The Best Light At The Lowest Cost

ELECTRIC LIGHT is the most suitable for homes, offices, shops and other places needing light. Electricity can be used in any quantity, large or small, thereby furnishing any required amount of light. Furthermore, electric lamps can be located in any place, thus affording any desired distribution of light.

No other lamps possess these qualifications, therefore it is not surprising that electric lamps are rapidly replacing all others in modern establishments.

Afterward Mrs. Wallace read a paper on a prophecy, and this paper gave most of the ladies present a compliment on what they would be eight years hence. A great change was predicted in Lents and vicinity. Orange Punch, sandwiches and wafers were served and a social hour spent.
