

SAVING FOR THE NATION

With our country at war, economy of necessities becomes the duty of every patriotic citizen. If every family in the United States cooked on a MONARCH range, thousands of tons of fuel daily would be saved for other useful purposes.

That the MONARCH Range needs less fuel to do its work is not an empty boast but an actual fact that we can demonstrate so that anyone can see it as plainly as we do. The reason lies in the manner of its construction—its seams and joints are made tight without stove putty by riveting the steel plates to the Malleable Iron castings. That means permanent not temporary tightness.

And the most delightful part of it is that in this case true economy goes hand-in-hand with all the things you want in a Kitchen Range—perfect baking, continuous satisfactory service, handsome appearance and time-saving convenience.

Ask about trading in your old stove on a MONARCH.

Mr. and Mrs. Harvey Day, who lately returned from North Carolina, have settled upon a twelve-acre prune orchard on the Walla Walla river which they bought of Claud Harris for \$8000. The gridiron clash between O. A. C. and the University of Idaho at Pendleton tomorrow afternoon will mark the initial bow of both teams in the famous Round Up city. Every member of both teams is expected to be on his toes and rarin' to go. No stalemate is expected by the coaches. The battle will be one of motion—but in what direction is the riddle to be unsprung in the game. The coaches are pushing the men to the limit, and the battle will be hard and fast from first kickoff to final whistle.
