CHERRYVILLE

The last days of summer. The weather the past summer has been the "best ever."

The bridge at Salmon River is being strengthened. Later on a new bridge will be built and it is a "cinch" that the bridge will be built by the lowest responsible bidder. The idea of the same bridge company getting all the bridges in this county at their own figures is played out.

Mrs. O. A. Wick of Lanesboro, Ia., who has been camping out here this summer, has gone home. We are sorry to lose her as she is a charming lady and has a very interesting family.

Mr. Havells of Chicago was visiting at the summer home of Mr. and Mrs. Boyd last week. Mr. Havells is a retired capitalist, easily in the millionaire class, and was a former elder in Mr. Boyd's church at Evanston, Ill., a suburb of Chicago.

Miss Casewell, a society belle of Portland, and a member of exclusive social circles, was a visitor at the Boyd home lately.

Mrs. Percy Watkins, who has been visiting at the home of her brother, Howard Watkins, has gone back to her school at Ashland, Oregon for another year's school work.

Why don't you go huckleberrying up in the higher altitudes and get some pure air.

The writer, in company with some of the neighbors, went up on Wild Cat Mountain lately to gather huckleberries and take in the view from that high altitude. After a heroic struggle, the top was reached and a splendid panorama was stretched out before us, of hill, canyon and snow capped mountain peaks. Mt. Jefferson, Mt. Adams, Mt. St. Helens, and Mt. Hood were standing in silent and sublime majesty before us. It is a small wonder that a cow boy of the plains, upon seeing for the first time some of this rugged mountain scenery exclaimed, "Hurrah! for God!"

A special meeting was held at the school house last Saturday night in which the directors met with the directors of the new district, No. 125, on the west, in regard to their share of this district's property, both real and personal. Having been awarded 10 per cent of this property \$115.00 was allotted to go towards building the new school house. As if this was not

KELSO

School will open Sept., 8th. Improvements are being made on the school house. The three windows on the east side of the primary room have been removed to the opposite side, making a group of six windows on the west side.

R. E. Jari has returned from an outing spent in hunting in the vicinity of Baker City.

Miss Margaret Canning has secured a position to teach in Portland this fall, and has therefore resigned as primary teacher at Sandy where she taught last year.

Miss Minnie Lindholm, who is becoming a trained nurse at the Good Samaritan hospital, paid the home folks a visit last week.

Mrs. Henry Francis, who was quite ill, is much improved.

Mrs. W. H. Hutchinson and children have gone to Pendleton to join Mr. Hutchinson who has been employed there during the summer.

Robert Jonrud and family took an auto trip to the Toll Gate Sunday.

CORBETT

Open season for salmon fishing closed Monday noon. Mr. Johnson holds the record for catching the largest sturgeon of the season, hauling one into his boat Friday night weighing over six hundred pounds.

Mr. W. H. Reed was in Portland Saturday.

Mrs. Ketchum of Portland visited her sister, Mrs. Lotta Benfield, the past week.

Grandma Latourell, of the Falls, visited friends here Friday.

Fred C. Reed was in Portland on business Monday.

Mr. and Mrs. Buxton have the sympathy of their friends in the loss of their infant son that passed away Monday at a Portland hospital.

Miss Hazel Smith of Montavilla who has been visiting relatives and friends here the past few weeks, returned home Wednesday.

Mrs. Lewis Reed entertained friends from Chicago last week.

GILBERT

The ladies of Bennett Chapel gave a social at the residence of Mr. and Mrs. W. M. Gilbert, corner of Buckley Avenue

and Gilbert road, on Saturday evening, August 23rd, by which they made fourteen dollars. This places them in a position to meet all expenses and leaves a balance in the treasury. Not only was the financial side a success, but the spirit of harmony and good will prevailed and cheered all who were so kindly trying to help the ladies in their good work. It was called a "weigh social" and much fun was had getting each person's weight. Coffee, cake, and ice cream was served, so there was no excuse for being "lukewarm." Every person had a chance to be "hot or cold" and all present enjoyed it splendidly.

We are pleased to report that the lady who lost her purse at the social found it at her gate as she returned home.

The Ladies Aid and members of the church take this opportunity of thanking those many friends who have so kindly helped to make conditions so pleasant and enjoyable.

At The Churches

BAPTIST CHURCH.
The ordinance of baptism will be administered at this church at the close of the evening service next Lord's Day. In the morning the pastor will preach on, "The Man Who Knows No Want," and in the evening on the subject, "Bible Teaching Concerning Baptism."
Rev. J. M. Nelson, Pastor.

M. E. CHURCH
Preaching 11 a. m. by Dr. Fawcett. Services at Bennett Chapel in the evening. The young people of Lents M. E. Church will render a program for the evening service at 8 p. m. The pastor is on a vacation. All mail will reach me 215, Tacoma Ave. S., Tacoma, Wash. Phone Main 5981.
W. FOYD MOORE Pastor.

Friends Church
Levi T. Pennington, President of Pacific College, Newberg, Oregon will speak Sunday evening, August 31st, 8 p. m. at Friends Church. Subject—Christian Education. This will afford a rare treat for the people of Lents and a cordial invitation is extended to all.
M. B. Smith, Pastor.

EVANGELICAL CHURCH.
Preaching 11 a. m. and 8 p. m. Two pictures—A contrast will be presented. In the morning—"The sinner without Christ." In the evening—"The Christian with Christ." A cordial welcome to all.
P. Conklin Pastor.

ADMINISTRATORS NOTICE
Mary Gritzmacher Estate. Notice is hereby given that the undersigned, as administrator of the estate of Mary Gritzmacher, deceased, has filed his final account in the Circuit Court of the State of Oregon, for Multnomah County, and that Monday, the 25th day of September, 1918, at 9:15 a. m. of said day, and the Court room of Department No. 6 of said Court has been appointed by said Court as the time and place for the hearing and settlement of said account and the objections thereto, if any.
Date and first publication August 28 1918.
Charles Gritzmacher, Administrator.
John Van Zante, Attorney.

IRON SULPHATE SPRAY FOR WEED DESTRUCTION

Oregon Agricultural College, Corvallis, Ore., Aug. 18.—A solution made by dissolving iron sulphate in water at the rate of 100 pounds to 52 gallons of water, will kill most broad leaved and succulent weeds and not injure, to any harmful extent, crops of grasses and grain in which they are growing. Its use, if properly prepared and applied, will prove very effective, but cannot take the place of rotation of crops, cultivation and summer fallow. Methods of preparation and use, with necessary restrictions and cautions, are set forth by Professor H. D. Scudder, argonomist of the Oregon Agricultural College, somewhat as follows: The especial value of this spray in the destruction of weeds is due to the fact that it may be applied in such a way as to kill the weeds while they are growing in the grass or grain crops. As iron sulphate is a powerful salt its actions are similar to that of an alkali in the soil, drying the leaves, turning them brown and causing them to die. It will not destroy grains or grasses because of its limited area of action on their narrow, linear leaves. Used as a spray, iron sulphate has been thoroughly tested by experiment stations as well as by manufacturers of the sulphate. If prepared properly and applied in the right way at the right time it will destroy dandelion, wild carrot, bull thistle, pepper grass, wild daisy, shepherd's purse, pig weed, jamba quarters, mustard, yarrow and sorrel. If used to destroy dandelions on lawns it will injure the white clover. Nor can the spray safely be used on weeds growing in any broad leaved crop as it will destroy both crop and weeds. To be most effective the spray should be applied during dry, sunny weather, for if the weeds are washed by rain within three days, the salt will not kill them. It should be applied with a sprayer which will deliver the spray forcibly in a fine mist, so that the weeds may be covered as completely as possible. The spraying should be done on a quiet day and should be applied to all weeds just before blossoming. In making up of the solution wooden barrels should be used, as the sulphate corrodes all metals except brass. As it loses strength on standing it should be made up fresh each day. The sprayer and all connections should be of wood, rubber or brass. After use the sprayer should be cleaned with water to prevent clogging or corroding. Made up in the required strength the solution will stain hands and clothing, but the hands may be protected with vaseline. Where spraying is done on an extensive scale a large horse machine should be used. On a smaller scale a hand sprayer with a strong fine spraying nozzle will serve the purpose. For mustard in wheat fields, one spraying is sufficient, but for such persistent plants as dandelion it must be repeated as often as the plant comes up. Flax or wheat may be sprayed with out injury to the crop when it is from six to twelve inches in height, although the tips of the leaves may be turned brown.

NEW DEPOSITS OF IRON ORE.

Magnetite beds found by Geological Survey in Blackfoot Indian Reservation.

While making a geologic examination of the Blackfoot Indian Reservation in northwestern Montana in 1912, Eugene Stebinger, of the United States Geological Survey, found a number of magnetite beds carrying a notable percentage of iron. The beds occur in a prominent sandstone formation which can be traced for many miles, entirely across the reservation. Although they are of considerable economic interest, especially because of the opening of the reservation to settlement in the near future, as provided by Congress, there are apparently no published description or even mention of them extant. They have not been prospected because of regulations restricting such operations on the reservation. The magnetite beds are widely distributed over the west half of the reservation. The principal beds being found on the South Fork of Milk River. The largest towns in the region are Cut Bank, a small agricultural center and railroad point situated on the east edge of the area, and Browing, at present the Indian agency for the reservation. The thickest beds found on the reservation occur at the mouth of Kennedy Coulee, near the Croff ranch. According to analysis made the beds average 27.3 per cent of iron and 8.3 per cent of titanium oxide.

In the same township, on the opposite side of Milk River, the magnetite-bearing sandstone is well exposed in steep cliffs averaging about 100 feet in height. The cliffs are capped by iron-stained sandstone from 10 to 20 feet in total thickness. The greater part of these sandstones can not be classed as high-grade rock, although a few thin beds, in no place reaching an aggregate thickness of more than 4 feet, are rich in magnetite. A sample from this locality showed on analysis 33.2 per cent of iron and 10.6 per cent of titanium oxide. Samples taken from other deposits in the vicinity indicate that a considerable tonnage of ore which would average about 50 per cent of iron could be hand-sorted from these deposits, although the average of the material available would probably not run more than 30 to 40 per cent. The proportion of titanium oxide in the ores is considerable, averaging over 12 per cent in one sample. This high titanium content renders these ores unfit for use, according to present metallurgical practice, although it is believed that ores of this type may eventually be successfully smelted. A copy of the report may be had free upon application to the Director of the United States Geological Survey.

MAKE THE HOME PLEASANT FOR THE BOY

Virginia Baker in the Mothers' Magazine.
Make home so pleasant for your boys that they will hold it dearer than any other spot. Give them "the freedom of the house," as far as possible. While insisting that they be neat and orderly, don't be what boys call "fussy." Let them use the furniture and the books, for use is what books and furniture are made for.

Have plenty of good books at hand; also games, puzzles and other things, both instructive and amusing. If possible, let your boys have a "den" of some kind for their very own. Encourage them to invite their young friends to the house. The boy who feels at liberty to bring home his mates now and then, after school, or to "ask them over" for a social evening occasionally, have no necessity to seek companions in the streets.

Don't frown down "fads." Let the boy collect things if he wishes to. Don't term his precious collections "rubbish" or "litter," and don't complain that they "gather so much dust." A better way is to insist that he shall, himself, keep his treasures in good order. Remember that each fad has an influence on the boy's body, mind or soul.

Such fads as collecting shells, flowers or rocks and minerals, take the boy out into the open air and strengthen him physically. They bring him into close relation with Nature's myriad and wonderful beauties. They bring him nearer to God and develop and refine his soul.

Other fads, such as post cards, stamp and coin collecting, quicken his mental perceptions and are wonderful educational aids. Indeed, almost any harmless fad is a very good thing for a boy. It will serve to keep both hands and mind occupied, and it is as true that Satan finds some mischief for idle mind to do, as it is true that he finds it for idle hands.

The Best Pain Killer

Bucklen's Arnica Salve when applied to a cut, bruise, sprain, burn or scald, or other injury of the skin will immediately remove all pain. E. E. Chamberlain of Clinton, Me., says:—"It robs cuts and other injuries of their terrors. As a healing remedy its equal don't exist." Will do good for you. Only 25c. at all druggists.

When making sponge cake, dust the top lightly with powdered sugar before putting in the oven.

Miss Norma Muender of Oregon City, is visiting relatives in Gresham.

Mrs. L. T. Lusted visited her son, Harry Lusted and family, in Lents last Monday.

The Oddfellows lodge has just had a new roof put on their hall.

The work on the fair grounds is being rushed.

Mrs. Harve Metzger died at her home in Portland, Wednesday at 4 P. M. The funeral was held in Gresham to-day Mrs. Metzger has been a sufferer from cancer for many months. She is survived by her husband, one daughter, Velmax, and one son, Quinn Metzger.

H. S. Harvey had the misfortune to lose his hay crop off from thirty acres. It was stacked on his place and in some manner caught fire.

Miss Evelyn Metzger has been pending a few days with Miss Pearl Reugg at Senic.
