACH WIFE**  
 No Papuan Gentleman Would Think of Beating Two Wives With the Same Weapon.  
 The marriage customs of the Papuans are somewhat similar to those of many other savage races. The ceremony is largely a matter of purchase. The men marry when they are about 8 years of age and the girls at 11 or even earlier.  
 When a young lake man desires to be married he visits the father of his prospective bride and puts forward his personal belongings as an inducement to the father to consent to the union. If a man has a gun he is a great personage and can demand anything he desires for his bows and arrows and spears. Most of the Papuans have very little. Even agricultural produce is scarce, the only cultivation undertaken being on a very primitive scale.  
 A little clearing is made by both men and women, and the women then grow bananas and sweet potatoes. The men are always armed, and when the women go to the patch to attend to their crops or gather the produce the men go with them as a protection. The women, however, do the work.  
 Many families have a bundle of ancient Portuguese cloth centuries old and when a young man is seeking a bride one of these heirlooms is generally part of the deal. The youth and the girl's father haggle over the marriage until eventually they agree to terms and then the thing is done. The men are not limited to one wife and once a girl is married she is subject to her husband in everything and is practically his slave.  
 "In another part of New Guinea," says a writer in the Wide World, "I remember a distinctly strong confirmation of the custom which places a woman at the entire mercy of her husband. At one house I visited I saw standing outside the doorway three huge stone clubs, each large enough to fell a bullock.  
 "On making inquiries I found that they belonged to the number of wives owned allegiance to the householder; the clubs were used by the man to beat his wives with if they annoyed him. The quaint part of it was that while the women seemed to raise no objection to being flogged unmercifully by their lord and master, they would not be beaten with the same weapon as that used on another woman, so the natives kept a separate club for each wife."

**Forget It!**  
 Every one ought to make it a life rule to wipe out from his memory everything that has been unpleasant, unfortunate, says Orion Sweet Marden in Success Magazine. We ought to forget everything that has kept us back, has made us suffer, has been disagreeable, and never allow the hideous pictures of distressing conditions to enter our minds again. There is only one thing to do with a disagreeable, harmful experience, and that is—forget it!  
**TO CURE A COLD IN ONE DAY**  
 Take LAXATIVE BROMO Quinine Tablets. Druggists refund money if it fails to cure. E. V. KIDNEY & SONS, Inc., each box, 25c.

**TRY MURINE EYE REMEDY**  
 for Red, Weak, Watery Eyes; Stinging and Granulated Eyelids; Murine Doesn't Smart—Soothes Eye Pain. Druggist Sell Murine Eye Remedy, Liquid, 25c; Oe. \$1.00. Murine Eye Salve: 25c. Eye Drops, 25c, \$1.00. Eye Books and Eye Advice Free by Mail. Murine Eye Remedy Co., Chicago.

**Miniature Specialization.**  
 A young medical student was being tutored by one of his teachers: "In what will you specialize?" he was asked. "Disease of the nostril," replied the student. "Good," said the professor, enthusiastically. "Which nostril?"  
 "The Chicago fire could have been prevented with one pair of water, but the water was not handy. Keep a bottle of Firestone Wizard of Wonders and prevent the fiery pain of indigestion."

**A Gift Book.**  
 To give a book is to enrich the receiver permanently; to put into his or her possession something which leaves a residue of pleasure long after the particular date on which it was received has been forgotten.—Hamilton W. May.

**Miraculous!**  
 An ad clipped from a Des Moines paper: "In looking over an almanac, I read of — I purchased a bottle; in three days I felt better. I took five bottles and two months later I went to work. My friends say it is the most wonderful cure they ever saw."

**Forests and Earthquakes.**  
 In the Reseque Contemporanea for October (a journal which, by the way, has during the past few months contained a number of well-written articles dealing with English national movements), Signor Gino Cucchetti publishes an article dealing with the geologist, Venturino Sabatini, according to which a remedy for the disastrous effects of earthquakes in Messina and southern Italy should be sought in an effluent scheme of afforestation. It is pointed out that the cutting down of trees in such districts may frequently result in a loosening of the subsoil, which is largely argillaceous or sandy in character, thus giving rise to faults and lessening the resistance to the effects of seismic disturbances. The cutting down of woods receives further mention in an article by the Deputy Giovanni Posati dealing with the preservation of natural beauties, while an article by Signor Arnaldo Faustini dealing with changes that have occurred on the earth's surface in recent times, with special reference to the subsidence of the Island of Bogoslaw, in Alaska, possesses collateral interest in the same connection.—Nature.

**Bronze Followed Iron.**  
 Pliny records that the best steel used at Rome in his day came from China, a country whose historians claim that bronze or copper swords were used "in the days of Ki, the son of Yu," B. C. 2197-48, and those of iron under Kung-Kia, B. C. 1897-48. According to the Arundell's marbles, iron was first known to the Greeks, B. C. 1432, nearly two centuries and a half before the Trojan war, which is supposed to have begun B. C. 1184, but the bible declares that nearly 36 centuries before Christ, Tubal Cain—seventh in descent from Adam through Cain, his first-born son—was "an instructor of every artificer in brass and iron." Josephus declares of him that he was "the inventor of brass" (or bronze), which would indicate that bronze, instead of being made before iron was forged, was the later invention.—From an article in the National Magazine.

**New to Him.**  
 The hobble skirt was being discussed at the Colony club in New York, and Miss Elizabeth Marbury, the dramatic agent, said with a smile: "You'd think the hobble skirt had penetrated everywhere, but listen.  
 "In Camden the other afternoon a young girl in a brown noble skirt hurried, with short quick steps, to a football game. Her skirt was tight enough, in all conscience, but a narrow black band encircling it just below the knees drew it still tighter.  
 "As the young girl tripped out Mickle street a coal heaver, laying down his shovel, ran after her.  
 "Say, miss," he said, in a low, confidential tone, 'your belt's slipped down.'"

**Leaves the Small Change.**  
 Hobbs—Does your wife ever rack your pockets for letters?  
 Dobbs—Yes, for big Xs and Va-terton.

**PEACH LEAF CURL.**  
 Comprehensive Directions for Its Recognition and Treatment.  
 Oregon Agricultural College, Corvallis—Professor H. S. Jackson, botanist and plant pathologist, at the Oregon Agricultural Experiment station, in a paper recently prepared, discussed at some length the nature and cure of what he considers to be most common and destructive disease of the peach which is met with in the Northwest.  
 "The disease may be recognized by the characteristic effect upon the foliage and twigs. The leaves are peculiarly and characteristically curled. This curling results from a stimulation induced by a parasitic fungus which grows among the cells of the leaf. The infected leaves become considerably increased in thickness and breadth. The cells of the tissues develop thickened walls and increase in size and number. The tissues of the midrib do not increase to any extent and the abnormal growth in the tissues on either side as described above, results in a puckering or curling. Since the greatest growth is in the tissues toward the upper side—there is a tendency for the upper surface of the curled leaf to be convex. Affected twigs are increased in thickness and very much shortened. The green coloring matter normally present in healthy twigs is largely bleached out so that diseased twigs appear whitish.  
 "The parasitic fungus causing the trouble is known as exoascus deformans. The vegetative condition of the fungus, the mycelium, is present among the cells of all diseased tissues, absorbing the juices needed for the proper growth of the tree and stimulating the tissues to produce the abnormal structures described above which are not able to properly perform the functions of normal tissues. Productive bodies or spores are produced in little sacs which form a layer on the surface of affected leaves. These form under the cuticle, finally pushing it off and imparting to the surface a frosted appearance. In each sac are borne at first eight spores. These become greatly increased in numbers by budding within the sac. The spores thus formed escape by the rupture of the sac. These spores are presumably carried over the winter on the surface of twigs and bud scales and produce infection as soon as the leaf buds open in spring.  
 "Affected foliage usually drops and where abundant may cause more or less complete defoliation of the tree. Such trees set little or no fruit. Defoliated trees usually leaf out again so that in mid-summer no signs of the disease may be found. The effect of such defoliation however, is to stunt the tree. Trees allowed to become infected year after year are usually unprofitable.  
 "Besides the method mentioned above the fungus may be carried over from one season to the next by the mycelium living over the winter in the twigs. The fungus gains entrance to the twigs by the growth of the mycelium down the leaf stalks of affected leaves into the twig. Where such twigs remain alive over the winter the leaves produced from the buds on these twigs will always be infected. Fortunately only a few branches become infested in this way and the majority of these die before the next spring, leaving only a very small percentage of the infection, even in serious cases, caused by this method.  
 "Control. Since the great majority of infections take place at the time the buds open in the spring from spores adhering over winter to the buds, bud scales and twigs, it is obvious that a spray applied early in the spring before the buds open, will kill the spores or prevent their germination and will control the disease.  
 "Use the bordeaux mixture 5-5-50 or the lime-sulphur 30 degrees baume diluted 1-15 and apply early in the spring just before or while the buds are swelling, but before any of the buds show any green leaf tips. If any of the buds show the green tips of the leaves these may become infected.  
 "Spraying will not prevent infection resulting from the mycelium wintering over in the bark of the twigs. Fortunately this method of wintering over accounts for only a small proportion of the infection.  
 "In spraying for leaf curl it is important that every twig be thoroughly covered with the spray.  
 "Either of the sprays mentioned are equally good in preventing this disease. The lime-sulphur, however, has the advantage of being an insecticide and will control the scale and is to be recommended over the bordeaux mixture on that account."

**The Supreme Test.**  
 "Has Will made a success of his college course?"  
 "I should say so. He has gone through every football game without being in the least bit out of it."

**Exhausted.**  
 "Mister Grocer, ma says send her a can o' peas an' a pound o' butter an' five pounds o' sugar an' charge it!"  
 "Lucy, you run right back and tell your mother we are just out of charge it!"

**First and Last Love.**  
 "It is the last love that makes a fool of the woman, and the first love that makes a man look as foolish as he is."  
 —"Tower of Ivory," by Gertrude Atherton.

**COLDS**  
**GRIP**  
 Many's Cold Remedy. Relieves the head, throat and lungs almost immediately. Checks Fevers, Stomach Discharges of the nose, takes away all aches and pains caused by colds. It cures Grip and eliminates Coughs and prevents Pneumonia. Write Prof. Munyon, 53rd and Jefferson Sts., Phila., Pa., for medical advice absolutely free.

**LAZY LIVER**  
 "I find Cascarets so good that I would not be without them. I was troubled a great deal with torpid liver and headache. Now since taking Cascarets Candy Cathartic I feel very much better. I shall certainly recommend them to my friends as the best medicine I have ever seen."  
 Anns Bazinet, Osborn Mill No. 2, Fall River, Mass. Pleasant, Palatable, Potent, Taste Good, Do Good. Never Slacks, Weakens or Grips. 10c, 25c, 50c. Never sold in bulk. The genuine tablet stamped C. C. G. Guaranteed to cure or your money back.

**Glance Backward.**  
 Fichte once said: "The day that opens for us another year is best used in beginning that year aright; but one wastes no time, in spite of this, by a backward look or two, not only to balance his own books, as it were, but also to take due note of what memorable men and women have accomplished in the years that were theirs. So shall he be at once inform his mind and raise examples to his future effort." And the sentences might well stand text to what has here been written.

**Safe That Floats.**  
 A buoyant safe that in case of disaster will float to the surface as the ship equipped with it sinks, has been devised by four mechanics in the navy yard at Bremerton, Wash. The safe consists of a large cylinder of steel which is divided into two compartments, the lower one being an air chamber and the lower fitted as a receptacle for money and papers.

**Forget It!**  
 Every one ought to make it a life rule to wipe out from his memory everything that has been unpleasant, unfortunate, says Orion Sweet Marden in Success Magazine. **SPOHN MEDICAL CO., Chemists and Bacteriologists, GOSHEN, IND., U. S. A.**

**English Sparrow Sayer Club.**  
 Farmers in Codford and district have formed a club for the destruction of sparrows, which are so numerous that they have become a pest to this part of Wilshire. The rules provide that each member shall kill no fewer than 100 sparrows in two months or be fined a head for any under that number not destroyed.  
 To stop a leak in a water pipe until the plumber comes, shut off the water, drain the pipe, wipe the place dry, apply a piece of surgeon's plaster and bind on tightly with a long strip of the same plaster. Wind this thickly with absorbent cotton and bandage the whole with strong cloth. This will hold very well for about 24 hours.

**Housework Drudgery**  
 Housework is drudgery for the weak woman. She brushes, dusts and scrubs, or is on her feet all day attending to the many details of the household, her back aching, her temples throbbing, nerves quivering under the stress of pain, possibly dizzy feelings. Sometimes rest in bed is not refreshing, because the poor tired nerves do not permit of refreshing sleep. The real need of weak, nervous women is satisfied by Dr. Pierce's Favorite Prescription.  
**It Makes Weak Women Strong and Sick Women Well.**  
 This "Prescription" removes the cause of women's weakness, heals inflammation and ulceration, and cures those weaknesses so peculiar to women. It tranquilizes the nerves, encourages the appetite and induces restful sleep.  
 Dr. Pierce is perfectly willing to let every one know what his "Favorite Prescription" contains, a complete list of ingredients on the bottle-wrapper. Do not let any unscrupulous druggist persuade you that his substitute of unknown composition is "just as good" in order that he may make a bigger profit. Just smile and shake your head!  
 Dr. Pierce's Pleasant Pellets cures liver ills.

**New FIELDS OF PROSPECTING.**  
 As long as the present process of extracting radium from pitchblende is so enormously expensive it avails little that new pitchblende fields have been found in the south seas. However, it is of scientific interest if not of commercial advantage. Certainly the radium manufacturers are not using all the pitchblende available at the present time.  
**2 Cures While You Walk.**  
 Allen's Foot-Ease is a certain cure for hot, sweating, callus, and swollen, aching feet. Sold by all Druggists. Price 25c. Don't accept any substitute. Trial package FREE. Address Allen S. Olmsted, Le Roy, N. Y.

**Petite's Eye Salve**  
**FOR ALL EYE DISEASES**  
 In Much the Same Boat.  
 "If we didn't have to give back any change, think of the money we merchants would make." "We all have our troubles," said the magazine publisher. "Sometimes it frets me to have to print any reading matter, but I s'pose it must be done."—Kansas City Journal.  
**PLEAS CURED IN 6 TO 14 DAYS.**  
 Your druggist will refund money if PLEAS OINTMENT fails to cure any case of Itching, Blind, Bleeding or Protruding Eyes in 6 to 14 days. 10c.

**Desperate Coughs**  
 Dangerous coughs. Extremely perilous coughs. Coughs that rasp and tear the throat and lungs. Coughs that shake the whole body. You need a regular medicine, a doctor's medicine, for such a cough. Ask your doctor about Ayer's Cherry Pectoral.  
 We publish our formulas. We banish alcohol from our medicines. We urge you to consult your doctor.  
**Ayer's**  
 Any good doctor will tell you that a medicine like Ayer's Cherry Pectoral cannot do its best work if the bowels are constipated. Ask your doctor if he knows anything better than Ayer's Pills for correcting this sluggishness of the liver.  
 —Made by the J. C. Ayer Co., Lowell, Mass.—

**A VALUABLE SUGGESTION**  
 Information of Importance to Everyone  
 A great deal of pain and suffering might be avoided if we had some knowledge of physiology and the care of the body, particularly those parts that do the most work and should always be kept strong and healthy.  
 In an interview with a prominent physician he states that people should pay more attention to their kidneys as they control the other organs to a remarkable degree and do a tremendous amount of work in removing the poisons and waste matter from the system by filtering the blood.  
 During the winter months especially, when we live an indoor life, the kidneys should receive some assistance when needed, as we take less exercise, drink less water and often eat more rich, heavy food, thereby forcing the kidneys to do more work than Nature intended. Evidence of kidney trouble, such as lame back, inability to hold urine, smarting or burning, brick-dust or sediment, shallow complexion, rheumatism, may be weak or irregular heart action, warns you that your kidneys require help immediately to avoid more serious trouble.  
 An herbal medicine containing no minerals or opiates has the most healing influence. An ideal herbal compound that has had remarkable success as a kidney remedy is Dr. Kilmer's Swamp-Root.  
 You may receive a sample bottle of Swamp-Root by mail, absolutely free. Address Dr. Kilmer & Co., Binghamton, N. Y., and mention this paper.

Herodotus tells us, in the first book of his history, that from the age of five to that of twenty, the ancients instructed their children only on three things, namely: to manage a horse, to shoot dexterously with their bows, and to speak the truth. The study of truth is perpetually joined with virtue; there is no virtue which does not derive its original from truth, just as there is no vice which does not spring from a lie.

**Painless Dentistry**  
 Is our pride—our hobby—our study for years and now our success, and ours is the best painless work to be found anywhere, no matter how much you pay. Compare our Prices.
