## Country Correspondence

### PLEASANT VALLEY

(Too late for last week.)

Miss Leona Kesterson, who formerly resided at this place, but now of Montavilla, was visiting with her young friends last Sunday.

Miss Grace Olson spent Sunday at home with her parents Mr. and Mrs. A. B. Olson.

W. L. Rhodes has purchased a half interest in the general merchandise store of W. N. Moore. Mr. Rhodes is an enterprising and popular young man and his many friends wish him every success in his new venture.

The Booster club held an enthusiastic meeting at the library room last Thursday night. A committee was appointed to take up the matter of securing electric lights for Pleasant Valley including Jenne and Wilson stations. It is to be hoped that they will meet with success in securing this improvement.

### LUSTED

Mr. John Lisk, who has been working for Ralph Neibauer for the past two years, had quite a serious accident last Thursday while he was splitting wood. A piece of steel flew from a new wedge and hit him in the eye. He was taken to the Good Samaritan Hospital where

the eye was removed and the piece of steel extracted from it, and it was found that it had destroyed the eye entirely. He has the sympathy of all his friends.

Irvin Neibauer returned to Portland after several days visit with his parents. Max Davies shipped a carload of wood to Montavilla last week.

P. B. Eder made a business trip to Montavilla last Friday.

### CHERRYVILLE

St. Valentines Day to-morrow. This is the second week without any clouds or storms.

Old-timers say this has been the hardest winter in many years, still all manner of fruits, vegetables, and apples have remained unfrozen in outhouses here. Back East they would hardly call it winter at all.

Steelhead salmon are now running but they are not able to get up past the dam at Camp Six as no fish ladder has been put in there. The law requires it shall be put on but corporation like the P. R. L. & P. Co. is superior to all law. Senator Dimick, last week at Salem, said "This organization was the meanest and most hoggish corporation that the people of Oregon ever permitted to exist in the state."  
Squatters on the so called R. R. land

received notice lately from headquarters of the Southern Pacific R. R. at San Francisco to send them \$10.00 a piece for rent at once or vacate immediately. Talk about a hold-up on a R. R. This is a "hold up" by a R. R. Knowing that they will lose out in the spring at the court of last resort they are trying to frighten these poor squatters out of a few paltry dollars. To such dirty schemes this great company degrades itself and loses what few friends it has in the state. Having always had its selfish, greedy, lawless way by buying up big lawyers and legislators, they suppose it can be done always.

Some very valuable dogs have been poisoned in this neighborhood out of spite and pure malice. It is a very evil, low, and degraded nature that will vent their spite and ugly devilish dispositions on poor dumb brutes.

Two young U. S. sailors on the protected cruiser, Chattanooga, at Bremerton navy yard were here last week visiting with their mother and step-father, Mr. and Mrs. Glem Rugh.

A party at Vancouver has a plan for distilling turpentine, creosote, acetic acid and resin from stumps, wood, and

logs at an outlay of only \$40.00. The plant consists of a brick furnace and a retort, and a man can make from \$10 to \$12 in two days. The first day the wood logs and stumps are put in proper shape and the next day they are cooked. Charcoal is also one of the by-products. In this way a homesteader can support himself and family while clearing up his land.

### DOVER

Mr. and Mrs. Roberts were visiting Mr. Evans Sunday.

Mrs. Reid left Sunday for several days visiting in Portland.

Mr. and Mrs. Keith, Lula and Rilda Roberts, Willie and Ervin Uptgrave, and Holister Shellen were visiting Jos. DeShazer Sunday.

Mr. and Mrs. Kliensmith spent several days last week in Oregon City and Beaver Creek.

Mrs. Anna Cooper made a business trip to Portland the past week.

Birch Roberts and Alice Berghouse were visiting friends in Kelso Sunday.

Mr. Morrison is visiting his daughter in Sherwood at present.

Miss Alice Berghouse is visiting with Miss Iva Reid during the absence of Mrs. Reid.

Mr. Hoffman was buying beef cattle in Dover Wednesday and Thursday.  
Mr. Seward was on the sick list Sunday.

Mrs. Uptgrave is visiting in Portland this week.

## LOCAL AND PERSONAL

Mrs. F. McArthur visited Mrs. P. Parker last Sunday.

Mr. E. Alpanalp has been very sick the past week but is a little better.

Mrs. J. T. Solomon visited her daughter, Mrs. L. Leader, of Portland last Friday.

Mrs. Della Porter and son, from Arleta, were visitors at the home of Mrs. C. C. Woodworth last Monday.

Mr. G. Solomon from Springfield, Oregon, visited his parents, Mr. and Mrs. F. B. Solomon last week.

Mr. Schille, who lives on 5th. avenue and Lester street, has been bed fast with a very bad attack of the grip.

Mrs. Ada Elliot left last Tuesday for her home in Corvallis. She has been a visitor at the home of Mrs. C. C. Woodworth for some time.

Mr. Robert McLennan, was a visitor at the home of Mrs. A. J. Boland, who lives on Sixth avenue and Rose street, Tuesday afternoon.

The Sacred concert given by the Cathedral choir, of Portland, at St. Peters church on Sunday evening, Feb. 2nd., was a grand success and highly recommended by all who attended.

## KIND OF HOG THAT IS BEST TO RAISE

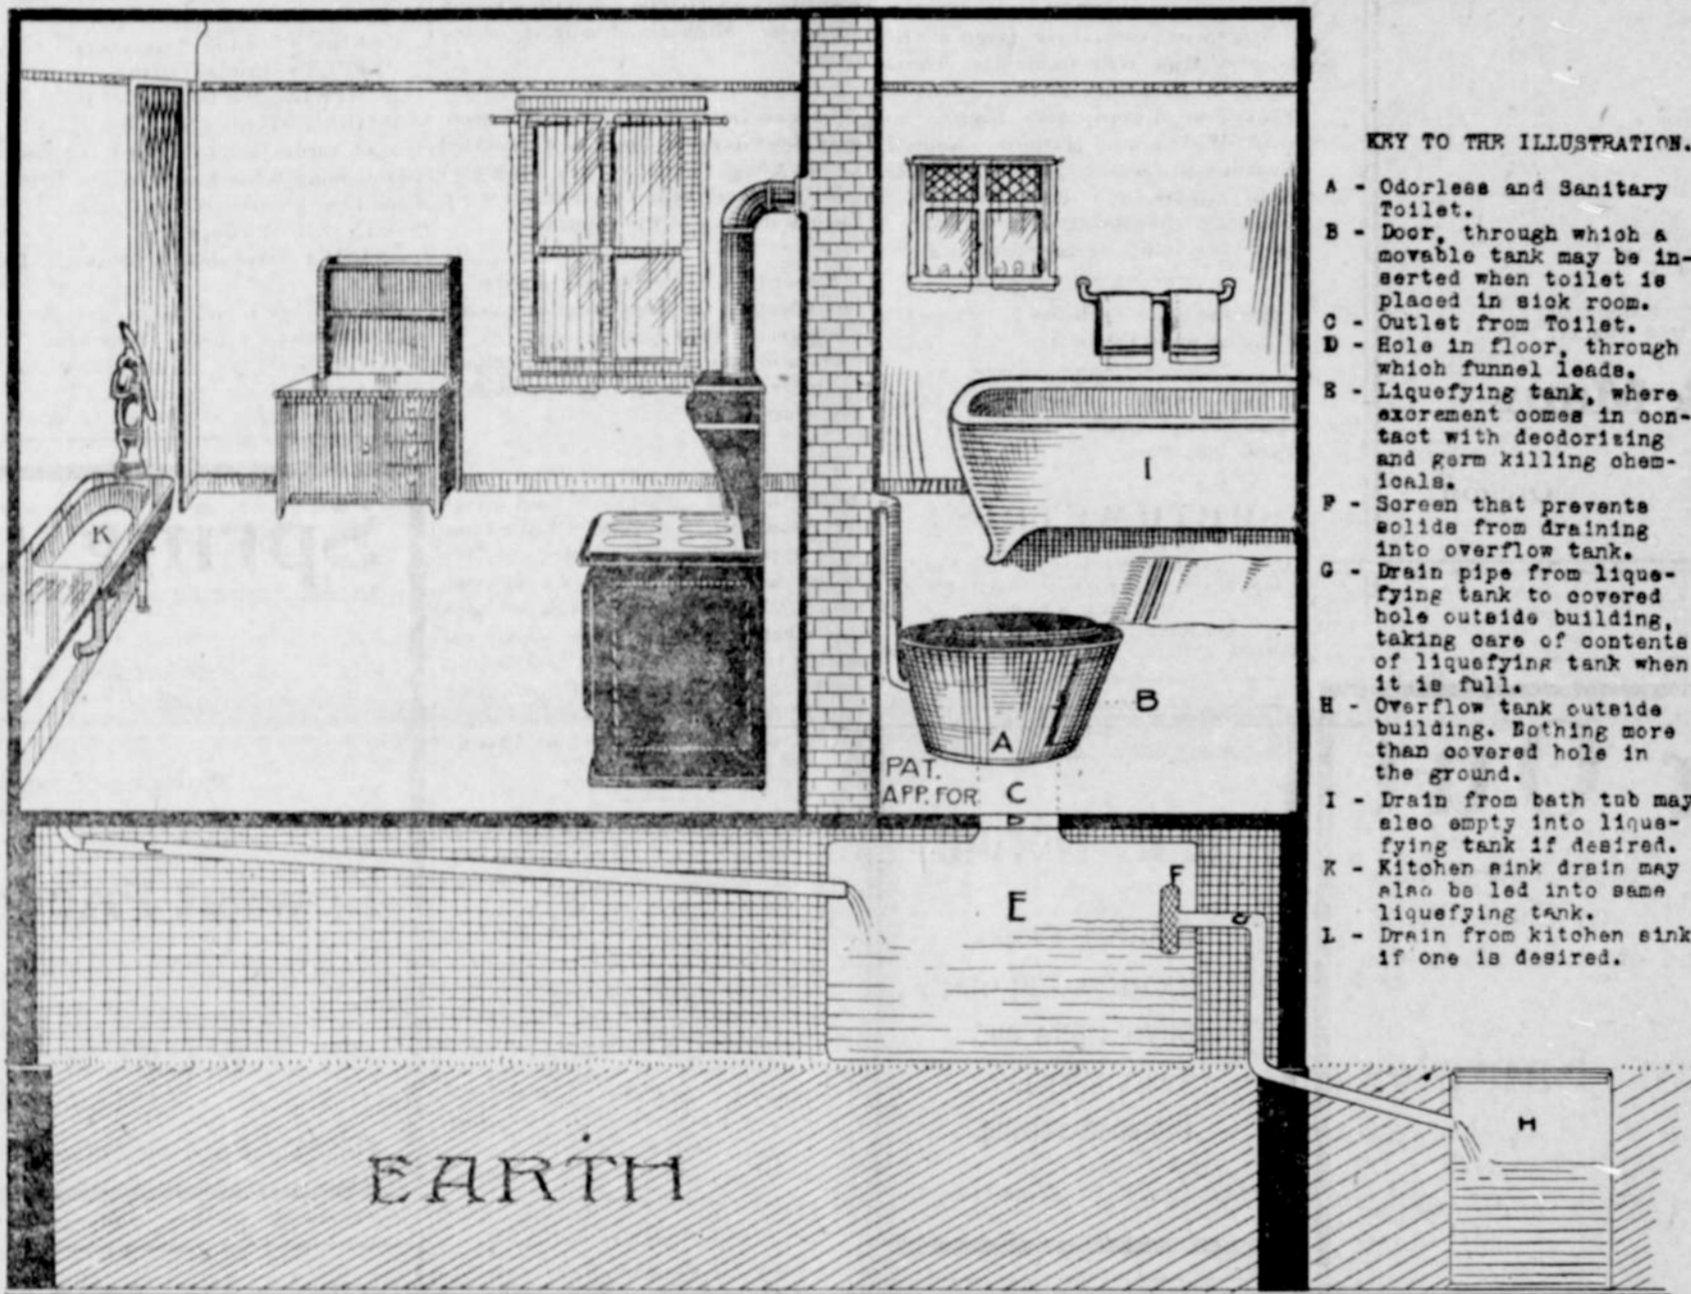

The demand for pork is the foundation of the hog breeder's business, and as the demand is constantly increasing the foundation on which the swine industry is based becomes more solid. This condition promises well for hog raisers, and it should lead many to engage in the business who are not now doing so.

We must have pork, lard, bacon and hams and the hog is the only animal that can supply them. We just must have them, no substitutes will answer, and we must have them of the kind the demand calls for and the hog can meet these requirements best quickest, and at the least cost to the hog raiser is the most profitable hog to raise.

It has been claimed by some that the Poland-China is just this kind of a hog, while others claim that the proper hog is the Duroc, the Tamworth, the Hampshire, the Yorkshire, the Chester, the Berkshire or the Essex, just as their partiality suggests. They are all good hogs and no mistake will be made in raising any of them.

The breeder is at all times on the lookout for an improvement in any one of the essentials, so that the pork raiser or farmer breeder can make more money out of the hog business, by the breeder supplying him with a better animal to do it with. It needs a healthy hog, a strong constitution, a good bone to carry weight, an easy feeder, one that has good digestion and assimilation, a quick grower, and one that will give the parties good proportion of the parts that sell the highest in the meat line.

We want one that is prolific, for the sow with three pigs isn't in it with the one that produces from eight to ten, on the same capital invested. It would be the same as a note drawing 3 per cent. Anybody can see the real advantages of the prolific sow. It is the breeder's occupation to improve the breed, not only maintain but advance the progress—this is the watchword.

### KEY TO THE ILLUSTRATION.

- A - Odorless and Sanitary Toilet.
- B - Door, through which a movable tank may be inserted when toilet is placed in sick room.
- C - Outlet from Toilet.
- D - Hole in floor, through which funnel leads.
- E - Liquefying tank, where excrement comes in contact with deodorizing and germ killing chemicals.
- F - Screen that prevents solids from draining into overflow tank.
- G - Drain pipe from liquefying tank to covered hole outside building, taking care of contents of liquefying tank when it is full.
- H - Overflow tank outside building. Nothing more than covered hole in the ground.
- I - Drain from bath tub may also empty into liquefying tank if desired.
- K - Kitchen sink drain may also be led into same liquefying tank.
- L - Drain from kitchen sink, if one is desired.

## SOMETHING NEW

The Only Real Sanitary and Odorless Toilet

Empty But Once Every 2 to 5 Years

The greatest invention of the age is our NEW TOILET SYSTEM that kills all of the DISEASE GERMS AND ODORS, and is installed in the home WITHOUT SEWER, WATER SYSTEM OR PLUMBING, in a few minutes time by anyone without experience. And think of it! Empty Only Once in Several Years, and then it can be done in a few minutes time by slicing process and without removing vault.

**It Is Convertible and Portable.** You can have two closets in one. You can remove the funnel and insert the extra tank in a moment's time, pick the toilet up and carry it into the sick room, take it camping with you or move it wherever you like. ABSOLUTELY GUARANTEED in every way. Toilet made of sheet steel body, castings on bottom and top. Beautiful hardwood seat. Will last 100 years. Cannot be broken. Cannot get out of order. No expensive plumbing bills. No freezing of pipes. Costs less than one cent a day for operation. You can't beat it. You can't get more for your money anywhere. You can't get as much protection for your family in any other way. All DISEASE GERMS breed and thrive in the human excrement. One little germ, 1-12000 of an inch in length will in a few days breed a family that can kill a powerful man; 400,000 cases of Typhoid annually in the United States; 95 per cent caused by the old fashioned unsanitary privies. And not only Typhoid, but hundreds of other diseases and sicknesses are due to this very condition. OUR CHEMICAL KILLS THE GERMS, and kills them quick. Therefore the dangers are removed. It also KILLS ALL THE ODORS, which no other toilet does.

**Who Is So Small Today** That he would let a few dollars stand between himself and the health, comfort and convenience of his family? What does an investment of \$25 mean when it will give you a lifetime of service? Or if you can get our new and improved modern system for \$100 to \$300 less than it would cost you to install a less sanitary system. If you need a sanitary toilet, you need it today. Remember, it is the **Fly during the Summer; The Exposure during the Winter; Seepage from Privy to Well all the Year.**

Don't wait another day. It is a matter of protection. You insure your buildings. Now insure your family's health and save those doctor bills. You can replace the buildings. But you cannot replace your loved ones.

### What We Give You

This system complete includes the following articles: One indestructible metal toilet, one tank, one funnel, five joints pipe, one elbow, one liquifying mesh, one roll toilet paper, one gallon chemical.

### Full Instructions With Each Shipment

You will have no trouble installing this toilet. Anyone can do it in an hour's time. A common barrel may be used as a vault or we will furnish you a special galvanized vault for \$6.50 extra. Either one will work perfectly satisfactory.

### Buy On Your Own Terms

We will sell you this system as described above for \$25.00 cash, or if you prefer to buy it on time, we will sell on easy terms, requiring only \$7.50 cash with the order, and balance payable \$5.00 per month until \$27.50 has been paid. On account of the low price asked and the cost of manufacture, we are obliged to add \$2.50 to the cash cost whenever any of our patrons desires to take advantage of monthly payments.
