The conversation at a recent social affair turned to the subject of narrow margins, when Senator Robert L. Owen of Oklahoma recalled an amusing incident along that line.

Two tickets, mister, said the boy with a business-like air, "25-cent one for me and a 10-cent one for this little girl."

"A 10-cent one," returned the ticket-seller, "that's the small mite of femininity. 'Isn't she 10 years old?'"

"Yes, sir," was the prompt rejoinder of the boy. "Ten years old today, but she wasn't born until 5 o'clock in the afternoon."—Philadelphia Evening Telegraph.

CONGRESS STIRRED ON MEXICAN POLICY

Popularity of Administration's Action Greatly Strained.

SENTIMENT INCLINES TO INTERVENTION

Promises of Carranza Are Received With Distrust and Indifference—Senate Feeling Is Ugly.

Washington, D. C.—President Wilson is facing a revolt in congress in connection with his Mexican policy.

Following the meeting of the cabinet Saturday the fact was allowed to become public that President Wilson had decided not to send troops into Mexico, but would depend on General Carranza to punish the murderers of the Americans killed at Santa Ysabel, Chihuahua, and to aid that Mexican leader in every proper way to establish peace and order throughout the neighboring country.

This policy is by no means satisfactory to the great majority of the members of the senate and house. There is a rising sentiment for intervention, which the President is earnestly endeavoring to check. He is urging and pleading that he be permitted to continue to handle the situation in his own way, promising the results will be satisfactory to congress and the country.

He is dwelling on the assurances he has received from General Carranza that the assassins are being actively pursued and when captured will be received condign punishment and that strong patrols have been established along the railway to guard against outrages similar to that which occurred at Santa Ysabel.

Through members of his cabinet, Senator Stone, chairman of the senate foreign relations committee; Representative Flood, chairman of the house foreign affairs committee; and others, he is applying pressure to senators and representatives for the purpose of inducing them to refrain from putting through a resolution which would force him to put troops in Mexico.

Thus far the President's efforts have not met with any noteworthy success. Doubtless, in the end, he will be triumphant, but the feeling in both bodies, particularly the senate, is ugly. The debate in the senate Saturday, for example, developed the most insistent demand yet heard for immediate action. Nobody seemed to give any weight to the Carranza assurances that the brigands would be captured and punished. Nobody paid any attention to the official report that General Almeida and Rodriguez had been arrested and shot at Mazamora. It was apparently assumed that the men had participated in the Santa Ysabel assassination, and even if they had done so, it is doubtful if the temper of the senate would have been sensibly modified.

GERMANS TO TAKE REPRISALS ON BRITISH AS RETALIATORY MEASURE

Berlin, by wireless to Sayville.—The German government has transmitted to Great Britain, through the American embassy, a note which declared that, as a result of Great Britain's failure to fulfill Germany's demand for an explanation of the circumstances surrounding the sinking of a German submarine by the British patrol boat Baralong, Germany will adopt suitable measures of reprisal.

Germany first made demands several weeks ago through the United States embassy at Berlin and London on the British government for punishment of the captain and crew of the patrol boat Baralong as murderers for the alleged killing of the commander and 10 members of the crew of a German submarine after the submarine had been sunk by the Baralong, which surprised the underwater craft while it was making an attack on the British mule steamer Nicolson.

Northwest Funds Asked.

Washington, D. C.—The secretary of the treasury has asked for the following appropriations in the deficiency appropriation bill, soon to be reported to congress, in order to carry on work this winter on public buildings in the Northwest: Roseburg, \$59,000; Vancouver, Wash., \$45,000; Ellensburg, \$50,000; Aberdeen, \$45,000; Twin Falls, Idaho, \$15,000.

No deficiency appropriation is asked for Portland, as the regular appropriation will be available by the time the contract is awarded.

Striking Ruin Is Found.

Washington, D. C.—The most striking ruin yet unearthed by archaeologists in America has been found by Dr. Fewkes, of the Smithsonian Institution, who has made his report to the Interior department. The mound, the largest of any thus far found, was in Mesa Verde National Park in New Mexico, and apparently was built for religious rites and ceremonies. It has been named Sun Temple. There are 25 rooms, and the walls, which total more than 1000 feet in length, average four feet thick.

Pullman Inquiry Dropped.

San Francisco.—Investigation of rates, service and labor conditions of the Pullman company in California was dropped by the Railroad Commission of California, after intermittent hearings since April 25, 1914. The company, it was said, complied in part with the commission's views by increasing porters' wages. Objections to the company's methods, advanced by the commission at several hearings, were held to spring from tipping.

MONTENEGRO UNCONDITIONALLY SURRENDERS TO POWERFUL FOE

Berlin.—The king and the government of Montenegro on January 13 asked a cessation of hostilities and opening of peace negotiations. It was officially announced by Austro-Hungarian headquarters Tuesday.

The Austro-Hungarian government replied to Montenegro that peace negotiations were only possible if the Montenegrin army unconditionally laid down its arms, the headquarters statement, as received here from Vienna, says. The Montenegrin government, adds the statement has accepted the Austrian conditions.

"Montenegro asks for peace," said Count Tissa in the Hungarian parliament. The proceedings under the first paragraph of the terms of the day had just been completed when Count Tissa asked permission to interrupt the discussion. He said that the king and government of Montenegro had asked the inauguration of peace negotiations. The announcement caused a great commotion in Parliament.

Gale Sweeps Southern California, Blowing Down 400 Oil derricks

Bakersfield, Cal.—Sweeping with the violence of a tornado, a southwest gale blew for three hours in the Midway oil district, starting Tuesday afternoon, destroying property estimated at \$250,000. More than 400 derricks were blown down, and several engine-houses in the oil fields were wrecked. Several dwellings and bunkhouses were also toppled over. The damage was greatest in the North Midway and McKittrick districts, where more than 250 derricks were destroyed.

The San Francisco-Kittick bunkhouse was wrecked in an explosion when a crown block went crashing through the immense boiler. The Associated Oil company lost 64 out of 84 oil derricks.

At Los Angeles two men were reported drowned and more than 100 people were homeless as a result of the heavy rain storm which caused most every river and stream in Southern California to overflow its banks and inundate the lowland adjacent.

ALLIES LAND TROOPS NEAR CAPITAL OF GREECE TO FORCE COUNTRY'S HAND

Berlin.—Berlin newspapers, according to the Overseas News agency, express the belief that the landing of allied troops at Phaleron, five miles southeast of Athens, is considered as supplying proof that the entente powers intend using extreme means to force the hand of Greece.

The news agency says that according to prevalent reports, the Greek government has transferred part of the state archives to Larissa, in North-western Greece, where, eventually, the Greek government likewise will be transferred.

LIQUOR SEIZED IN PROHIBITION RAID ON FASHIONABLE SEATTLE RESORT

Seattle.—The Rainier club, the principal club in Seattle, was raided late Tuesday by deputy sheriffs who confiscated 400 quarts of whisky, champagne, gin and other intoxicants. The raid was made under direction of Sheriff Robert P. T. Hodge, who obtained a search warrant authorizing his deputies to enter every room in the large clubhouse at Fourth avenue and Marion street.

None of the liquor was found in the old barroom or in the club's storeroom in the basement. Most of it was found in a trunk hidden in a locked linen closet on the fourth floor. The house manager said that he had no key to the closet and the officers forced open the door.

Other seizures were made in members' rooms, where more than the statutory allowance of two quarts of spirits or 12 quarts of malt liquor was found. The property of members having less than these amounts was not disturbed.

U-BOAT COULD CARRY MILK

New York.—That it would be entirely feasible to have submarine merchantmen carry milk to the babies in the central empire was the opinion given by Lieutenant Commander Craft of the New York navy yard, to the city's committee for food shipments.

"If the submarine were constructed for the purpose," said Lieutenant Craft, "there is no scientific reason why it could not make a voyage across the Atlantic with a cargo. The idea of a submarine for blockade-running is new but practical."

Belgian Food Ship Sails

New York.—The steamer Celebes sailed Tuesday night for Rotterdam, carrying 165,000 sacks of wheat and a quantity of beans and clothing, contributed to the Commission for Relief in Belgium by the committee in Pittsburgh and Western Pennsylvania.

The Celebes carried a banner between her masts bearing the inscription, "Pittsburgh and Western Pennsylvania relief ship." The cargo is valued at \$250,000 exclusive of the clothing, and was contributed by 42,000 persons.

NEW PLAN OF TESTING PUPILS TO BE TRIED IN EIGHTH GRADE EXAMS.

In the May and June eighth-grade examinations a new plan will be tried in testing the pupils in the subjects of U. S. History and Civil Government, according to a statement issued by State Superintendent of Public Instruction J. A. Churchill. During the examination the pupils will be allowed to refer to their text-books, but the questions will be so framed as to test the ability of the pupil in expressing what he has learned in clear, concise language. The advantages of such a plan are, that it permits the teachers to emphasize the historical events which she considers most important; it gives the trained teacher greater freedom, so that she can do a much higher quality of work than simply helping the pupils to "crum" for an examination; it frees the teacher and the pupils from so teaching and studying as to make the examination the end; it tends to give the pupils power of expression and eliminates the cramming of unimportant dates and facts.

"There is always danger," said Superintendent Churchill, "of the examination system developing a question and answer method of teaching. Any plan whereby the examination becomes the end is unpedagogical, and the examination usually deteriorates into a memory test. With this new plan, if the teacher will adopt it for the pupils' monthly tests, they will learn by the close of the year how to use the text as merely a reference question will be so worded that it will depend upon the pupil to copy any statement from the text book, but he will find help by turning to it to refresh his memory on some point that has escaped him just for the moment. When writing an examination a pupil often finds that he cannot recall the answer to a question. He is then liable to become so nervous and frightened that he will fail in the entire examination. This is really the common-sense way to prepare a pupil for his work in the every day world, for if a man has to write an article or prepare a paper on any subject, he does not attempt to depend upon his memory for the proof which he wishes to use from various sources to substantiate his statements; rather, he has on his table a number of reference works dealing with the subject upon which he is writing.

The eighth-grade examinations, to a very large extent, set the standard of teaching, and I am very confident that this new plan will strengthen the work in the eighth grade and give the pupils much more power and confidence than he gains from the memory tests. If his class standing has been high during the year and his English class work has been below par, the open book will be of no help to him during the short hour of his examination."

FARMERS' AND HOME-MAKERS' SHORT COURSE IN SESSION

Corvallis.—Many pairs of Oregon are represented in the gathering of farmers and homemakers at the Agricultural college for the annual short course work which began last week.

Salmon also is reported scarce, with not enough being obtained to accommodate the trade. Steelheads and Alaska kings are the only varieties received. The steelheads are being caught in the Columbia and other Northwest rivers, in the Grays Harbor and Puget Sound districts. The kings come from Alaska.

Butter remains at the advanced price and is very firm, say jobbers, at 33¢ to 34¢ a pound. No change either way is expected for some time. Practically no Oregon butter is being received, but what little does come in is moving out at 32¢ a pound.

Ranch eggs are a bit easier, dealers setting prices down at 34¢ to 35¢ a dozen to encourage sales, they say.

ABERDEEN PLANS ACTIVITY

Aberdeen, Wash.—A campaign to procure new factories and to develop the agricultural and dairying interests in this county was launched here recently at an enthusiastic annual meeting of the Aberdeen Chamber of Commerce. Definite action in this campaign will be taken by a meeting of directors and later by a large commercial gathering. New officers and a new executive committee for the Chamber of Commerce will be elected by a committee of ten, named at the annual meeting.

Butter Prices Up Four Cents.

Portland.—A 4-cent advance in butter is announced, which puts the local market on a 32-cent basis for the best city cubes. The main reason for the rise was a sharp advance at Seattle on both butter and butterfat. The San Francisco market was also strong. The cold snap has curtailed production, and there has been no excess of the best city creamery butter on the market for some time.

The egg market is holding about steady. Receipts are of fair size, considering the cold weather.

Ten Per Cent More Apples Than 1915.

Washington, D. C.—The country's store of apples on January 1 was about 10 per cent larger than it was a year ago. A statement issued by the department of agriculture said this was true despite the fact that the supply decreased 12 per cent during December. The figures show that 3,881,000 barrels and 5,049,000 boxes of apples comprised the country's apple supply the first of the year.

Ice Harvest Is Begun.

North Powder, Or.—The Pacific Fruit Express company began harvesting its annual ice crop this week, which will give employment to 150 to 200 men and several teams at this point. A. Lund also has a crew of men cutting and shipping from his ice pond here to La Granda, Or., and other points.

FISH MARKET SHORT.

Tacoma.—Fresh halibut is reported scarce on the local market. Dealers, however, expect regular shipments to begin and keep up after a week or so. Receipts are far below the demand and the fish is going at 9¢ to 11¢ a pound. What is being received is of excellent quality. The shortage is attributed directly to the fact that fishermen laid off work during the holidays and after that the weather was too stormy to permit them to make any reasonable catches.

Salmon also is reported scarce, with not enough being obtained to accommodate the trade. Steelheads and Alaska kings are the only varieties received. The steelheads are being caught in the Columbia and other Northwest rivers, in the Grays Harbor and Puget Sound districts. The kings come from Alaska.

Butter remains at the advanced price and is very firm, say jobbers, at 33¢ to 34¢ a pound. No change either way is expected for some time. Practically no Oregon butter is being received, but what little does come in is moving out at 32¢ a pound.

Ranch eggs are a bit easier, dealers setting prices down at 34¢ to 35¢ a dozen to encourage sales, they say.

The local produce market shows no change. The boards are well supplied and dealers are doing a good business.

TURNING MEANNESS INTO JOY.

One does not often envy millionaires—the galling of their golden chains is too evident in their faces—but one recent exception stands out. Three days before Christmas the Pittsburgh bank for savings was closed by the state officials, and among its depositors who had about four dollars apiece to their credit. The bank had had an arrangement with the board of education by which collectors visited the schools every week and got the children's pennies. When the bank closed all the children had for their pains was the chance of a 50 per cent dividend some two months later. But Henry G. Fryck came forward that same day and said briefly that the kids were to have all their money at once. So the storm passed by for those young depositors and their faith in men was justified. Mr. Fryck has a steady and expensive home on Fifth Avenue filled with works of art from many lands, but we doubt if there is anything in it more cheering to the soul than the memory of that abrupt kindness. Sometimes it pays to be a millionaire!—Colliers.

WHERE THE STRONG ARE WEAKEST.

In view of the deadly invasions of gripple and pneumonia and the warnings in this connection issued by the public health authorities, a word addressed especially to the strong and well may not be amiss. Though seemingly remarkable, it is a perfectly logical fact that both gripple and pneumonia find their greatest number of victims among persons who are in normal health. The latter disease, in fact, seems rather partial to exceptionally robust persons, and, in every-day parlance, the stouter they are the easier they fall. The reason for this is simple. Frail persons are accustomed to take extra care of themselves in the knowledge of their weakness and liability to sickness, and thus escape some of the ills that overtake the stronger ones. The robust ones, especially the man who "never had a sick day in his life," come to regard their health as being immune from attack and so expose themselves recklessly. Also they are inclined to indifference after having contracted a cold or even more serious affection, relying on their usually rugged health to pull them through.—Pittsburgh Gazette Times.

CONJUGIAL REPATRIATION.

Robert Love, the great English commoner, was exceedingly sarcastic and frequently ungallant. Upon the occasion of a well known wedding he began to lament on the absurdity of the marriage service.

"When I was married," he said, "I endowed the worldly goods which I endowed my wife might have been carried in a bundle over my shoulder."

"Ah! but Robert," interposed Mrs. Love, "there was your great intellect."

"Well, I certainly did not endow you with that dear," was the rejoinder.—San Francisco Argonaut.
