

**TO REMEDY SQUEAKY SHOES.**

Let the shoes stand over night in a dish containing a small quantity of olive oil, so that the soles will be saturated; this will also protect them from dampness; wipe very carefully on removing from the oil.

**Deafness Cannot Be Cured**

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedying, and that is by the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give one Hundred Dollars for any case of Deafness (caused by Catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

**CHERRYVILLE**

Let the eagle scream! This is the week we celebrate!

One hundred and thirty-seven years ago, our fathers conceived and brought forth a new nation with the Divinely inspired idea "that all men are born free and equal with certain unalienable rights." Not a few men mark you! Not a few kings, priests and nobles, but all men of whatsoever name, nation, kindred, or tongue. This idea was a long time coming and is still fought vigorously by the privileged classes. But it is here to stay.

The Rasche brothers of Portland, who are employed at the water department in the city were out over Sunday at the hotel and took active part in the hop given at the hotel Saturday night. These gentlemen are steady, reliable, trustworthy young men whom it is a pleasure to meet.

The District Attorney was out Sunday taking measurements at the cemetery to ascertain if a certain grave was outside the cemetery proper. He had been told that one grave had been fenced out and thrown out into a ploughed field. This he found was not true which he might have known was not the case from the source from which he got his information. If anyone pays much attention to nine tenths of the talk that is going on in this country they would soon become insane.

There is always a chance to start something with lawyers—and then by the same token—fat fees can be secured.

The Pacific States Telephone Company have secured the poles running through Cherryville and up into the mountains. They are already stringing two copper wires on them. Ten men are at work and will board at the hotel this week.

Joseph White, a full blooded Chipewa Indian has taken charge of the grounds at the Boyd ranch this summer. Mr. White lives on an island in Lake St. Clair that connects Lake Erie and Lake Huron. He has been Chief of his people over a 1000 in number for over twenty years. He is out here for his health.

Mrs. Scheuk and her daughter from Portland were out over Sunday visiting at Berdensteins and also looking over their ranch which is under the care of Sam Wiles.

Herbert Hussock, book-keeper for a Portland wholesale firm was out over Sunday at the hotel and returned back to his work Sunday night on his motorcycle. His wife will remain until after the Fourth.

Joe Wick, his mother, and two little sisters, went on a visit to Tacoma, Seattle and Port Angeles in Washington the first of the week. They will be gone possibly a fortnight.

If Jane Addams of Chicago, one of the most notable women living, could make such a grand success of the Hul-

House settlement in the heart of the city where human derelicts are cared for and helped to renew the struggle of life, why could not model villages be started in the country where there is an infinitely better chance to assist a "poor forlorn and shipwrecked brother" to brace up and be given an opportunity to get a decent living. Nor our cities are choked and congested with a struggling mass of humanity that do not even have pure air to breath let alone a sufficient amount of food to eat.

A. A. Loeb went to Eastern Oregon on business Thursday evening.

Albert Fox, of Walla Walla, enroute to Portland spent Friday night at the W. H. Reid home.

The musical and literary program at the grange hall was a great success. Each one who had part in the program did their part well. The social dance which followed was a merry affair. Prof. Zilm and Mrs. Pierce furnished the music.

**THE FLY.**

One pair of flies will produce about 1,000,000 flies in 100 days. The breeding place of the fly is in filth and rubbish. The manure pile and the out-house on the farm furnish breeding places for millions of flies through the summer. If possible banish the out-house and replace it with a toilet and a septic tank; if not convert into a dry earth closet and thus prevent the flies from breeding there. Then burn up all rubbish heaps and haul out manure to the fields. Flies do not travel more than from 100 to 200 feet or so. If cleanliness is observed about the house and dooryard they will not bother so much. Garbage cans, etc. should be coaled frequently and flies will leave them alone. A large fly trap over the garbage can will catch the little traitor. Screened porches and windows help keep him out of the house. Then swat the fly on every available occasion and your family will call you blessed.

**AUNT CHARLOTTE'S GINGER SNAPS.**

Boil one pint of New Orleans molasses. When cooled to lukewarm beat into it one egg and one teaspoon of butter and lard mixed and melted. Add two tablespoons ginger, a saltspoonful of salt, a teaspoonful of soda dissolved in a spoonful of warm water and flour to roll out easily. Roll thin, cut accurately, bake quickly and remove carefully from the pans.

A farm girl of 18, with a common school education, wants to go to the city to earn more spending money, but father and mother object.

1—What advice would you give girl?

2—What would you do if you were girl's father?

3—What would you say if you were girl's mother?—From Michigan Lecturers' Bulletin.

Who will send us the best answers to these questions?
