Pigeons as Dispatch Carriers. During the siege of Paris carrier pigeons proved of great practical use in carrying messages. These were photographed microscopically on pellicles of collodion which were inclosed in goose quills attached to a silk thread in the upper part of the tail feathers. Now there is a military pigeon system controlled by the French ministry of war.

FEED BROKEN-WINDED HORSE

Principle to Be Recognized is to Feed Little and Often-Care of Stall is important,

Pearson-Page Co., Portland By R. G. WEATHERSTONE. For running horses green food cannot be used. It makes the animals soft, but it may be fed to advantage to winded horses of slow draft. When that is done it should be given in a fresh succulent state, rye, vetches, etc., being fed before the seed begins to ripen, else it loses its digestive qualities, and a few roots or carrots with dry grain make a good winter feed.

In fact the principle to be recognized is to feed little and often, to avoid long fasts, and if it is necessary to work immediately after feeding to go easily at first.

It is a good plan to keep a bucket of water in a corner of the manger so that it can be taken when desired, if dry food is given, and in this way seldom will excess be indulged in.

When succulent green food is given of course there is not the same need for water. A little tar in the water may be found beneficial and the If you want an incubator animals soon begin to take to it read-A ball made of tar and tallow if there is any sign of distress.

> Cool, well ventilated stalls or boxes as possible.

Long spells of rest in the stable followed by excessive spells of work only serves to aggravate the complaint. Good "hard" condition is what is wanted and this can only be had with frequent exercise or when the horse is idle a free run in a field. Above all, constipation should be

avoided and the digestive organs carefully watched. Such precautions may not cure but they greatly reduce the original cause of the ailment and modify the trouble. Ordinarily medicines are not of much use but where there is distress from excessive work, an overloaded stomach, constipation, a hot stable, or

be given to obtain temporary relief. Cultivate Bellef.

close, muggy weather, a sedative may

Want of faith speedily kills the youthfulness in us. The very freshness of the fountain of youth is belief. When you feel you have no more confidence in yourself, no more trust in others, no more credence in the great moral forces of good in the world, it means that your spiritual teeth are loose and dropping, your spiritual hands weak and shaky.

Persevere Always.

No talent will enable us to do any work worth while without drudgery, but no childishness must tempt us to give it up because it is hard. No work can be well done by any one who is complishment. Perseverance is not only the price of success, but the price

What Is Coryza?

Coryza is a medical term. It means chronic catarrh of the nose. It began with catching cold, producing a slight nasal catarrh. Then catching cold again. Finally the catarrh is continuous. Afterwards brown scabs form in the nose, the breath is fetid, breathing through the nose more or less obstructed. Then the victim has coryza.

In taking Peruna for coryza a table-spoonful should be held in the mouth, and then allowed to slowly trickle down the throat, occasionally breathing out through the nose, so that the fumes of Peruna will permeate all through the throat and posterior nares. Peruna has cured a multitude of this sort of cases.

Snuffing warm salt water, a teaspoonful to the pint, is sometimes necessary to thoroughly clean out the nose, which should be done twice a day, in the morn-

ing and in the evening. But it is the Peruna that should be mainly relied upon for a permanent cure. People with coryza are generally poor sleepers, digestion is poor, appetite
is poor. Peruna will correct all these
difficulties.

Antitoge for parpolic Acid.

The best antidote for carbolic acid poisoning is flour and water. If nothing better is at hand drink a little plain water to weaken the acid, or still better, drink soapsuds if obtain-

able. If flour is not handy, use magnesia, chalk, soda, lime, whiting or new soap, or knock a piece of plaster from the wall, scrape off the white outside coat of lime, pound it fine, mix with milk or water, and drink at once. Follow with warm water or flaxseed tea. Of course, call a physician at the earliest possible mo-

SPOHN MEDICAL CO., Chemists, Goshen, Ind.

OLDEST TREE IS ON COS

It Measures 30 Feet in Circumference and is More Than 2,000

Years Old. The tallest trees in the world are the Australian eucalypti, which attain an altitude of 480 feet. The biggest are the mammoth trees of California, some of which are 276 to 373 feet in tics. They coax the height, and 108 feet in circumference at the base. From measurements of the rings it is believed that certain of these trees are from 2,000 to 2,500 years old. The oldest tree in the

> several thousand years old, but just how many no one has dared to say. The tree is carefully preserved by a wall of masonry around it, and the very beneficial to me, for now I am well trunk is thirty feet in circumference. But there are parts of trees in the form of useful timber which are even older, probably, than any on the

world is said to exist on the island of

Cos off the coast of Asia Minor. It is

stump. Beams in old buildings are preserved today, which are known to be over a thousand years old. Piles driven by the Romans prior to the Christian era are perfectly sound today, and it is known that they have been immersed in water for upward of two thousand years.

Some woods have remarkably dur able properties when immersed in water. They decay rapidly on the stump, many rotting in from five to ten years, but when immersed in water they last longer than iron or steel. An effort has been made by our government to preserve woods indefinitely by treating them with oils and tar products. Already telegraph poles and railway ties have had their average life extended from five to ten years by this process.-Harper's.

No thoughtful person uses liquid blue. It's a pinch of blue in a large bottle of water. Ask for Red Cross Ball Blue, the blue that's all blue.

Household Hint.

Straw matting suitcases and shopping bags can be very much improved in looks and usefulness by a coat of cheap wagon varnish, which makes them waterproof. A good wetting will generally spoil them, but the varnish causes them to shed water like a duck. This should be done once a year.

Mothers will find Mrs. Winslow's Soothing Syrup ti e best remedy to use for their children furing the teething period.

To remove Stains.

Inkstains on silver or plated arround than the picture; stain the ticles may be removed with a paste boards with dark oak stain about two made of chloride of lime and water. inches round the edge; varnish them, This should be left on for a little while and then washed off in warm water.

Her Intent.

"That dressmaker's model always wears a long wrap when she goes out." "Hers is evidently a sinister motive. She wants to cloak her de signs.'
