**The Upper Crust.**  
Mrs. French Vanderbilt, at a luncheon in Harborview, her Newport villa, said of the nouveaux riches of Gotham:

"These people form, undoubtedly, a very splendid and ornate society, but it is a social upper crust based exclusively, as it were, on the financial dough beneath."

Kangaroos on their native heath have been known to jump 70 feet.

**THIS WOMAN'S SICKNESS**

Quickly Yielded To Lydia E. Pinkham's Vegetable Compound.

Baltimore, Md.—"I am more than glad to tell what Lydia E. Pinkham's Vegetable Compound did for me. I suffered dreadful pains and was very irregular. I became alarmed and sent for Lydia E. Pinkham's Vegetable Compound. I took it regularly until I was without a cramp or pain and felt like another person, and it has now been six months since I took any medicine at all. I hope my little note will assist you in helping other women. I now feel perfectly well and in the best of health."—Mrs. AUGUST W. KONDNER, 1632 Hollins Street, Baltimore, Md.

Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs, contains no narcotic or harmful drugs, and to-day holds the record of being the most successful remedy for female ills we know of, and thousands of voluntary testimonials on file in the Pinkham laboratory at Lynn, Mass., seem to prove this fact.

For thirty years it has been the standard remedy for female ills, and has restored the health of thousands of women who have been troubled with such ailments as displacements, inflammation, ulceration, tumors, irregularities, etc.

If you want special advice write to Lydia E. Pinkham Medicine Co., (confidential) Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

**Don't Wait Till You're All Bugged Up. Use S. S. S. Now.**  
If you will go into any first class store and get a bottle of S. S. S. you are on the way to getting rid of Catarrh. But don't let anyone work off that old trick of something "Just as good."  
S. S. S. is taken into the blood just as naturally as the most nourishing food. It spreads its influence over every organ in the body, comes through all the veins and arteries, enables all mucous surfaces to exchange inflammatory acids and other irritating substances for arterial elements that effectually cleanse the system and thus put an end to all catarrhal pollution. S. S. S. cleans out the stomach of mucous accumulations, enables only pure, blood-making materials to enter the intestines, combines with these food elements to enter the circulation, and in less than an hour is at work throughout the body in the process of purification.  
The medicinal components of S. S. S. are relatively just as essential to well-

**FOR THE HOUSE IN WINTER**  
Those Who Prefer Blooms to Foliage Should Cultivate the Primula Obconica.

The window-gardener who wishes blooms rather than foliage during the winter, should grow Primula Obconica. This plant when well established in a seven-inch pot, will have dozens of stalks or clusters of blooms about the size of a nickel, and they last a long time.

The plant begins to bloom when very small and blooms all winter.

The colors vary through the many shades of pink, lilac, and peach-blossom to almost white, and with its lemon-yellow eye sets off the very delicate beauty of the flower.

It is a hardy, self-reliant plant, well able to hold its own, and is seldom troubled with insects or disease. If the aphid appears, spray with tobacco-infusion throughout the foliage.

This plant may be raised from seed, or a large plant may be divided, allowing a crown to each plant.

See that its soil is light, and rich, and friable, and the drainage perfect. This plant cannot stand wet, sour soil, or to have water poured into its crown.

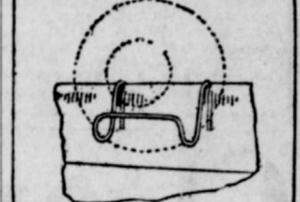

If care is not taken in this regard, the flowers will blast and the plant die.

Twice or three times a month apply some good liquid fertilizer while the plant blooms.

Remove the fading flowers and do not allow the plant to mature seeds.

**HANGER FOR WASH BASIN.**  
If there's a wash basin in your kitchen the chances are you are compelled to look for it every time you want to use it. That is the way it usually is! Why not fix things so that the basin is kept right alongside the sink?

Get a length of heavy wire—ordinary bare wire will do—and bend it in the shape shown in the drawing. The basin rests in that hook all the time.

Holds Basin in Place.

**Boston Brown Bread.**  
Mix and sift together one cup of rye meal, one cup of granulated cornmeal, three-fourths teaspoonful of soda, one teaspoonful of salt, one cup of graham flour; add three-fourths cup of molasses and two cups of sour milk and stir until well mixed, turn into a well buttered mold and steam three and one-half hours. The mold should not be more than three-fourths full, the cover should be buttered on the inside and then tied down with string. For steaming place mold on a trivet in kettle containing boiling water up around mold, cover closely and steam, adding as needed more boiling water. A melon mold or one-pound baking powder box makes the most attractive loaves, but a five-pound lard pail answers the purpose.

**Oyster Soup a la Creole.**  
For a quart of oysters you will need about a cupful of fried bread crumbs. Drain the oysters and add the juice to a pint of clear water. Now put a piece of butter the size of two walnuts in a saucepan. Add a tablespoonful of flour and stir till it browns, without burning. Take it from the fire and season it with pepper, cayenne and a dash of salt. Add the liquid from the oysters and the water, mix thoroughly and allow the mixture to simmer for half an hour. Just before serving add the fried bread crumbs and a little chopped parsley, if available.

**Fried Eggs With Apples.**  
Pare and core three medium sweet apples, then cut in six slices, season all over with one-half teaspoon salt and two saltspoons pepper. Thoroughly heat one and a half tablespoons melted butter in a large frying pan, and fry two minutes on each side. Carefully crack 12 fresh eggs over apples, season evenly with one-half teaspoon salt and two saltspoons pepper, fry for a minute on range; place in oven for six minutes, remove, carefully glide on a hot dish and serve.

**Lima Beans With Fine Herbs.**  
Boil one pint of shelled lima beans in one quart of boiling water with one teaspoonful salt 25 minutes. Drain on sieve, then place in a saucepan with one ounce good butter. Season with one-half teaspoonful salt and two saltspoons pepper. Finely chop together two branches parsley, one branch chervil, ten branches chives and six tarragon leaves. Add this mixture to beans, toss well in pan and cook five minutes, frequently tossing meanwhile. Serve in vegetable dish.

**Stuffed Potatoes.**  
Select fine smooth potatoes; cut off the end of each and scrape out the inside. Mix this with chopped ham, onion and parsley, and a tablespoon of butter. Season with salt, pepper and lemon juice. Fill the potato with the mixture; let bake in moderate oven until tender; serve hot.

**IF YOUR CHILD IS CROSS, FEVERISH, CONSTIPATED**  
Look Mother! If tongue is coated, cleanse little bowels with "California Syrup of Figs."

Mothers can rest easy after giving "California Syrup of Figs," because in a few hours all the clogged-up waste, sour bile and fermenting food gently moves out of the bowels, and you have a well, playful child again.

Sick children needn't be coaxed to take this harmless "fruit laxative." Millions of mothers keep it handy because they know its action on the stomach, liver and bowels is prompt and sure.

Ask your druggist for a 50-cent bottle of "California Syrup of Figs," which contains directions for babies, children of all ages and for grown-ups.

**Only Another Marvel.**

A Hartford surgeon is able to produce local anaesthesia or insensitiveness to pain in any part of the human body, merely by pressing momentarily on certain nerves in the mouth or throat with a probe, a pencil or any instrument that comes handy. His recorded experiments appear to be no less conclusive than amazing, and deepen the wonder with which thoughtful people regard these intricate and mysterious physical bodies in which we live and move and have our being. They are so incredibly marvelous that we have not begun to understand them, and they surprise us with new capacities every day.

It is estimated that the body of an adult is composed of 26 trillion cells, each of which appears to have a certain intelligence and freedom of development. They may be about as self-sufficient and independent of their neighbors, as a man is in the community where he resides. Yet at death these myriad cells break up; the world has no further use for them in that form. The molecules which compose them enter into other combinations or separate into their constituent atoms.

Well has it been enjoined that man should know himself. If this vehicle or brief use, this vestment of a day or of a few years at the most, is so infinitely complex and astounding, what must we think of the consciousness which inhabits it, the pilgrim of sternly who builds it for his temporary occupancy, abides his destined hour, and goes his way.—Rochester Express.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

**Our Population 1 Per Cent Criminal?**

It is yet too soon to note just what the new treatment of criminals has produced or will produce. That it will lessen crime is problematical. That it will have a beneficial effect on criminals is more than likely. There is no doubt that it pleases the quick-sympathies of humanity.

It has been stated on good authority that a country-wide census, if it could be made, would show that criminals constitute less than one per cent of the population. The same authority asserts that it costs more to apprehend convict and incarcerate this group than it does to educate the other 99 per cent who are good citizens.

That so costly a machinery should have been operated in so antiquated a method for so long does not speak well for our economy. Perhaps it has been so costly because it has been so antiquated.—Richard Barry in the Century.

**Mellen on Bankruptcy.**  
Charles S. Mellen, at a dinner in Boston, said of a bankrupt: "His bankruptcy was like that which the parent described."

"Pa, what's bankruptcy?" a little boy once asked.

"And pa, who had been 'bit' that week, answered bitterly: "Bankruptcy, my son, is where you put your money in your hip pocket and let your creditors take your wallet and coat."—Knoxville Journal and Tribune.

**"All is Well That Ends Well"**

Along with dyspepsia comes nervousness, sleeplessness and general ill health. Why? Because a disordered stomach does not permit the food to be assimilated and carried to the blood. On the other hand, the blood is charged with poisons which come from this disordered digestion. In turn, the nerves are not fed on good, red blood and we see those symptoms of nervous breakdown. It is not head work that does it, but poor stomach work. With poor thin blood the body is not protected against the attack of germs of grip—bronchitis—consumption. Fortify the body now with
