

Weston Weekly Leader.

FRIDAY, JULY 3, 1885.

OUR AGENTS.

The following are the authorized agents of the Leader in their respective localities:

LOCAL LEADERS.

Note W. C. Starkey's ad. Fire crackers and flags at F. M. Pauly's.

Mr. Chas. Willert and wife, of Centerville, were visiting friends in Weston on Wednesday last.

Remember the cheapest place to buy your tobacco and cigars is J. J. Banta & Co.'s, Centerville.

The Centerville Hotel, under the management of Mr. L. McHone, is meeting with deserved success.

A regular meeting of the City Council was held Wednesday evening. No business of importance was transacted.

Have your watch repaired, by Frank Manning, Centerville.

Stacy Roberts and family, who have been spending the spring and summer on Willow creek, returned to Weston last Wednesday.

Frank Manning watchmaker and jeweler is at McHone's Hotel, Centerville.

A young man at Forest Grove died last week from the effects of being struck by a base ball. But the dangers of the game have not much effect in pressing it.

Nice clean mixed bird seed, only 15c per pound at J. J. Banta & Co.'s, Centerville.

It pays to advertise: since the last issue of the LEADER J. S. White & Co. have sold a large quantity of agricultural implements. See what they have to say this week.

When you prove up on your land inform the Register that you want the notice published in the LEADER.

There will be divine services at All Saints' Church next Sunday evening at 7:30 o'clock, Rev. E. C. Johnson officiating. The morning service will be held at Pendleton.

The other day Mr. Chas. McMorris turned his cow, a valuable one at that, into his clover field. She made a very hearty meal and then took some potatoes for desert. The mixture was not a happy one, for she died from the effects in a very short time.

The brick work of N. Dusenbery & Co.'s new store on the corner of Main and Franklin streets is completed. The structure presents a very substantial appearance with iron pillars and iron slaters. The firm have every reason to be proud of it. It is another enduring monument of Weston enterprise.

Mr. Jas. Shumway of Cous Creek made this office a visit on Wednesday. He reports grain in his neighborhood as looking very well and thinks that it will average at least thirty bushels to the acre, though some fields will go as high as forty. The grain on Cous Creek is not badly lodged, the loss from this cause will not probably be more than a bushel or two to the acre.

Last Wednesday the people of Weston were startled by the solemn tolling of the bell of All Saints' Church. It was soon learned that it was due to the death of Mrs. Kribbs, who lived near Adams and who had died of consumption on Tuesday. Mrs. Kribbs was held in the highest esteem as a kind, christian woman. Her death though not unexpected will be deeply deplored.

A very distressing accident occurred last Monday out on Gerking Flat. A little granddaughter of Mr. John Gerking was playing with some other children around the barn, the door of which was simply propped up, the hinges and fastenings having been broken. In playing near it, the prop was removed and the heavy door fell on the little girl and killed her.

It will take no small share of the profits of this year's crops—no matter how abundant—to pay for agricultural implements. Six threshing machines have already been delivered at Blue Mountain this season and more are on the way. Then figure up the headers, reapers, rakes, wagons, &c. Truly the harvest will require to be abundant and prices good.

Thunderstorms have been unusually frequent of late and the heavy showers accompanying them have done some damage to the grain that is almost ripe. Just what the extent of the damage is it is difficult to estimate, as reports are unsatisfactory and conflicting. Heavy grain in some few instances is so badly "lodged" that it will be impossible to cut it with a header. As far as heard from up to this writing the general average will not be very materially diminished.

Mr. Richard Reynolds informs us that he has lost three more calves, five in all, from the "black leg." He is now fully persuaded that the disease resulted from their eating mouldy manure from his stable which had not been cleaned out thoroughly for two or three years. The straw was not decomposed but covered with a dry mould. One calf as soon as it was seen to be dull and stupid was treated to a pint of malted lard three times a day for three days and the dose gradually diminished for three days more and it seems in a fair way to recover. There is no apprehension that the disease will spread as those affected were kept in a pasture by themselves. Any suggestions of value from those who have had experience with stock, regarding this disease, will be thankfully accepted.

The luscious blackberry has made its appearance and retails for ten cents per pound.

Our old friend I. T. Reese, of Adams, was with his acquaintances in Weston the fore part of the week.

Fishing on the Unatilla is good, and strings of one hundred and over are frequently caught in a short time.

The U. B. church, just approaching completion, will be the handsomest church edifice in the county.

Harvest hands are in demand, and good wages are being offered. No man need complain of being unable to find work.

The warm weather is approaching and several families in Weston are making arrangements to spend a season at the Warm Springs.

Twelve or fifteen carpenters are busily engaged on Probstel Bros' grain warehouses, and the building is being rapidly pushed to completion.

Brickmasons have run out of brick and are taking a lay-off in consequence. Mr. Nelson is now burning a large kiln which will be ready for use in a few days.

Several of our citizens went to Walla Walla yesterday morning to witness the match game of base ball between the Walla Walla and Blue Mountain clubs.

Good substantial sidewalks have been placed in front of the new brick buildings on Main street, and pedestrians to avoid from the postholes are once more happy.

Chicken thieves are abroad in the land. Several of our citizens have been missing their tender young fowls of late, and circumstances point to the fact that the roosts are not being despoiled by Chinamen, but by "gentle white trash." A shot-gun filled with bird-shot is a good preventative.

Several buckets, hooks and other apparatus belonging to the hook and ladder truck have not yet arrived, and at a meeting of the fire company on Wednesday night it was determined not to accept the truck until the remainder of the apparatus put in its appearance.

News was received this week that Mr. J. T. Bellenger, who lived in Centerville for several years past, has just died of consumption in California, in which place he went for his health. His wife left Centerville a few days ago to join him, but he died a few hours before her arrival.

Mr. W. P. Crow, of Milton, one of the oldest settlers of Unatilla county, informs the LEADER that the wheat raised this year will be the best for milling purposes ever raised in the county. The grain will be unusually large and plump, and not in the least shriveled as in years past. He thinks the heads, on account of the long dry spell, are not as thoroughly filled as they were last year, but the plumpness of the grain will more than make up for the deficiency.

too late to see her husband alive, he having died in the morning of the same day.

A very sad accident happened on the old Gerking farm last week. There was a heavy barn door that was off the hinges and had been propped up with a stick, of which one end was on the ground and the other against the door. A little five-year old daughter of Mr. Leaman, who lives on the farm, was playing about the door when she accidentally knocked the prop loose, letting the heavy door fall on her, causing instant death.

Robley & Miller have received and will soon put in place at the depot, a large scale on which to weigh grain in bulk. This will be quite a saving of time both to the firm and the farmer, which should be appreciated by all who have grain to haul. Mr. Robley informs me that he is furnishing the standard calverts grain sack at 7 cents, which is lower than they were ever sold in this country before. With wheat at a fair price this fall our farmers ought to get rich, as everything seems to be in their favor. And so it should be.

A warrant was issued last Friday and placed in the hands of our deputy sheriff for the arrest of one Kearney for the stealing of money from Mr. Shaver, one of our townsmen. The matter was kept as quiet as possible while the sheriff was hunting for evidence that would convict before making the arrest. He watched his man till he retired for the night, and then went home thinking he would catch him as he left town the next morning. But fearing lest Kearney might escape in the night and he lose his fee, the worthy justice issued a second warrant and placed it in the hands of a special, gathered a crowd and went to the resting place of Kearney and placed him under arrest. A pistol shot or two was fired and a great hurra made, much to the annoyance of Main streeters who were aroused from their midnight slumbers. The next day eminent counsel was employed to prosecute Kearney, while Mr. Butcher was retained on the defense. The case was brought before the judge who had headed the arresting crowd of the night before, and the face of a trial played. Kearney was convicted and sentence passed (before the trial) and the prisoner turned loose. It is to be hoped that our county court will investigate this and other matters before fees are allowed. SELDOOR.

The Famous Notre Dame. On the 30th of last January, the Sisters of the most noted Catholic ladies' seminary in the United States, the famous Notre Dame, at Gowanstown, near Baltimore, Md., made public a card, certifying to the beneficial results attending the use of Red Star Cough Cure in that institution. They state that they found it efficacious alike for relieving coughs, expelling phlegm from the chest and irritation of the throat. Officials of the Boards of Health of Brooklyn, Baltimore and other cities have likewise publicly proclaimed the virtues of this new discovery, which is entirely free from opiates, poisons and other objections.

Officials of the Boards of Health of Brooklyn, Baltimore and other cities have likewise publicly proclaimed the virtues of this new discovery, which is entirely free from opiates, poisons and other objections.

On the 30th of last January, the Sisters of the most noted Catholic ladies' seminary in the United States, the famous Notre Dame, at Gowanstown, near Baltimore, Md., made public a card, certifying to the beneficial results attending the use of Red Star Cough Cure in that institution. They state that they found it efficacious alike for relieving coughs, expelling phlegm from the chest and irritation of the throat. Officials of the Boards of Health of Brooklyn, Baltimore and other cities have likewise publicly proclaimed the virtues of this new discovery, which is entirely free from opiates, poisons and other objections.
