The location for the dam is finally determined. It will be over a mile above camp five. Probably two-thirds of the cement is nearly worthless as it has lain in the cement house for nearly a year. The dam being further up the river will not have to be built so high by nearly 30 feet it is estimated. A large force of men will be put on as soon as the new road is made and a new lot of cement brought over from Bull Run by immense auto trucks.
