

# BEAVER STATE HERALD

Entered as Second Class Mail Matter at Lents, Oregon, August 25, 1911

Published Every Thursday at Lents, Ore., by the MT. SCOTT PUBLISHING CO.

H. A. DARNALL, EDITOR AND MANAGER.

Office Phone: Home 1111. Residence: Tabor 2813

The cordial treatment accorded to the young ladies of Lents by the committee and citizens of Astoria is a circumstance to be appreciated by all the people of our town. The experience was probably worth something to the girls and they will have reasons to remember it all their lives. Astoria is always an interesting town. Its historical associations appeal to the imagination of young people fresh from the history or literary classroom. But it is interesting for another reason. It is located at the outlet of one of the greatest river systems in America. It is a sea port in the truest sense of the word. Salt water is in evidence on all sides, especially the river side. The display of the fishing industries and the lumber trade has made the town famous, America over. It is well worth seeing. It will pay anyone to take the trip down the river to see the way that part of the country looks, anyway. But we should judge that the trip was a little too strenuous for girls. Especially the contest part of it. We hope the next contest will be a boys contest. A sort of junior fire men's contest, that will not endanger the girls in any way, and we doubt if the girls are improved by engaging in any such a contest, where muscle and strength have so large a part in succeeding. Then too, we question if girls can get any social or womanly improvement from participation in a contest where they so entirely become objects of public criticism or jest. It may be all right this time, but we suggest the other form of contest as superior and then it will naturally develop in the boys those qualities of local patriotism and pride which we all naturally admire.

Senator Harry Lane of this state is making a great reputation in the upper House at Washington for his fearless and outspoken words in behalf of a careful scrutiny of all appropriations of public money that comes within the purview of the Committees of which he is a member. It appears that it has been the custom for heads of departments to go before these several committees and demand a lump sum without itemizing what the various sums, were wanted for. This made a great commotion but Dr. Lane stood firm like he always does. The people of this state are to be congratulated for this able and fearless representative when they have the highest legislative today in the world.

### ADVANTAGE OF SILAGE.

The results of cooperative cow-testing in Minnesota during 1912 have been announced. One of the most remarkable comparisons was that between silage-fed herds and herds which received no silage.

The silage-fed herds which were tested for milk and butter fat production were 12 in number, and included 216 cows. The average net profit in the silage-fed herds was \$33.04 per cow.

There were 16 herds, with a total of 239 cows, which did not receive silage, and the net profit of these animals was \$22.98 per cow.

In round numbers, the cows receiving silage made a profit of slightly over \$10 each more than the cows which did not receive silage.

### SUBSTITUTE FOR BEESWAX.

My supply of beeswax was low and did not last until the ironing was done. The woman who was working for me did not seem to mind it the least bit; she merely poured some kerosene oil over a folded newspaper and used that instead of the wax, finishing the ironing with as much ease, it seemed to me, as though she had the wax.

### TELLS BEST METHOD OF FEEDING YOUNG CHICKS

A good quality of rolled oats is suggested as an excellent first feed for young chicks by the poultry husbandry department of the Oregon Agricultural College. Bread crumbs or stale bread soaked in milk and squeezed dry are also very good. Another good feed for the first few days is a raw egg mixed with bran and a little shorts or middlings, fed in a crumbly condition twice a day. Any of these may be fed twice a day with the addition of cracked wheat and cracked corn.

Until the chicks have learned to eat the food should be given on clean sand. After a couple of days the cracked wheat and corn should be fed in chaff so as to make the chicks scratch. The depth of the chaff should increase with the development of the chicks.

After the first week the brand and egg or bread and milk should be discontinued and in its place a mash of bran and shorts or bran and middlings with ground corn (about three parts bran to one of middlings, and one of corn) should be fed.

If the ground corn is too high priced, finely ground wheat may be used, and later finely ground oats with a pinch of salt and enough milk or water added to make a crumbly mixture.

As much as the chicks will clean up readily in an hour or less should be given once a day. The cracked grains in the chaff should be fed until the chicks are six weeks old when whole wheat may be given them. The soft food should not be left in the feeding troughs after the chicks have had all they will eat.

A dish of charcoal should be kept where the chicks can get at it all the time, and a small dish of dry middlings will provide a good cure for ordinary diarrhea.

When the feeding of the egg is discontinued beef scraps should be substituted in a box or hopper where the chicks can help themselves any time. The feeding should be planned to keep the chicks busy most of the day.

As much range as possible on fresh ground should be given and kept clean and free from mites.

### COWS AND FERTILITY.

Dairying affords the quickest means of building up the farm, as there is practically no soil exhaustion when butter fat constitutes the only dairy product sold.

A ton of butter fat, worth about \$700 at present market values, takes less than 50 per cent of plant food from the farm, while a ton of wheat, oats, alfalfa, or clover hay, worth from \$15 to \$30, will take from the farm plant food worth about \$8 for each ton sold.

Therefore, if the farmer expects to maintain the productivity of his farm he should give careful attention to livestock, especially the dairy cows.

### AUNT MARY'S PICKLED ONIONS

Use for this the tiny button onions. Peel and cover with hot strong brine. Let stand over night, reheat the brine and pour over again. The third morning, drain, make fresh brine, throw the onions in and boil four minutes. Take out, throw quickly in cold water and leave for six hours. Drain. To each gallon of white vinegar required to cover the onions allow one cupful sugar with fresh mixed spices and celery to season. Pour this scalding hot over the onions for two mornings in succession, then while boiling hot put in glass cans. Will be ready for use in two weeks or less and will keep indefinitely.

### A WELL-BRED DAIRY COW.

Will give about 8,000 pounds of milk in a year. Some exceptional cows are known to have given 16,000 pounds. The proof of the amount of the butter fat in such milk is in the testing.

### Rid Your Children of Worms

You can change fretful, ill-tempered children into healthy, happy youngsters, by ridding them of worms. Tossing, rolling, grinding of teeth, crying out while asleep, accompanied with intense thirst, pains in the stomach and bowels, feverishness and bad breath, are symptoms that indicate worms. Kickapoo Worm Killer, a pleasant candy lozenge, expels the worms, regulates the bowels, restores your children to health and happiness. Mrs. J. A. Brisbin, of Elgin, Ill., says: "I have used Kickapoo Worm Killer for years, and entirely rid my children of worms. I would not be without it." Guaranteed. All druggists, or by mail. Price 25c. Kickapoo Indian Medicine Co., Philadelphia and St. Louis.

### SURFACE CULTIVATION FOR CORN.

Provide for Rotation and Plow Under Clover and Sod.

As a rule, farmers take keen interest in improving their seed. Last year a large quantity of seed corn was shipped in on account of the poor germination of home-grown seed, but it was found very unsatisfactory in that it did not germinate any better than our own, and a big per cent of it did not mature, writes C. H. Hellie to Orange Judd Northwest Farmstead.

I always test my own seed before planting, as do all the farmers in this vicinity. Rotation is practiced to some extent and corn comes in as the cultivated crop. I have never tried growing corn on the same field several years in succession, and do not believe that it would be a very successful thing to do.

More and more attention is being paid by farmers in general to maintaining the crop producing power of the soil. They are practicing a rotation of crops, plowing under clover and timothy, and are hauling out all the manure they get. The usual method practiced with manure is to haul it out as fast as possible if the weather and roads will permit and put on the cornfields with a spreader. The ground is then disked before plowing. I plant my corn about 3 inches deep if the season is dry and 2 inches if the ground is wet. I like to have the seed in moist ground, so if a dry spell comes on it will start to sprout as soon as planted. I drag from the time the seed is planted until it is up, and start cultivation as soon as I can follow the rows with a shovel cultivator. The first time through I use deep cultivation, but after that shallow, just deep enough to keep the ground loose on top.

### Dedicated to Lents

A little town named Lents  
Got tired of paying rents  
And built its homes outside the city fair.

It grew to have a name,  
Worth handing down to fame—  
The best folks on the Earth were living there.

As the city wished to move,  
And really was in love  
With the little one who lived outside its gate,  
She invited it to come  
And live within her home,  
To be a Son, or Friend, at any rate.

So the little one went in  
And now it's "in the swim"  
Because it shares the city and its cares.

There will never be a holler,  
You bet your bottom dollar,  
Between the two—there'll be no family jars.

For the little one goes in  
With best intents to win  
For itself and for the city's honest name;

And Lents will do its share  
With good work and no "hot air"—  
Her loyal level best goes in the game.

—A FRIEND.

Pick over and wash two quarts of raspberries, mash thoroughly. Add three-quarters cup of cold water, bring slowly to the boiling point and let simmer 20 minutes. Force through a double thickness of cheese-cloth; again bring to the boiling point and seal in small jars.

### Unshiny Face Spots

Are cured by Dr. Hobson's Eczema Ointment, which heals all skin eruptions. No matter how long you have been troubled by itching, burning, or scaly skin humors, just put a little of that soothing antiseptic, Dr. Hobson's Eczema Ointment, on the sores and the suffering stops instantly. Healing begins that very minute. Doctors use it in their practice and recommend it. Mr. Allemen, of Littleton, Pa., says: "Had eczema on forehead; Dr. Hobson's Eczema Ointment cured it in two weeks." Guaranteed to relieve or money refunded. All druggists, or by mail. Price 50c. Pfeiffer Chemical Co., Philadelphia and St. Louis.

In the Circuit Court of the State of Oregon, for Multnomah County.

In the matter of the Estate of Sarah J. Ferris, deceased. In Probate, No. 1048.

Notice is hereby given that the undersigned, William R. Ferris, as administrator of the estate of Sarah J. Ferris, deceased, has filed his final account in the above-entitled Court and matter; that said Court has fixed Saturday, the 9th day of August, 1913, at 9:15 in the forenoon, of said day, and the court room of Department No. 6, said Court, as the time and place for the hearing of said account, together with objections thereto, if any, and the settlement of said estate, and the discharge of said administrator.

William R. Ferris, administrator.  
First publication, July 10, 1913.  
John Van Zante, Attorney.

EMMA VIVIAN ESTATE  
Notice is hereby given that the undersigned has been appointed executor of the estate of Emma Vivian, deceased, by the Circuit Court of the State of Oregon, for Multnomah County, and has qualified. All persons having claims against said estate are hereby notified to present the same to me at 314 Spalding Building, Portland, Oregon, with proper vouchers and duly verified, within six months from the date hereof.

First Published June 26, 1913.  
W. F. Maclay, Executor.  
John Van Zante, Attorney.

## CLASSIFIED

### WANTED

WANTED—Boys may be had and sometimes girls. The older ones at ordinary wages and others to be schooled and cared for in return for slight services rendered. For particulars address W. T. Gardner, superintendent Boys and Girls Aid Society of Oregon, Portland, Ore.

### FOR SALE

FOR SALE—100 White Leghorn hens of this year's breeding. Choice \$1.00 each or \$75.00 for the flock. Also some baby chicks. Calkins Poultry Farm, Lents, Gresham car, Gilbert Crossing. Home Phone Lents Exchange.

FOR SALE—Young horse, weight 1,000 lbs., good driver, sound, Horse with rig, or horse alone. Enquire of Herald office.

FOR SALE—Three good adjacent lots in Arden Park. Level, in cultivation. Bargain for home location. Enquire of Mt. Scott Pub. Co. Lents.

LUMBER—At our new mill 1 1/4 miles southeast of Kelso. We deliver lumber, Jonsrud Bros.

FOR SALE—Newspapers for wrapping or kindling. Mt. Scott Pub. Co.

FOR SALE—Good wagon with rack. Exchange for wood. Copeland Lumber Co.

We have the stock and can "Deliver the goods." Arleta Lumber Co. 6924 Foster road. Phone Tabor 619.

Drop in at our yard and inspect the "new styles" in lumber. We have all the latest "cuts." Arleta Lumber Co. 6924 Foster road. Phone 619.

FOR SALE—Concrete blocks for building purposes, foundations, curbing etc., Call at Mt. Scott Pub. Co., office for terms.

160 Acres of choice wheat and apple land near Goldendale, Wn. The timber on it exceeds the value of the land. Sawmill joins place. Price \$18 A. or will trade for Portland property. Mrs. A. Wulf, Lents, Oregon.

## For a Seashore Outing

### GO TO

# NEWPORT YAQUINA BAY

No outing is complete unless you visit this old reliable seaside resort which offers to the summer visitor a charm of environment not found elsewhere. ## The Best Light At The Lowest Cost

ELECTRIC LIGHT is the most suitable for homes, offices, shops and other places needing light. Electricity can be used in any quantity, large or small, thereby furnishing any required amount of light. Furthermore, electric lamps can be located in any place, thus affording any desired distribution of light.

No other lamps possess these qualifications, therefore it is not surprising that electric lamps are rapidly replacing all others in modern establishments.
