OREGON
AGRICULTURAL
COLLEGE
BEGINS its forty-fifth school year
SEPTEMBER 19, 1912.
DEGREE COURSES in many phases of
AGRICULTURE, ENGINEERING, HOME
ECONOMICS, MINING, FORESTRY, COM-
MERCE, PHARMACY.
TWO-YEAR COURSES in AGRICUL-
TURE, HOME ECONOMICS, MECHANIC
ARTS, FORESTRY, COMMERCE, PHARMACY
TEACHER'S COURSES in manual
training, agriculture, domestic science
and art.
MUSIC, including piano, string, band
instruments and voice culture.
A BEAUTIFUL BOOKLET entitled
"THE ENRICHMENT OF RURAL LIFE"
and a CATALOGUE will be mailed free
on application.
Address H. M. TRNNANT, Registrar,
(6-7-15 to 9-9) Corvallis, Oregon.

DEHORNING CALVES.
It is more humane to dehorn calves
than grown stock. Clip the hair from
top of rudimentary horns when calf
is from two to five days old. Slightly
moisten the end of a stick of potash,
moisten top of horn also. Rub the tip
of each horn firmly with potash for
about five seconds or until an impres-
sion is made on center of horn. Treat
this for from four to five times at in-
tervals of five minutes. If during the
treatment a little blood appears it will
only be necessary to give another
slight rubbing. Caustic potash can be
obtained from any druggist. When not
in use keep in corked bottle and label
"Poison."—Western Farmer.

FRESH EGGS.
The fresh egg beats to a froth
easier than a stale one. It takes a
longer time to boil a fresh egg than
it does a stale one. The fresh egg
when boiled will peel off smoothly.
The stale egg is not so heavy as the
fresh one, and probably from the lit-
tle oil that exudes by evaporation
from the contents of the shell.

Deafness Cannot Be Cured
by local applications, as they cannot
reach the diseased portion of the ear.
There is only one way to cure deafness,
and that is by constitutional remedies.
Deafness is caused by an inflamed con-
dition of the mucous lining of the Eusta-
chian Tube. When this tube is inflamed,
you have a rumbling sound or imperfect
hearing, and when it is entirely closed,
deafness is the result, and unless the in-
flammation can be taken out and this
tube restored to its normal condition,
hearing will be destroyed forever; nine
cases out of ten are caused by Catarrh,
which is nothing but an inflamed condi-
tion of the mucous surfaces.
We will give One Hundred Dollars for any case of
Deafness (caused by catarrh) that cannot be cured by
Hall's Catarrh Cure. Send for circulars, free.
F. J. CLENEY, & CO., Toledo, Ohio.
Sold by Druggists, etc.

WELCHES

Miss Cordelia Murphy, Mrs. A. L. Holden, Mr. and Mrs. M. Nicola and James D. Conway are visiting at Illibee for a while.
Mr. C. W. Kern, of the Mt. Hood hotel took a crowd of fishermen to Mud Lake, near Mt. Hood Friday and returned Sunday. They report a very enjoyable time due to Mr. Kern's jovial hospitality.
The road workers constructed a new bridge across Still Creek last week. They also remodeled the bridge at Two Mile Camp near the Toll Gate.
George Dingle, Tom Wilborne and Guy Graham, all of Portland spent Saturday and Sunday at La Casa Monte. Dad Miller went to Sandy Friday after a new supply of groceries for his store.
Tawney's fine new hotel is now in readiness for summer guests.
Mr. and Mrs. "Billy" Winter made a trip to Boring and Welches last week.
Roy Henson was in Welches one day last week.
George Rae and Oscar Rennie were fishing in Salmon river a few days ago. Besides catching a basket full of smaller trout they caught two or three measuring twenty inches and weighing from three and a half to four pounds.

GRESHAM

Russell Pugh left Portland Monday night for Spokane. He will assist his brother in the bakery there.
Ted Black has gone to Eastern Oregon to work.
Several of Margaret St. Clair's little friends helped her celebrate her fourth birthday last Saturday.
Mrs. Guy Wood and children of Montavilla are visiting Grandpa Wood. Joe Ross and Ernest Thome have gone to Alaska where they expect to obtain employment.
E. W. Aylsworth, J. A. Patenande and Dr. W. J. Ott left Sunday for Manzanita Beach. They will make the trip in Mr. Aylsworth's automobile.
Miss Bessie Howitt visited Miss Pearl Fleming in Portland on Monday.
George Paris left Saturday for Louisiana where he will assist his uncle, Mr. Stipes, in managing the large plantation owned by his father and uncle.
The Westell grocery store has been purchased by Mr. Bragg of Hood river and Mr. Duncan of Colfax, Wash. Mr. Duncan and Mr. Bragg were formerly in business together in Pullman, Wash., since which Mr. Bragg has been making his home in Hood River. Mr. Duncan is former county treasurer of Whitman county, Wash. Both families expect to make their home here.
Mr. and Mrs. J. W. Lawrence, Mrs. E. W. Aylsworth and son Lawrence, went last week to Manzanita Beach where they expect to remain the entire summer.

STOPS WORK OF LICE.

The poultry department of Ohio Agricultural College is recommending a lice powder which, it is said, poultrymen will find effective in ridding the poultry of parasites. Directions for making the powder are: Put two and a half pounds of plaster of paris into a pan. Then mix three-quarters pint gasoline and pine of creosol. Stir the plaster of paris while adding the liquid. When ready the mixture should be rather crumbly. After drying, it should be sifted, when it will be ready for use.

GLASS CLEANER.

Place pulverized pumice stone between the layers of a folded piece of soft muslin and stitch around the edge to keep the powder from spilling. Wipe lamp chimneys or window panes with this dry cloth and they will be clean and sparkling almost instantly, says an exchange. Enough powder will remain the cloth to be used many times.—C. S. Monitor.

TINFOIL PROTECTS.

Cut sheets of tinfoil and place under the flower vase doilies, and you will have no trouble with any dampness affecting the best polished furniture.—Minneapolis Tribune.

Rid Your Children of Worms

You can change fretful, ill-tempered children into healthy, happy youngsters, by ridding them of worms. Tossing, rolling, grinding of teeth, crying out while asleep, accompanied with intense thirst, pains in the stomach and bowels, feverishness and bad breath, are symptoms that indicate worms. Kickapoo Worm Killer, a pleasant candy lozenge, expels the worms, regulates the bowels, restores your children to health and happiness. Mrs. J. A. Briabin, of Elgin, Ill., says: "I have used Kickapoo Worm Killer for years, and entirely rid my children of worms. I would not be without it." Guaranteed. All druggists, or by mail. Price 25c. Kickapoo Indian Medicine Co., Philadelphia and St. Louis.

CHERRYVILLE

Wait till the clouds roll by before you start into hay making.
Quite a set-back to hayning caused by the rains of last week.
Vincent Freil went back to his job in a logging camp near Cottage Grove after a brief visit at home. He said he visited his grandfather, J. T. Feil Sr., at Eugene while on his way down here, and found him nicely located on a small fruit farm in the suburbs of Eugene.
Mrs. Wick returned from a trip to Seattle, Tacoma and Port Angeles, Wash., last week and was greatly pleased with her trip. This lady said

SAVING AND CARING FOR LOGANBERRY CROP

Loganberry growers who have very limited markets and those whose crops are in danger from continuous wet weather, will be interested in methods of preserving and storing as outlined by Professor C. I. Lewis, head of the division of Horticulture at the Oregon Agricultural College. Professor Lewis thinks that most of this year's crop will be evaporated, and therein lies a great danger. If the product is caramelized and charred as has happened in the past, it is hard and unpalatable and will cause a dislike for dried loganberries, thus limiting the future demand. It is just as necessary, he tells us, to select the fruit carefully for evaporating as it is to be careful in drying. Unripe berries should be thrown out and only good fruit used. The berries should then be graded, not on size as in prunes but on quality.

As to home and local use the professor says: "We should try to increase the home consumption of the loganberry by calling attention to its possibilities. Either canned or evaporated it is good for pies and sauces. Its jelly is hard to beat. Equal parts of loganberry juice and apple juice mixed and boiled down the following winter are said to make excellent jelly of fine flavor and consistency. The juice should be used more largely by confectioners and housewives. Generally where a family puts up one crate of it this year they will put up four or five crates of it the following year. As a beverage it is fast growing in popularity, and may be prepared easily as follows: Place the berries in a dish with just enough water to cover the bottom of the dish to keep the berries from burning. Heat the berries, stirring occasionally with a wooden spoon or paddle but do not let them boil. Take from the stove, strain through jelly bag, mix juice with one-third its measure of sugar, return to the stove, and again heat to boiling point only. Seal at once in fruit jars or bottles. For drinking, this syrup should be diluted with four or five times its measure of water. It is a splendid beverage to take with meals and the children find it a great treat. The time will probably come when entire train loads of berries will be grown solely for juice purposes.

"Of course the berries should be gathered close when rains are frequent, but even though berries become mouldy, there is no need to throw them away. Mould is merely a vegetable growth as truly as lettuce, and unless the berry is decaying, it will still make, even though mouldy, a good product in either juices or jelly." Professor Lewis proved his point by handing a sample of juice to several persons, which was pronounced excellent. He then informed them that it was made from mouldy berries.

Right Cooking to Cut Living Cost.

Through the teaching of domestic science and economy in the home, Kansas gained \$1,000,000 last year and the amount will be increased at the rate of \$500,000 a year until practically there will be no waste food in the entire Sunflower state. That is the aim of the Agricultural College, and the state is spending \$40,000 a year to help in cheating the garbage can.
Seven hundred girls completed the domestic science course at the Agricultural College, and the college has just closed its movable cooking schools, which were attended by 11,000 women during the ten weeks which they were operated.

Kansas decided two years ago that the way to cut the high cost of living was to stop much of the waste that goes out of kitchen doors and into the garbage can. One of the plans was the movable cooking schools, and the other was high school domestic science work.

Last season a few Oklahoma girls expressed a desire to enter a state-wide corn-growing contest in which more than 500 boys were engaged. The judges admired the girls' pluck and granted the request. The result was that one of the girls, Esta Beaman, seventeen years of age, won the first prize of \$200 in gold. Her acre, on which she did all the work alone, yielded ninety-five bushels of corn, which is about six times the average in Oklahoma. It was one of the best acres in all the states where contests were held, although it was on a hillside where there are stumps and rocks, and where the soil conditions are distinctly unfavorable. To show that there was nothing accidental in her victory, Miss Beaman raised two acres of corn near by as good as her prize acre, and also half an acre of fine tomatoes. If other girls show pluck and skill like that, the corn-growing contests, in which thousands of bright boys in many states have taken part in the past few years, will assume a new and highly interesting aspect.

For Cuts, Burns and Bruises

In every home there should be a box of Bucklen's Arnica Save, ready to apply in every case of burns, cuts, wounds or scalds. J. H. Polanco, Delvalle, Tex., R. No 2, writes: "Bucklen's Arnica Save saved my little girl's cut foot. No one believed it could be cured." The world's best salve. Only 25c. Recommended by all druggists.
