**Lime and Sulphur Spray.**

The lime and sulphur spray is expensive. It is disagreeable to make and to apply. But it clears the trees of a variety of germs and insects. The shothole fungus is destroyed by plum growers. Bordeaux mixture has been the remedy. It is effective, but it requires time and several applications. One good treatment with lime and sulphur will do more to rid the trees of the disease than a season of spraying with Bordeaux. For this purpose, if for no other, the sulphur is to be recommended. Add to that the effect on the other ailments and it makes the treatment a valuable one for the plum grower.

**CEMENT FEEDING FLOOR BEST**

No Better Foundation Can Be Had Than Solid Clay Soil—No Advantage in Using Rocks.

In making a cement feeding floor on ground overlaid with clay a few inches below the surface, remove the surface dirt down to its hard clay foundation. Then tap that down solid and level, and put on the concrete made of one part of Portland cement, two parts of clean, coarse, sharp sand and four parts of crushed rock or clean gravel, thoroughly mixed dry, then wet and remixed, right onto the clay.

No better foundation can be had than solid clay soil. There is no advantage in putting down rocks over solid clay, as they cause trouble in the future. Put down three or four inches of such concrete, and before it has set put down one inch of Portland cement to two parts of clean, coarse sand, mix and dry as before, then wet and remixed carefully, and may be spread upon the coarser concrete.

This will make a durable floor. Rocks and sand below are not required, and are no use in a floor of this kind.

Grass stains may be removed from washable fabrics by rubbing with fresh lard before washing.

**Use for Aniline Colors.**

That aniline colors have a marked action upon various kinds of microbes appears to be established. It is discovered that aniline compounds in general act to destroy microbes, even in greater degree than does phenic acid. Of the different bacteria examined the typhus bacillus is the most readily affected.

Golden Dream Cake. Separate the yolks and white of four eggs, beat the whites with an egg-beater until you can turn the bowl wrong side up and the egg white will hold its position solidly. Then with the egg-beater beat the yolks for five minutes when they will be thick and creamy. Then beating all the time with beater, gradually pour in one cup granulated sugar. Beat until sugar and eggs form a cream, light and foamy. Then add one-half teaspoonful of lemon or vanilla. Last of all add one cup of pastry flour, sifted three times, with saltspoon of salt in it. Fold in the flour very carefully with a spoon. Turn into a buttered and well-floured tin and bake a pretty golden brown. In cutting for the table crease each piece deeply and then break. To cut sponge cake spoils the grain and makes it seem heavy; There is no rising in this cake except the eggs. But you will find it all right and most delicious cake.

Washing Net Curtains. To wash net curtains soak them in an earthenware bowl or porcelain tub over night in suds of white soap. First wash them through one soapy water to remove the surface dust. Then put them in the suds made of shaved white soap, boiling water and borax—two table-spoonfuls of borax to four quarts of water; in the morning wash the curtains gently until they are clean and then rinse them in clear water until all trace of soap has disappeared. Blue, starch and dry them.

Move the Carpet. Every now and then, instead of allowing the stair carpet to remain in exactly the same position as first placed, the tread of the carpet should be moved a couple of inches or so either up or down. This has the effect of keeping the pile of the carpet in a uniform condition, and, besides retaining the fresh appearance of the carpet, it helps it to last much longer than it would if left exactly as laid. It costs nothing to do this, yet saves much.

Dust Cloths. Any soft cloths that do not have linty surfaces are good for dusting purposes. Soak the cloths in a mixture of gasoline and kerosene, hang up to dry in the air, repeat two or three times and you will have a splendid cleanser. Be careful, however, not to have the fluids near the fire, as they are highly inflammable.

For Discolored Enamelware. To keep white enamelware looking new, scouring it occasionally with white vinegar is very good.

**FOR WINDOW DRAPERY**

TIME TO GIVE THOUGHT TO CURTAINS IS NOW.

Material Desired May Be Bought Cheaper at This Season Than Later—Suggestions as to the Best Color Schemes.

Now that autumn is approaching it is time to think of new curtains. They may be purchased now at small cost.

For a living or dining room nothing could be prettier than the green and yellow scheme. If the walls are green, brown or gray, have soft yellow next the window and green to cover the woodwork.

Soft yellow silk muslin hemstitched is beautiful, but the same delicate shade of cheesecloth will give exactly the same effect. Cheesecloth may sound rather poor, but when hanging at a window with the light back of it nothing could be prettier, and certainly nothing less expensive. Make the curtains perfectly straight with a wide hem. Put them on a brass rod and they will hang softly, giving a peculiar light that is unusually suggestive of mellow sunlight.

Over the window frame a heavier material is necessary. For all living rooms cretonne or English chintz in yellow and brown tones is pretty but cotton poplin is no more expensive and much more elegant and artistic. Poplin can be purchased in all shades of green, brown or red, and is a good substitute for velours in winter, as it looks quite as warm, and, unlike velours, it need not be made by an expert to look well.

Outside drapes should be cut straight, the same as those next the window, using a width for each side. Hem across the bottom and attach the other end to a rod, or tack to either side of the window frame, as they will not be drawn, but left to hang plain at the sides. Across the top of the window a valance is good. Cut the poplin in half lengthwise, making a casing, with heading, and have it twice as wide as the window. Run the rod through the casing.

For a bedroom white cheesecloth is advantageous. Cheesecloth washes like linen, always looks fresh, apparently never wears out and in colors never seems to fade. Pink in a delicate shade is also pretty for a bedroom, as the light has a way of shining through it which is very alluring, almost like a sunset glow.

Inside curtains of cretonne may be made of a width of the material less the width that is taken off for the pleating. Make box pleats about two inches wide and the same distance apart, stitch and put around the sides and bottom of curtains, also on the valance. Hang them the same as the other curtains.

The best quality of cheesecloth in all colors can be bought for ten cents a yard, and silk muslin and cotton poplin at 25 cents.

**IDENTIFIED HIS MAN AT LAST**

When Asking for Mr. Jones at Jesus College, Oxford, It is Necessary to Be Quite Explicit.

It was at Jesus college, Oxford, that one of the most laughable stories connected with that university originated. Jesus college is chiefly patronized by Welshmen.

A Cardiff resident, visiting the city for the first time, bethought himself that at Jesus college was a young man he knew in the Welsh capital, so he resolved to call on him. Accordingly he tackled the porter of the college.

"Is Mr. Jones in?"

"Which Mr. Jones?" was the reply. "There are 27 Joneses in this college."

"Mr. Jones of Cardiff, sir."

"There are 18 Joneses from Cardiff," exclaimed the porter, impatiently. "What's his Christian name?"

"David, sir."

"There are ten David Joneses from Cardiff here," answered the official. "You must be more explicit. What kind of hair has he?"

"Red, sir."

"There are six David Joneses from Cardiff with red hair in Jesus," said the porter. "What kind of eyes has he?"

"Well, just a wee bit of a cast in them," was the reply.

"There are three David Joneses from Cardiff with red hair and with a slight cast in their eyes," burst from the angry man at the lodge. "Has your Mr. Jones any other peculiarity?"

"He's a bit lame on one foot, sir."

"Now, why didn't you say so at first? Up stairs, first to the right, second to the left, third to the right again. At No. 18 is the only David Jones from Cardiff with red hair, a slight cast and a lame foot. Why didn't you say so before?"—Stray Stories.

Minister's Mission. "That's a nice looking fellow who's just come in," said the young man who was dining with his best girl. "Is he a friend of yours?"

"Yes, indeed, I know him well," laughed the maiden.

"Shall I ask him to join us?"

"Oh, George!" said the girl, blushing. "this is so sudden."

"Sudden? What do you mean?" he asked in surprise.

"Why—why, that's our minister."

Catty. "So Jack Harkness has proposed to you?"

"Yes. How did you know?"

"My fiancé told me last night. He used Jack's love for you to give weight to an argument."

"An argument about what?"

"He was trying to convince me that love is blind."

"The fact that he is your fiancé should have convinced you of that."

HARD WORLD TO HIT.

He—Faddy has given up his automobiles and caught the airship fever. She—How long do you think he will be bent on going up?

He—Oh! until he gets bent coming down.

Going by Authority. Jim Jackson—No, sah—yo' don't ketch dis coon wukkin' on a rainy day like dis!

Squire Hennerly (astounded)—Rainy?

Jim Jackson—Wal, dat's wot de almanac says, an' dat's good 'nuff foh me!—Puck.

His Vacation. "You are convinced that you need a vacation?"

"Yes," replied Senator Sorghum. "I've got to get away to some place where I can forget political cares and do some real work."

A Comparison. "You say the nobleman your daughter married reminds you of summer vacation?"

"Yes," replied Mr. Cumrox. "It's a case of a fine title for a mighty uninteresting piece of work."

**Success depends largely upon Good Health**

In your race for success don't lose sight of the fact that only through good health can you attain success. The tension you must necessarily place upon your nerves, and the sacrifice of proper exercise you have to make at times must be balanced in some way.

**Dr. Pierce's Golden Medical Discovery**

is the balancing power—a vitalizing power. It acts on the stomach and organs of digestion and nutrition, thus purifying the blood and giving strength to the nerves, indirectly aiding the liver to perform its very important work. Dr. Pierce's Golden Medical Discovery has been successful for a generation as a tonic and body builder. Sold by medicine dealers in liquid or tablet form—trial box of "Tablets" mailed on receipt of 50 one-cent stamps.

If in failing health write Dr. R. V. Pierce's faculty at Invalids' Hotel, Buffalo, New York.

**Fit Boys for Business.**

When a boy undertakes to learn the grocery business in Prague, Bohemia, his employer demands from \$20 to \$50 a year from him and in return furnishes board and clothes. The lad must attend an advanced business school at least twice a week and on Sundays study an additional language.

**He Knew What He Meant.**

We were visiting a cousin whose small boy was very fond of the deserts served. After finishing his dinner he waited for a time and then said: "Mamma, is there any last thing?"—Chicago Tribune.

**Get Rid of Scale.**

Oyster shell scale is not always removed by the lime-sulphur spray. But the Dominion Experimental farm at Ottawa, Can., has shown by actual test that a good whitewashing will succeed where the spray fails. Forty pounds of lime, 40 gallons of water and eight pounds of salt make up the recipe. Spray on the tree just after the leaves fall, and again as soon as the first wash has dried. The scales will loosen up from the bark and fall off. This will not do away with the need of the lime-sulphur spray for San Jose scale, but is additional.
