HOW RESINOL CURED ITCHING SKIN TORMENT

Baltimore, Md., May 23, 1914: "My limbs from knee to ankle were com-pletely covered with eczema for a year. It commenced with several small water pimples, which burst when I scratched them, until they developed into sores, and cozed a yellow-ish fluid. I hated to go in company, it itched and burned so badly. I had no rest at night. I tried a good many remedies for eczema, both liquid and salve, but they did me no good, only made the skin more rough and scaly. I learned of resinol ointment and resol soap and tried them, and was re lieved of the severe itching and burning AT ONCE, and after a month's steady use was completely cured."

Mahomet was born in Arabia in 659, and though of wealthy parents, early devoted himself to the study of religious, reading both the Christian and Jewish books on that subject. His own people then professed a system of polythelam, but the reformer attacked this, preaching that there was but one God and that Mahomet was his prophet.

From a few followers his believers grew into the thousands, and when Arabia had been converted these Moslems, with fire and sword, entered Turkestan and obliged the Turk to accept the Mahometan religion. They soon became its most ardent exponents, and so great was the growth that today there are 200,000,000 people who believe in the Koran, the Maho metan bible, worshiping God as Allah and Mahomet as his prophet.

The green silk trousers of Mahomet were for a long time borne as the banner of the Moslem army. The incursions of the Turks into Europe won for them many Christian provinces at various times, among them being Armenta, Servia and the Balkans.

Insects That Carry Diseases. Sir Donald Ross, who discovered how the anopheles or mottled winged mosquito carries malaria, gave in s lecture at Charing Cross hospital in November an account of other diseases that are carried by insects or bugs. Mosquitoes carry not only malaria but yellow fever, dengue fever and elephantiasis. Glossina morsitans is the carrying agent of the tropical disease known as magana, while tsetse files are the cause of sleeping sick-

ness. The spirochetes of tick fever are borne by ticks and a mild fever is conveyed by sand files. Plague is due to the rat flea which carries the parasites in the salivary glands and leaves them in the fiesh of whomsoever it bites. Mediterranean fever is carried principally by the milk of infected goats. Leprosy has been attributed to bedbugs, and some are even beginning to think that measles is due to

Foster Fearlessness. Fearlessness is the natural condition of children, and it should be not only carefully guarded but fostered to a growth that the future cannot affect. There are better and healthier methods of governing children than through fear; a wholesome regard for conse-quences is another matter, for without it obedience would be a hard les son to learn. Even that was left out of the education of many grownups to judge by the reckless deeds which are a large part of the day's gleanings in news. Ordinary care would eliminate most of the accidents which befall humanity.

"Inquirer" has interesting reading as to a dog having followed his master its miles. I think I can beat his "record" by some 21 miles. It happened in 1890. Men Fight On Their Stomachs Napoleon so said. A man with a weak stomach is pretty sure to be a poor fighter. It is difficult—almost impossible—for anyone, man or woman, if digestion is poor, to succeed in business or socially—or to enjoy life. In tablet or liquid form

helps weak stomachs to strong, healthy action— helps them to digest the food that makes the good, rich, red blood which nourishes the entire body.
