

OREGON NEWS NOTES OF GENERAL INTEREST

Events Occurring Throughout
the State During the Past
Week.

Mine Will be Inspected

Medford.—Another inspection of the Blue Ledge mine, 40 miles from Medford, is being planned by Medford citizens, preparatory to taking definite action regarding the construction of a railroad to the mining camp. If this second inspection results as favorably as the first \$75,000 will be subscribed by Medford citizens, and construction on the road will be started from Jacksonville.

Albany to Clean Yards

Albany.—Mayor Gilbert has designated Saturday, April 20, as "Cleaning day" in Albany, and on that date the residents of this city will vie with one another in improving the general appearance of their lawns and yards by removing therefrom all rubbish and other material that would serve to blacken Albany's reputation as a "spotless town."

TO ELIMINATE RED TAPE

State Executive is Planning Change
in Prison Control.

Salem.—Governor West has announced that he is heartily in favor of placing the control of the state penitentiary in the hands of the state board, where the control of all other state institutions now reposes and that he is engaged in preparing a bill to be introduced in the next legislature which will bring this change into effect.

The governor said the bill would provide for general revision of laws governing state institutions and would cut the institutions loose from much of the red tape that now hinders the state board from bringing them up to the highest state of efficiency.

The bill Governor West is preparing, if enacted into law, will provide for co-operation between the various institutions that is impossible under the present laws. It will permit the exchange of commodities among institutions and thus give opportunity for great savings to the state.

Sutherland Plans Factory.

Sutherland.—At a meeting of the commercial club sufficient capital was pledged to insure establishing a canning factory here during the present season. A commodious building will be erected and equipped with modern machinery in time to handle this season's fruit and vegetable crop.

20 Pupils Take Tumble.

Klamath Falls.—Twenty pupils of the Riverside school, while returning to their homes, fell from the old bridge across Link river and nearly every one was injured. Five narrowly escaped being drowned, but were rescued by gardeners working nearby.

POUJADE MODEL HATCHERY

Warden Finley Planning to Enlarge
and Improve State Plant.

Eugene.—To make the state fish hatchery on the McKenzie river at Poujade, the principal trout hatchery of the state, is the plan of State Game Warden Finley and Master Fish Warden R. E. Clanton, who spent several days in Eugene in conference over the details of the work at the hatchery. M. J. Ryckman, in charge of the hatchery, has his plans well along and is now engaged in taking trout spawn for hatching.

Poujade hatchery is to be a model plant, situated in a beautiful spot on the picturesque McKenzie. Workmen have completed 500 feet of the 4000 feet of flume required to bring water from Granite Creek to the hatchery. Back of the hatchery building, which will be 120 or 130 feet long, there will be a large number of ponds for stock trout, to be kept from year to year for spawning. On a slightly higher bench will be nursery pools for young fish, from which the supply will be drawn for stocking the streams of western Oregon.

Autos Oust Weak Bridge

Hood River.—Because of the introduction of automobile trucks into the valley for freighting, County Commissioner O. H. Rhoades announces that the county court will replace the wooden culverts of the highways with substantial steel structures.

Collision at Goble

Rainier.—The Portland-Astoria passenger train was wrecked at Goble when it ran into the rear end of a freight train, bound for Astoria. The engine of the passenger train and the caboose of the freight were smashed. No one was hurt.

Union High School Wins

Junction City.—The vote taken on forming a union high school district resulted in a majority of 163 in favor of the district.

President Taft--On Trial In Oregon Friday

Old Time London Ruffians.

At the beginning of the eighteenth century a number of ruffianly young men of the higher classes—called by Swift "a race of rakes that play the devil about the town every night"—known as "Mohocks," infested London, sallying out drunk into the streets, carrying short clubs loaded with lead at both ends and perpetrating shameful cruelties upon peaceable passersby, wantonly wounding and disfiguring the men and subjecting all alike to atrocious insults. Lecky says that matrons inclosed in barrels were rolled down the steep and stony Snow Hill. Watchmen were unmercifully beaten, and their noses were slit. Coaches and chairs were overturned on rubbish heaps, and country gentlemen visiting the theaters had to be accompanied by their armed retainers as if in time of war.—Pearson's Weekly.

About Temperature.

The best authorities on the science of meteorology tell us that without the various changes in the temperature there would be a perfect calm at all times in all parts of the globe. A uniform and unvarying barometric pressure would everywhere prevail, and there would be no changes of seasons, no evaporation or condensation, no clouds and no rain. In short, without changes of temperature which we sometimes think so uncomfortable the atmosphere would soon become poisonous, stagnant and incapable of sustaining human life.

His Ailment.

Tommy's Aunt—Won't you have another piece of cake, Tommy?
Tommy (on a visit)—No, I thank you.
Tommy's Aunt—You seem to be suffering from loss of appetite.
Tommy—That ain't loss of appetite. What I'm sufferin' from is politeness.—Judge.

Too Serious.

While a great many persons probably take themselves too seriously, entertaining an altogether exaggerated opinion of their ability and worth, not many nowadays go to the extreme length of the German whom the English poet Coleridge met at Frankfurt. He always took off his hat when he ventured to speak of himself. Were this practice to become general what a number of people would be permanently bareheaded!

VOTE NUMBER 117 X

Harry C. McAllister for Sheriff. Clean, upright, strong, efficient. Pd. Adv.

An Accomplishment.

"She's awfully proud of her husband."
"That so? Has he had his salary raised?"
"Oh, it isn't that. He cannot only wash the dishes, but he can put everything away in its proper place."—Detroit Free Press.

Delicate Attention.

Mrs. Fitz-Bile—Of course I know you do not care for me. Why, you even forgot my birthday. Fitz-Bile—A bit of deliquency on my part, madam. I did not fail to remember that you had come to the point where your birthday ought to be forgotten.—London Tit-Bits.

Looking Forward.

"Progress is becoming extremely rapid."
"Yes, indeed. In the year 3000 or so lightning will have to get a move on if it wants to be considered fast."

Candid.

He—Yes, whenever I see myself in the mirror I feel that I am much better looking than the average man. Do you call this conceit? His Friend—No, I call it distorted vision.

The Worm Turned.

"Do you shave yourself all the time?" asked the barber.
"No, I stop occasionally for meals." said Jimpan savagely.

To make knowledge valuable you must have the cheerfulness of wisdom.—Emerson.

Olson is a safe candidate for Judge in Dept. No. 4. Vote 57 X

The Real "Slave of the Dollar."
The "slave of the dollar" is the man who lives up to or beyond his income. Peace of mind is something he can never have unless he is a fool or a rogue, and then it is the kind that is not worth having.—Exchange.

His Hard Luck.

Benevolent Old Lady to one of the unemployed—Poor man! What have you done to your hand? Unemployed—Broke my knuckles, mum, knockin' at people's doors askin' for work.

Anger ventilated often hurries toward forgiveness; anger concealed often hardens into revenge.—Bulwer.

A Mediterranean Phenomenon.

Mirages are common in many parts of the world, such phenomena being familiar to travelers in the tropics as well as in the arctic regions and on deserts just the same as upon the waters of lakes, seas and oceans. The most peculiar of the whole list of atmospheric illusions is that species of mirage called the fata morgana, which is peculiar to that portion of the Mediterranean sea which lies off the coast of Calabria between Italy and Sicily. Exhibitions of the fata morgana are the most fantastic spectacles imaginable. If a city is presented to view some of the buildings are seen standing in their natural positions, while those adjoining may be standing at every conceivable angle or are completely inverted. The morgana has been known since before the time of Christ and has always been viewed with awe by superstitious people.
