A discovery of more than usual interest is that of cement and copper ore on the Sidney Smyth farm between tunnel No. 1 and Rooster Rock. Mr. Smyth is selling stock in the mine and expects to have it fully developed and a large force of men employed in operating the same very soon.

Dr. Botkins received a letter last week from his brother at Wellington, Kan., in which he stated that over 100 days in succession last summer the thermometer registered 100 degrees in the shade and that practically all the crops were ruined.

Frank Rhodes got a letter from his mother at Bellville, Ohio, last week in which she wrote of a terrific snow-storm that struck them on the 10th and which practically stopped all travel and traffic. The snow was piled up in drifts six or eight feet deep and the rural mail carriers were unable to make their trips for nearly a week. Last spring they were washed away with floods and now snowbound.

At a meeting held at the school house last Saturday a special tax of 5 mills was levied on this road district to be used on the side roads according to the property along those roads, and the balance on the main road. The amount that will be raised by this tax will be something over \$1000.

The practise of building good roads all over Oregon is fast growing in popularity. In Multnomah County under the able leadership of John Byron, practically a million dollars will be expended next year. Other counties have bonded themselves for large amounts to build roads which is a wise measure. As long before the bonds are due the increased valuation caused by good roads would more than pay the bonds. Nobody is kicking about the wealth of John Byron who began as a humble laborer and by practice of temperance and economy and good judgment has amassed over five million dollars in less than 30 years in Oregon. What is to be commended in him is that his employees were always well paid and well fed and no strike or labor troubles were ever heard of in his labor camps. That is the result of fair play and right treatment.
