### IMAGINATION WORKS A CURE

Prince of Orange Cured Garrison of Scurvy by Use of Harmless Colored Vials of Water.

During the siege of Breda, in the Netherlands, the garrison was badly afflicted with the scurvy.  
So useless was the medical aid afforded the soldiers, and so desperate were they in consequence, that they resolved to give up the city to the enemy.  
This resolution came to the ears of the prince of Orange. He immediately wrote addresses to the men, assuring them that he possessed remedies that were unknown to physicians, and that he would undertake their cure, provided they continued in the discharge of their duty. Together with these addresses he sent to the physicians small vials of colored water, which the patients were assured were of immense price and of unspeakable value. Many, who declared that all former remedies had only made them worse, now recovered in a few days. A long and interesting account of the wonderful working of this purely imaginary antidote was drawn up by M. Van der Mye, one of the physicians of the garrison, whose office was thus successfully usurped by the prince of Orange.

A corroborative proof of the well-known power of the imagination affecting Arabian fable: One day a traveler met the Plague going into Cairo, and accented it thus: "For what purpose are you entering Cairo?" "To kill 3,000 people," rejoined the Plague.  
Some time after the same traveler met the Plague on his return, and said: "But you killed 30,000!"  
"Nay," replied the Plague. "I killed but 3,000; the rest died of fright."

### SAFETY NOISE-MAKING TOY

Much Amusement is Afforded to Youngsters by Parents, Using Old Newspapers as Ammunition.

Nearly every American father has, at one time or another, blown up a paper bag and then exploded it by striking the bottom with his hand, to the great enjoyment of a small son. The illustration shows a safe noise-making toy embodying the same idea.

Safe Noise-Making Toy Embodying a Familiar Idea.

says the Popular Mechanics. A piece of old newspaper is the ammunition. This is slipped over the opening of the ball or bowl-shaped receptacle, and the pulling of the trigger or exertion of pressure on the handle, results in a pressure of air which bursts the paper with considerable noise.

**Slippers and Procrastination.**  
Why are your bedroom slippers like a deferred resolution?  
Because they are put off till the next day.

**The Why.**

## SPORTS OF THE FARM

White Plymouth Rock Chicken is One of Most Familiar.

Another Interesting and Valuable Diversification in Development of Polled Durham Breed of Cattle—The Dwarf Tomato is Another.

(By PROF. JOHN WILLARD BOLTE)  
The term "sport" means many things to many people. We each think in our own language and see the same object in different colors from various sides. Sport from the standpoint of the man interested in heredity is an unprecedented and unaccountable change of character in the offspring of perfectly normal parents. This change may be slight, or it may be absolutely revolutionary, but if it be a true sport it has never occurred before in the ancestry of this particular individual.

The new character may effect one organ or the whole structure of the individual. There is no way of tracing the causes of the change and no certainty that it will be transmitted to the descendants of the sport.  
It is from these abrupt spontaneous appearances of strange characters that some of our most valuable varieties of plants and animals have come. Perhaps one of the most familiar sports in animal world is the White Plymouth Rock chicken. This variety is a pure sport derived from the Barred variety and the pure white chicks occurred in two or three places in this country at about the same time. Fortunately they transmitted their white color to their offspring and thus was created a new breed, pure white in color, and true Plymouth Rocks in every other characteristic.

Another interesting and valuable sport is the Polled Durham breed of cattle, a hornless breed descended from the true sports of the Shorthorns. The first true polled Shorthorns were born of horned parents, but their offspring were usually hornless.

In the vegetable kingdom, one of the latest sports is the Dwarf Tomato which we told you about in a recent article. It came spontaneously from tall stock, had full sized fruit in smaller numbers, and the stalk was stiff enough to support the fruit. It immediately became popular and bids fair to supplant its parent variety for field use, because it produces more and better fruit to the acre.

Sports without number have occurred among the flowers and most of us are familiar with numerous cases of unexpected new shapes and colorings.  
Many of the finest varieties of apples and other tree fruits are of spontaneous origin, and we credit a number of valuable grains and field crops to the same mysterious forces which we know not.

### INCREASE IN FARM PROFITS

Farmers Make Serious Mistake of Spreading Energies Over Too Large Area, Says Worst.

(By J. H. WORST, Dean of North Dakota Agricultural College.)  
It requires approximately seven dollars per acre to grow a crop. This includes interest on the investment, cost of seed, wear and tear on farm machinery, labor, etc. By adding one dollar's worth of labor to each acre, there is little question but that the average profits would be doubled. In other words, as much profit should be realized from the one additional dollar's worth of labor as is now realized from the seven dollars' worth of unavoidable labor and investment. Consequently if farmers would devote one-third of their land to growing corn and alfalfa, neither of which interferes with the time and labor employed in farming wheat, and put one-third more labor, thus make available on only two-thirds as many acres of wheat, they would grow more wheat than where they spread their energies over one-third larger acreage. The corn and alfalfa fed to live stock would insure them a large additional income, and one that is not often adversely influenced by climatic conditions, while the fertility deposited upon the farm resulting from feeding the corn and alfalfa to live stock would vastly improve the productivity of the soil.

### Handling Manure Once Only.

It should be the rule never to handle manure more than once. When removed from the barn or feeding shed it should be loaded at once into the spreader and hauled to the field. If the farm is small and the amount produced is only at the rate of one or two loads a week, the convenience and improvement of taking it directly from the stable and spreading it at once on the field will certainly justify driving the manure spreader slowly.—Orange Judd Farmer.

### Manure and Moisture.

Manure from the barn lot adds humus to the soil, and humus acts like a sponge, retaining the moisture and making more rainfall or holding it longer. Moral: Save and carefully spread all barnyard manure over the fields. Manure, properly utilized, puts dollars in the farmers' pockets.

10 CENT "CASCARETS" IF BILIOUS OR COSTIVE  
For Sick Headache, Sour Stomach, Sluggish Liver and Bowels—They work while you sleep.  
Furred Tongue, Bad Taste, Indigestion, Sallow Skin and Miserable Headaches come from a torpid liver and clogged bowels, which cause your stomach to become filled with undigested food, which sours and ferments like garbage in a swill barrel. That's the first step to untold misery—indigestion, foul gases, bad breath, yellow skin, mental fears, everything that is horrible and nauseating. A Cascaret tonight will give your constipated bowels a thorough cleansing and straighten you out by morning. They work while you sleep—a 10-cent box from your druggist will keep you feeling good for months.

## All Blood Disorders Quickly Driven Away

Astonishing Results With the Greatest Blood Purifier Ever Discovered.  
Strength, Power, Accomplishment are all Typified in S. S. S.  
Some blood disorders become deeply rooted in the glands and tissues, and the mistake is made of resorting to drastic drugs. These only aggravate by causing other and worse troubles. A host of people know this to be true. They know from painful experience.  
To get right down into where the blood is vitiated requires S. S. S. the greatest blood purifier ever discovered.  
This remarkable remedy contains one ingredient, the active purpose of which is to stimulate the tissues to the healthy selection of its own essential nutriment and the medicinal elements of this matchless blood purifier are just as essential to well balanced health as the nutritious elements of the meats, grains, and fats and sugars of our daily food.  
Not only this, but if from the presence of some disturbing poison there is a local or general interference of nutrition to cause boils, carbuncles, abscesses and kindred troubles, S. S. S. so directs the local cells that this poison is rejected and eliminated from their presence.  
Then, too, S. S. S. has such specific stimulation on these local cells as to preserve their mutual welfare and a proper relative assistance to each other.  
In a very brief time S. S. S. has the reconstructive process so under control that remarkable changes are observed. All eruptive places heal, mysterious pains and aches have disappeared, and from head to foot there is a conscious sensation of renewed health.  
From the fact that S. S. S. is purely a botanical preparation, it is accepted by the weakest stomach and has great tonic influence. Not one drop of drugs or minerals is used in its preparation. Ask for S. S. S. and insist upon having it. And if you desire skillful advice upon any matter concerning the blood and skin write to The Swift Specific Co., 205 Swift Bldg., Atlanta, Ga. Do not allow some zealous clerk to larrip the atmosphere in eloquence over something "just as good" as S. S. S. Beware of all counterfeits.
