the highway by driving their team and

necessarily?

during the holidays. Ray gave over
100 inches of skin to Charlie Eatchel.
To do this he was treated to an

successful. Fred Hall also supplied a
large surface.

Good Roads

"Extensive highway improvement
should begin with the improvement of
the main traveled highways used by
farmers in hauling their produce to
market," asserts former Senator Jona-
than Bourne Jr., Chairman of the
Joint Good Roads Committee. "That
is one reason why my plan for Federal
Aid leaves control of construction with
the states. If control should be vested
in the Federal Bureau, there would be
danger of disregard of local needs and
wishes. It may be that in a few states
the greatest need is for inter-state high-
ways. If so, the local authorities
should so determine, and not have the
matter decided for them by officials in
Washington.

"I see no occasion for material con-
troversy between the advocates of im-
provement of main traveled market
roads and the advocate of construction
of trans state or inter-state roads. In
general, the roads used chiefly by farm-
ers, will, when connected, form a state
highway. The roads used by auto-
mobillists are, as a rule, the same roads
the farmers use the most. But there is
no occasion for criticism if a portion of
the road funds are used for improving
stretches of road that will be used chief-
ly for pleasure. Automobileists are
among the heavy taxpayers and they
have a right to participate in the bene-
fits of road expenditures. On the other
hand, the auto owner who lives in the
city has occasion to use a local market
road a dozen times where he uses a
long-distance trunk road once. It is to
his interest to have the local road im-
proved first.

"But, from any and every viewpoint,
it is fundamental that control of road
construction should remain with the
state and not be turned over to the
Federal Government."
