contains over 29000 acres.

Last week, Thursday, while Mr. Brace
and his grandson, Everett Alford were
out hunting on the Sisters ranch, four
miles east of Sandy, they were surprised
by a large cougar running across the
trail in front of them. The gun that
Mr. Brace carried contained cartridges
loaded with bird shot, and he did not
dare to shoot with that but endeavored
to substitute cartridges loaded with
buck shot, but by the time the change
was made the cougar had disappeared.
That same evening while the Sommer-
felt children were returning home rath-
er late, they heard a strange outcry in
the brush, but supposed it was some
neighbor children trying to frighten
them. It was doubtless the cougar.

President Wilson says "everything the
people wear, and put in their stomachs
must be made cheap." Some sense and
justice in this kind of talk. Now instead
of making the poor people pay the lar-
ger part of the expenses of running the
government, the rich who are more able

to contribute are taxed according to
their incomes in the income tax about
to be imposed. Equal and exact justice
to all is the Democratic doctrine and it
a good sensible doctrine at that.

the crowded condition. In addition to

character and charming personality.

John Brown, Gresham, Ore.

There has been a lot of nonsense
talked and believed about silage. It
has been claimed that it would cause
the mouths of cattle to become sore
so that they could not eat, especially
dry grain. It is also claimed and be-
lieved in some quarters that the acid
of silage is injurious to the teeth, and
also that it will give a flavor to milk,
all of which is absolutely nonsense.
Next to the alfalfa plant, silage is the
greatest boon to farmers of Kansas.
In the corn growing regions he is ab-
solutely sure of a good crop, whether
the corn plant matures its full quota
of ears or not.

The above items from the Kansas
Farmer will apply equally well to Ore-
gon. While it is generally consider-
ed that we have not a real good corn
country, there is seldom a year that
good corn for silage purposes can not
be grown. Kale is a good feed, but
there is no question but that many
more silos could be used to great ad-
vantage in our Oregon dairy opera-
tions.

tles it. No trouble. No more scours.
