Judger' Wigs.

The wig is only worn by English barristers to give them a stern, judicial appearance, and no one can say that it falls in this respect. The custom was originated by a French judge in the seventeenth century when, happening to don a marquis' wig one day, he found it gave him such a stern and dignified appearance that he decided to get one for himself and wear it at all times in court. This he did, and the result was so satisfactory from a legal point of view that not only the legal point of view that not only the judges, but harristers also, took up the custom throughout Europe.—London Graphic.

EMPLOYERS TO AID **NEW DEFENSE PLAN**

Trained Army of 800,000 Men At Uncle Sam's Call

60-DAY VACATIONS FOR ALL WORKERS

Security of Positions and Earnings Is Essential Part of Proposition Now Interesting Officials.

Washington, D. C. — Employers throughout the United States—corporations, manufacturers, professional men, tradesmen and business men of all classes—are to be asked to contribute as their share in the national defense permission for their employes to engage, without serious financial loss, in two menths' military training during each of three years.

This is an essential part of the administration's plan for raising a citizen army of \$80,000 men in six years, which, with the regular army of 140,000 men and 300,000 reserves, would give a trained force, exclusive of state militia, of about 1,300,000 in the event of war.

of war. at a shipyard for employment. In order to have a little fun with him the foreman set him to give a proof of his skill by hewing out a wooden bolt with no chopping block but a stone. The carpenter accomplished his difficult task without marring the keen edge of the broadax and showed the foreman a neatly made bolt. Then he brought the ax down with a terrific blow that shattered its edge upon the atone. "I can have fust rate on your chopping block," he hiccoughed, "but I'll be blamed if I can make the ax stick in it when I git through." The story runs that the foreman lost no time in employing such a workman.

Or war.

The success of the plan, officials admit, depends not on the appropriation of congress, for its cost will be computed by a ratively small, but on the patriotic response of employers to whom an appeal will be made to furlough as many men each year, at different seasons, as they can spare and who wish to join the proposed continental army.

Administration officials admit, depends not on the appropriation of congress, for its cost will be computed by a ratively small, but on the patriotic response of employers to whom an appeal will be made to furlough as many men each year, at different seasons, as they can spare and who wish to join the proposed continental army.

Administration officials are confident that, even though it is proposed to enlist only 133,000 men in the year in the continentals, or a total of nearly 800,000 in the first six-year period, more than that number would be astured by their employers that their positions would not be lost and their earnings seriously decreased.

The proposed enlistment requires two months' service for each of three years and liability for service during the remaining three years only in event of war.

The army plans for more than 1,000,000 trained men in six years, and the
navy' program of ten dreadnoughts
and six battle cruisers within five
years, both of which will be presented
to congress with the indorsement of
President Wilson, were the absorbing
topics of interest here.

"The evidence is becoming increasingly plain that the world's supply of wheat will be abundant for the season, and the abnormally large receipts in both the United States and Winnipeg of spring wheat indicate that the period of scarcity is about ending and recent large purchases, in a quiet way, indicate that a good share of these supplies will eventually reach the United Kingdom.

Potato Crop Condition Lower.

The government's monthly crop report estimates a lower condition, as compared with the 10-year average, for potatoes in the Pacific coast.

For the entire United Btates, the indicated yield for 1915, based upon above averages for October, is 268, 151,000 bushels, compared with the September 1 estimate of 405,999,000, the final estimate on 1914 crop of 405, 921,000 and the five-year average of 257,000,000 bushels.

"Safety First" Lessens Life Loss.

Chicago, III.—The Union Pacific railroad system will be given an absolutely clean bill on "Passengers Killed" during the fiscal year ending June 30, 1915, in the report of the Interstate Commerce commission. And the number of passengers injured, for the same period, will show almost negligible in the commission's report. Two years ago the Union Pacific system adopted a motto of "Safety First." Every employe, regardless of his position, was enlisted in the work of making the Union Pacific not only as safe as any other system in the country, but absolutely safe for the traveling public as well as for the employes.

Broomhall in his weekly internation-al review says:
"The general position of the market 8,951,364 passengers traveled nearly only does this apply to those passengers actually on board the trains, but it includes those who were preparing to go aboard, or who were leaving the to go aboard, or who were leaving the trains of the company. Regardless of whether the blame lay with the railroad, or was due to the grossest, most flagrant carelessness on the part of the passenger, the fact remains that during the fiscal year ending June 30, 1915, not one single Union Pacific passenger was killed.

But Union Pacific's "Safety First" campaign is not benefiting passengers alone. Employes are reaping handsome returns on the efforts they are making to prevent accidents to each other.

Germans Execute Woman,

London-The foreign office has been otified by the American embassy that Miss Edith Cavell, lately the head of a large training school in Brussels, who was arrested August 5 by the German authorities in Brussels, was executed October 13 after sentence of the control of the executed October 13 after sentence of death had been passed on her. It is understood that the charge against Miss Cavell was that she harbored fugitive British and French soldiers and Belgians of military age and had assisted them to escape from Belgium in order to join their colors.

President Favors Wool Tariff. Washington, D. C .- President Wilson is reported by members of congress who have talked with him as favoring the placing of some duty on wool — not that he believes that wool needs any protection, but that he believes a wool tariff will aid in wiping out the deficit in the treasury. It is reported that the President will recommend a duty on wool when he sale commend a duty on wool when he asks congress to repeal the free sugar clause of the Underwood act. How much duty the President will recommend is not yet determined.

German Shipping Hard Hit.

London — British submarines have now cleared the Baltie sea and the Gulf of Bothnia entirely of German merchant ships, says a dispatch to the Star from Copenhagen. Every German ship which was south-bound from Sweden when the submarines started their campaign has either been sunk or run aground, it adds. Of 50 German ore carriers, 37 are virtually interned in Swedish ports, the correspondent declares.

Big Loan Is Completed. New York — The contract covering the flotation of the \$500,000,000 Anglo-French credit loan has been signed. Lord Reading, chairman of the Anglo-French commission, signed the document on behalf of Grest Britain; Octave Humberg and Ernest Mailett, the French commission, signed for France, and J. P. Morgan signed on behalf of the American syndicate of bankers.

HEY ARE MADE FOR EACH OTHER

He Saved the Patent Office.

When in the war of 1812 the British who had taken Washington, trained their guns upon the patent office Dr. Thornton, throwing himself directly before the guns, cried:

"Are you Englishmen or Goths and Vandals? This is the patent office—a depository of the ingenuity and inventions of the American nation in which the whole civilized world is interested. Would you destroy it? Then lot the charge pass through my body."

And the building was spared. Twen-
