Dangerous Method.
"What are your usual modes of punishment?"
was among the questions
submitted to a teacher in a rural
district in Ohio. Her answer was, "I try
moral suasion first, and if that does
not work I use capital punishment."
As it was a neighborhood where moral
suasion had not been a success, and
the children were scarce, the commit-
tee took no risks.

50 Passengers Held Up.
Los Angeles—Fifty passengers on a
westbound Pacific electric interurban
car were held up and robbed late Sun-
day night by two masked men about
a mile west of Pomona. The robbers
poked their guns under the nose of the
conductor when he was throwing the
switch. The robbers then went
through the car and took money and
jewelry amounting to about \$200 and
escaped.

FRENCH SUCCESSFUL AGAINST GERMANS

Commanding Points Over Plain of Flanders Heights Won.

BOTH SIDES USING HEAVY ARTILLERY

Night Attacks Spectacular—Reports Say Teutons Lose 120,000 Men During 120 Days Battle.

Paris—After battling 120 days for
the hilly country between Bethune and
Arras, the French forces are in possession
of all the eminences looking out
upon the plain of Flanders. Lille,
Douai and Cambrai all are visible from
here.

Every position along the broad na-
tional road between Arras and Bethune
has been won except Souchez, and last
night another quarter-mile of trenches
in the Souchez was torn away.

The attack was made under parachute
rocket lights, the French burning
bluish white and the Germans greenish
white, covering the scene of the de-
perate conflict with a ghastly glow.

The most desperate fighting has been
along the short 10-mile front from
Arras to Aix Neulette, which began
March 9 with the taking of a few hun-
dred yards of trenches on the water-
shed of Notre Dame de Lorette, where
there are the ruins of an old Merovingian
military road. Every day since
then some section of the German
trenches have been taken, lost or re-
taken.

Each side has been employing for-
midable artillery, both of small and
heavy caliber, the French guns being
somewhat the more numerous and
served with unlimited quantities of
high-explosive shells.

A correspondent of the Associated
Press went through five or six miles of
the trenches formerly held by the Ger-
mans and reconstructed by the French.
Upward of 100,000 Germans have
fallen or been captured in these
trenches, according to the French official
count, since the second week of
March. The French losses, the corre-
spondent was confidentially informed,
while serious, have been much smaller
than those of the Germans. There are
thickets of little crosses made of twigs
tied together marking graves between
the trenches. Some of these graves
have been torn up by the shell fire.

Two-cent Rate Causes Railroads to Withdraw Many Public Privileges

Chicago—W. J. Cannon, assistant
general passenger agent of the Chi-
cago, Milwaukee and St. Paul railroad,
continuing his testimony in the west-
ern passenger rate hearing here, said
the two-cent fare laws had wiped out
of Paris, conventions and resorts where
the hauls are short ones.

"Experience," he said "has proved
that the institution of reductions like
tourist fares has generally stimulated
travel and as a large percentage is
carried on regular trains the railroads
can afford to make such reductions.
Tourist fares of all characters are open
to the public and necessarily reduced
the average rate per mile. Homesek-
ers' fares, which apply to round-trip
tickets, have been made for many
years to the West, Southwest and
Northwest, and the demand continues.
"The carriers are vitally interested in
inducing settlers to take up or pur-
chase land.

Experience shows that the bargain
rate principle of granting such con-
cessions on certain days is a factor of
consequence in accomplishing the de-
sired result."

Pacific Trade Growing.
San Francisco—Big increases in im-
ports and exports through the San
Francisco customs office for the year
ended June 30 are shown by the annual
report of the collector. During the last
six months the increase in exports over
the same period last year is about two-
thirds. Exports for the last six months
were \$39,573,828; same period in 1914
\$24,326,152. Other figures for the
year ended June 30, 1915, are: Ex-
ports 1915, \$79,731,766; exports 1914,
\$62,535,648; imports 1915, \$76,068,
028; imports 1914, \$66,384,839.

France Wants Leather.
Washington, D. C.—France has of-
fered to lift her embargo on raw hides
in return for a supply of American
leather goods for military purposes,
according to advices received here.
The plan, if worked out, will release
for manufacture in this country a vast
quantity of raw hides which accumu-
lated in France as a result of the em-
bargo and because of the extensive
slaughter of French cattle for food.
Paris dispatches also contain requests
for American wheat flour for the use
of civilian bakers.

Vatican's Lights Dimmed.
Rome, via Paris.—German Zepp-
elins, according to reports received in
Rome, have been transported to the
coast of the Austrian Adriatic sea.
Their object, it is said, is to reach
Rome. The Italian government has
notified the Vatican and the Pope has
ordered that the lights of the apostolic
palace be dimmed or extinguished at
an early hour. The Pope also gave in-
structions for the removal of art treas-
ures from places exposed to damage.

PRICES REASONABLE WORK GUARANTEED

When We Work Best.
Autumn and spring are the best sea-
sons of the year for all kinds of work.
At a very low temperature both men-
tal and physical work are depressing.
Mental work reaches its highest effi-
ciency at a temperature of 53 degrees,
while physical work reaches its maxi-
mum at 59 degrees for men and 60 de-
grees for women. Recent investiga-
tions show that weather variations are
distinctly good for us and promote our
mental efficiency.

**DOES YOUR SKIN
ITCH AND BURN?**
If your skin itches and burns with
eczema or any such tormenting, un-
sightly skin disease, simply wash the
sore places with resinol soap and hot
water, dry and apply a little resinol
ointment. The itching stops INSTAN-
TLY, you no longer have to dig and
scratch, sleep becomes possible,
and healing begins, and to such pain-
ful itching, antiseptic, antipruritic re-
solin medication strikes right into the
surface, arrests the action of the dis-
ease, and almost always restores the
tortured, inflamed skin to perfect
health—quickly, easily and at little
cost.

To Appreciate Colors.
Only a few of the great painters
have been great "colorists," for the re-
grettable reason that they could not
divinely see color, and to such paint-
ers the master colorist has been called
crude and garish. The fine thing for
everyone is to cultivate the eye to a
close and ever observation of all hues
and shades in nature, for in that way
only one can have the pleasure of the
highest appreciation of nature, and
of the wondrous revelations of the
spectrum in its divination of the
composition of rays of light.

All Have Three Forms.
All things in the world have three
forms; these are gaseous, liquid and
solid. Everything is moving from one
of these forms into another. For in-
stance, the sputum in a liquid. Dried
in the open air, it soon becomes a
solid. The pulverized, it is taken up
by the air and circulates in minute
dust particles, some of which are too
small to be seen.

he'd say there was no use having one

so poorly that my folks thought I was
going into consumption. One day I
found a piece of paper blowing around
the yard and I picked it up and read it.
It said 'Saved from the Grave,' and
told what Lydia E. Pinkham's Vegeta-
ble Compound has done for women. I
showed it to my husband and he said,
'Why don't you try it?' So I did, and
after I had taken two bottles I felt
better and I said to my husband, 'I don't
need any more,' and he said 'You had
better take it a little longer anyway.' So
I took it for three months and got
well and strong."—Mrs. ALONZO E.

London's Assent Lacking.
Washington, D. C.—Germany's pro-
posals of last February for the reopen-
ing of her cable communications with
the United States failed because they
were conditioned on the consent of
Great Britain and the London foreign
office, which never replied to the ne-
gotiations communicated by the United
States. State department officials
published this explanation in the light of
a published assertion by Herz von Jagow,
who laid stress on the lack of cable
communication as a means of an ex-
change of views on submarine warfare.

Food Is Denied Civilians.
Rotterdam, Holland—It is reported
here the German military authorities
in several of the Belgian provinces, in
an effort to force the civilians to work
for the army of occupation, have with-
held food supplies sent in by the Com-
mission for the Relief of Belgium. In
Malines the supply of food is said to
have been stopped because the me-
chanics refused to work in their shops.
At Courtrai the workers are reported
to have been deprived of food because
of their refusal to work in barbed wire
factories.

Liner's Sinking Forecast.
Washington, D. C.—Sir Cecil Spring
Rice, the British ambassador, formally
called the attention of the State de-
partment to the Fatherland, a German
paper published in New York, pointing
out that it forecast the sinking of the
Lusitania and predicted internal ex-
plosions on ships sailing from the
United States for the allied nations.
Without making any request, the am-
bassador declared it indicated "guilty
foreknowledge of a crime."

BERLIN NOTE MAKES PROMISE OF SAFETY

American Passenger Ships May Sail Freely in War Zone.

OFFICIAL GUARANTEES ASKED OF U. S.

German Reply Makes Conditions for Travel Under Own Flag or on Neutral Passenger Ships.

Berlin, via London—Germany's
offer, embodied in the reply to the
United States' note regarding the sink-
ing of the Lusitania and submarine
warfare, was delivered to James W.
Gerard, the American ambassador,
Saturday night. Its essential features
are:

First, reiterated assurances that
American ships engaged in legitimate
trade will not be interfered with nor
the lives of Americans upon neutral
ships be endangered.

Second, that German submarines
will be instructed to allow American
passenger ships to pass freely and
safely, Germany entertaining in re-
turn confidence hope that the American
government will see that these ships
do not carry contraband; such ships to
be provided with distinguishing marks
and their arrival announced a reason-
able time in advance.

The same privilege is extended to a
reasonable number of neutral passen-
ger ships under the American flag and
should the number of ships thus avail-
able for passenger service prove inade-
quate Germany is willing to permit
America to place four hostile passen-
ger steamers under the American flag
to ply between North America and
Europe under the same conditions.

**German Reply Viewed Here As
Quite Likely to Bring Crisis**

Washington, D. C.—Arrival of the
press translation of the German note
conferred impressions which have been
present in official quarters for several
days that Germany would refuse to
give the assurances asked for by the
United States that the lives of Ameri-
cans traveling the high seas on un-
armed ships of any nationality be not
endangered.

The press copy arrived too late to be
read by many officials, and those who
saw it said they could not comment
until the official text from Ambassa-
dor Gerard had arrived.

Assumption of liability for the loss
of Americans in the Lusitania tragedy
was considered to have been wholly
evaded by Germany, and the chief
principle for which the United States
announced that it would omit "no word
or act" to see observed was viewed as
having been passed over lightly.

The general feeling that the note
would be unsatisfactory and bring to a
crisis the friendly relations that have
existed between the United States and
Germany developed more strongly in
official quarters.

**Steamer Minnehaha Arrives in Port
After Terrific Explosion and Fire**

Halifax, N. S.—A bomb placed
aboard the Atlantic transport liner
Minnehaha probably while she lay at
her pier in New York, caused the ex-
plosion and fire at sea, in the opinion
of the officers of the steamer, which
put in here for examination Saturday
with the fire still unextinguished.

The explosion occurred in No. 3
hold, and was of terrific force, shaking
the vessel from stem to stern. Those
of the crew who were forward at the
time were stunned by the shock and
two sailors were hurled into the air.
Flames followed, and for two days and
nights the crew battled to save the
ship.

There is no doubt in the minds of
the officers that Erich Muentzer, alias
Frank Holt, or confederates, were re-
sponsible for the explosion, which oc-
curred at 4:15 o'clock on the afternoon
of July 7, the date on which Muentzer
predicted that some vessel, as to the
name of which he appeared uncertain,
would be destroyed.

Water Famine Is Feared.
Ellensburg—Charles E. Hewitt, of
North Yakima, water commissioner of
Kittitas and Yakima counties, after
going over water conditions in the val-
leys, sounds a general warning for all
ranchers to be economical in their use
of water. "The reclamation is releas-
ing 2,000 acre feet of water every day
in an effort to keep the ditches sup-
plied," said Mr. Hewitt. "This is cut-
ting into the storage at a fast rate and
unless there is co-operation among the
ranchers there is danger of a critical
condition in late summer."

Australia Demands More Butter.
The strong California export demand
for butter is keeping the Portland mar-
ket very firm and a higher range of
prices for cubes in the near future is
probable. The belief prevails in the
trade that the 1,500,000 pounds of but-
ter already shipped from San Francisco
to Australia will find its way later to
England. It is the understanding here
that Australia butter shippers con-
tracted to supply the British govern-
ment with a large quantity of butter
to make up for the deficiency in Dan-
ish shipments, and, being unable to
complete the contract because of the
Australian drought, they have turned to
the Pacific Coast for a supply. What
raises the trade is why the American
butter, if intended for England, is not
sent direct to London instead of by
way of Sydney.

Egg buying prices were unchanged
with the opening of the week. The
poultry and dressed meat markets were
quiet and unchanged.

Demand for Fruit Is Renewed.
That retailers of Portland sold up
closely on the holiday rush was indi-
cated by the good demand for fruit
and vegetables on Front street this week.
Watermelons were quoted lower at
1 1/2 to 2 cents loose and 2 cents crate.
Cantaloupes were firm at last week's
prices. Oregon peaches were steady
at 75 cents to \$1 and California peaches
at 90 cents to \$1. Among the receipts
was a mixed car of California apples,
peaches and plums.

There was a good-sized shipment of
strawberries from Eastern Washington
points, but there was not much demand
for them. Raspberries sold readily at
\$1 to \$1.10. Loganberries were quiet
at 75 cents.
A lot of fancy green corn arrived
from the Imperial Valley and was put
on sale at 75 cents a dozen.

Why Vaccination Pays.
Statistics show that to vaccinate a
person against smallpox at public ex-
pense costs about twenty-five cents,
while the disease itself costs the pub-
lic on an average about \$50 per case.

Power of the Individual.
If only one person—*you*—makes up
his mind to do his best for the meet-
ing, from that nucleus the contagion
of best-doing will spread through the
society.

Such Is Frail Humanity.
"Many a man," said Uncle Eben,
"dat kin hesitate or tango for miles
while de music is goin' couldn't be
persuaded to walk two blocks to de
grocery store."

Wheat Not Badly Hurt.
"Eltopia, Wash.—The damage Satur-
day night from a wind of hurricane
proportions did not shatter the stand-
ing wheat as much as was feared. The
early grain probably will be damaged
from three to five bushels an acre,
Turkey red and bluestem and the late
sown flue were not hurt materially.
The wind blew down several windmill
towers throughout the district, and
for prompt action a large grain ware-
house here would have been leveled.

WHY FAMOUS PASTRY COOKS USE K C BAKING POWDER

The patrons of our first class hotels and restaurants are exact-
ing—they demand the best. Women go where the pastry and cakes
are noted for their excellence. Men are attracted by hot bread and
biscuits—when fresh and moist and light.

The pastry cook with a reputation uses K C Baking Powder
because he knows that results are certain; every time everything
is as good as his best.

Then, too, with K C Baking Powder he can mix the various
kinds of batter before the rush of the meal begins and bake as
needed so that every order goes to the table fresh and hot, yet the
last he bakes are just as good as the first.

The reasons behind these reasons is that K C is
really a blend of two baking powders. One commences
to give off leavening gas as soon as moistened. The
other requires both moisture and heat to make it
active. Dough or batter will remain in a partially
leavened condition for hours, and when put in the oven,
will come up as light as if mixed a moment before.

For cookies, pancakes, doughnuts and the like,
which cannot all be baked at once, K C is indispensa-
ble. For all baking the doubleraise makes doubly certain.

Follow the example of the professional
cook and your baking will be equal to his.

Insect Feigns Death.
The death beetle has the in-
ventable habit of feigning death when
sated or disturbed. The simulation
is so persistent that when immersed
in water, or even in alcohol, the in-
sect remains perfectly immovable, and
will allow itself to be burned alive
rather than betray itself. The tick
made by the deathwatch resembles
that made by tapping the finger nail
upon the table—so much so that the
insect may be led to recommence his
sounds by doing this.

He Comes.
"Where do we find the most miser-
able of men?" exclaimed the ether-
fervently. "You don't have to find
him," responded the man in the fourth
row, center, "he hunts you up and tells
you all about it."—*Philadelphia Public
Ledger.*

Daily Thought.
The calm or disturbance of our mind
does not depend so much on what we
regard as the more important things
of life as in a judicious arrangement
of the little things of daily occurrence.
—La Rochefoucauld.

Price of Drugs Fixed.
The German government has for
years fixed the retail price of drugs,
even to the extent of designating what
must be charged for bottles, cork, lab-
el or ornament box used in dispensing
the medicine.

Show Respect for Bee.
Attention is called to the fact that
no one ever seems to think of a bee
as a bug. Insect is about the worst
thing they are ever called.

Uncle Eben.
"A well-fed horse," said Uncle Eben,
"is a better recommend for de man
dat owns him dan fancy harness."
