GRESHAM AND VICINITY

RESUME OF THE WEEK'S DOINGS IN AND AROUND THE CITY

Mrs. Rose Metzger made a trip to Portland Thursday.

Conrad Metzger is recovering from an attack of tonsillitis.

Mrs. Perry Thornton, of Granite, Ore., has been visiting her parents, Mr. and Mrs. A. H. Gould.

Mrs. Davidson had the misfortune to fall while cleaning the Baptist church this week and broke a rib.

The infant daughter of Mr. and Mrs. C. S. Smith fell off of the porch and broke a limb last Monday.

Mrs. Lola Spath has quit as a substitute letter carrier, leaving only one substitute in the service here.

Miss Jennie Patenaude, of Chippewa Falls, Wis., arrived last week to spend the summer visiting relatives.

Work on the race track at the fairgrounds will be begun next week and rushed through until finished.

Chas. Merrill has been sent to Medford again by the Packard Auto Co. He will go from there into California by auto.

Mrs. E. C. Lindsey accompanied by Miss Bulkeley will go to Warren, Ore., Sunday to visit Mrs. Lindsey's daughter, Mrs. O. Erickson.

The Mount Hood track will be connected with the O.-W. R. & N. at Montavilla this week, when it will be possible for cars to run to the Union depot.

The many friends of Wilbur Thompson will be glad to know that he is slowly improving from the attack of pneumonia which he has been suffering from.

Dr. Thompson has rented his garage to the Y. M. C. A. of Portland and they will open up for business in the near future. Their master mechanic will have charge of it.

The Queen Esther Circle was entertained by Miss Caryn Wirtz last Tuesday evening. After the business was finished the time was pleasantly spent with music and refreshments.

Miss Berdine Merrill has been elected to teach in the Thompson school in Portland for next year. Miss Merrill has taught in the above school for a number of years and given fine satisfaction.

The pipe line trench will be finished through the city today, and laying of pipe is following closely. The trench is also finished at Kelly creek and it begins to look like the end is in sight within a few weeks.

In the morning of Sunday June 18th there will be no preaching services in the M. E. Church but will be a Children's day program rendered by the Sunday school. In the evening the choir will give a praise service.

An entertainment and dance will be given by the commercial club next Thursday evening for members, only, with their families and a few invited guests. Invitations are being issued by members to those they wish to be present.

Miss Pearl Fleming has returned from Chelan, Wash., where she had gone expecting to spend the summer with her grandparents, Mr. and Mrs. Dan Mathews, but it was so warm there that the change of climate was not much benefit to her.

Harry Moll was held up by a lone highwayman near the 9-mile post on Sunday morning last and relieved of seven dollars. He was driving home early, after the dance at Rockwood, and was compelled to stop at the muzzle of a revolver.

Henry Coons, of Troutdale, one of the old-timers of Eastern Multnomah, is confined to his bed with no prospect of ever rising again. He has been ailing for several months, and with age and feeble recuperative powers there is said to be no hope of his recovery.

P. A. Dally, one of the best known citizens of Gresham, is confined to his bed at the home of George W. Kenney. He was taken down last week after a slight exertion of work in the garden and has been unable to get out since. He has been ailing for several months, but was considered better until the present relapse.

Congressman A. W. Lafferty, of the Second Oregon District, has been allotted the following seeds by the Department of Agriculture for free distribution during 1912: 20,000 packages vegetable seeds, 2,000 packages flower seeds. All persons desirous of obtaining assortments of these selected seeds are requested to write to Congressman Lafferty at once, stating their desires. Orders will be carefully listed and the seeds sent out in ample time for the planting season next spring. Address all communications, Hon. A. W. Lafferty, M. C. Washington, D. C.

A Dreadful Wound
from a knife, gun, tin can, rusty nail, fireworks, or of any other nature, demands prompt treatment with Bucklen's Arnica Salve to prevent blood poison or gangrene. Its the quickest, surest healer for all such wounds as also for Burns, Boils, Sores, Skin Eruptions, Eczema, Chapped Hands, Corns or Piles. 25c at Gresham druggists.

PROTECTING THE GARDEN

Oregon Agricultural College, Corvallis, Ore., May 27. Just what to use to kill the bugs and worms which annoy the gardener of vegetable and small fruit tracts at this time of year, is told in a new bulletin of the Oregon Agricultural College which will soon be issued from the college press.

Plant lice, aphids, such as the cucumber aphid, cabbage, aphid, lettuce aphid, strawberry aphid, rose aphid and others, often become very troublesome in the garden on various plants, and some of them are extremely hard to control, "says H. F. Wilson, entomologist, who is author of the work." Black Leaf, Black Leaf 40, or Kerosene Emulsion, applied at any time when the aphids become troublesome, or before the leaves curl, is effective.

For worms on cabbage and cauliflower Paris green or arsenate of lead should be used. For cut-worms on onions, a bran-arsenic mash or a Paris green dry bait.

For the striped cucumber beetle, the plants should be dusted with Paris green or sprayed with arsenate of lead. It is well to plant some early squash for trap plants, and when the beetles are feeding on them, dust heavily with Paris green.

For worms on the leaves of currant bushes, one should spray with arsenate of lead. For fruit worms, destroy the infested fruit and allow the poultry the run of the bushes when the infested fruit is falling. For aphid apply an aphid spray (a Black Leaf or emulsion) when the berries are just coming out. Gooseberries should be given the same treatment as currants.

For plant lice on hops, a thorough spraying should be given with Black Leaf or Kerosene Emulsion at the time the lice are on the plant, and the treatment may be repeated in June if necessary. For aphid on peas the treatment is the same.

To get rid of the striped cucumber beetle on muskmellons, the treatment is the same as on cucumber vines, and for flea-beetle on potato vines, a heavy strength spray of arsenate of lead whenever the beetles appear should be effective. Watermelon pests are treated as the muskmellons.

When there are cane maggots on the raspberry bushes, the only thing to do is to cut out the infested canes and burn them. For aphid and leaf-hoppers on rose bushes, a Kerosene emulsion or Black Leaf spray is good.

Strawberry plants infested with crown miners and root borers should be destroyed before May. For leaf rollers, the tops should be burned as soon as possible after the crop has been gathered. In addition it is well to spray the foliage thoroughly with arsenate of lead about the first of May, and repeat the treatment in about two weeks. For cut-worms a bran-arsenic mash or Paris green dry bait should be used.

When flea-beetles are found on sugar beets, the plants should be sprayed at once with arsenate of lead, and the treatment should be repeated two or three times at intervals of about two weeks or so.

If the beds of violets have red spiders or aphid, Black Leaf or kerosene emulsion should be used. In case one treats for red spider with the kerosene, the under side of the leaf must be sprayed, to be effective.

MAKE YOUR GIRL HAPPY

If it is at all possible, equip your house with modern conveniences. A house that is heated evenly by some good system is cared for more easily. By all means, have the water piped into the house, and if possible have a bathroom. Provide some of the modern, labor-saving devices in the kitchen and bright new utensils. Every girl enjoys working with the best equipment.

Girls will be much more contented with farm life if they have some conveyance that they can use whenever they choose. Let a girl have a horse and buggy or a pony and saddle and plan your work so that she will have time to use them. Loneliness is the most frequent complaint made against country life, so let the girls have an outing once in a while. A trip to the city or a visit with a friend will help to content any girl.

Neighborhood clubs will do much to brighten the life of the girl on the farm. At the meetings topics of interest to the girls can be discussed. Some line of study can be taken up by the members if desired. Once in a while, an evening meeting to which their boy friends are invited will add to the enjoyment.

Do not neglect the girl's education. In many farm homes the children are kept at home from school upon the slightest pretext. Then the rural schools need attention. Better equipped buildings and better prepared teachers are needed. Teachers' salaries must be increased to obtain the best ones. A school should represent the community that supports it. The studies should include agriculture for the boys and home economics for the girls.

After a girl is through country schools, if possible she should be sent away to

school, preferably where she can study domestic science.

Good reading material should be furnished—magazines, books, and newspapers. When you add a telephone to the list of things that the farmer's family can have there is no need of isolation in country life.

All girls like pretty clothes. A great deal of the discontent with farm life is due to the ridicule to which rural people are subjected.—Industrialist.

Cut clover hay when about half the blossoms are brown; cut timothy just as the bloom is falling. Curing clover: Cut it as soon as the dew is off in the morning. At noon shake out the bunches, rake into windrows before evening dews get on it, and let it lie until next day. Next day shake out the hay as soon as the dew is off. You ought to be ready to haul, on a hot day, by eleven o'clock, or certainly after dinner. It spoils clover hay to get too dry. It should never be put into the barn when wet with rain or dew, but a little sap won't hurt it. Curing timothy: If the crop is not too heavy and rank, cut as soon as the dew is off, let it cure a few hours, rake into windrows, and haul to the barn the same day. If crop is rank, cut it in the afternoon; it will wilt some during the night and the dew will not hurt it. Next day's sun will dry it in a few hours, when it can be raked into windrows; haul it to the barn in the early afternoon.—From June Farm Journal.

The uniform success that has attended the use of Chamberlain's Colic, Cholera and Diarrhoea Remedy has made it a favorite everywhere. It can always be depended upon. For sale by all druggists.

There is one medicine that every family should be provided with and especially during the summer months; viz., Chamberlain's Colic, Cholera and Diarrhoea Remedy. It is almost certain to be needed. It costs but a quarter. Can you afford to be without it? For sale by all druggists.
