

## QUICK-LITE Air-O-Lantern

Lights with Common Matches—  
No Alcohol Torch Needed!!

This lantern is right at home in summer rain or wild winter storm. It burns perfectly in any wind, at any temperature, and will keep right on shining where an oil lantern is useless.

The man who once uses the Quick-Lite lantern on the farm, around the dairy, in feed lots and other places where a convenient outside light is needed, will not think of giving it up. It is a great light for tent shows, camp meetings, picnic grounds, summer camps, boat landings, night fishing, automobile trips, etc.

The Air-O-Lantern has a double burner, using two small and very durable rag mantles. If one should jar off you still get a good light from the other. Lanterns using one mantle do not have this advantage.

He had to shovel his team out of the snow a time or two, and on three occasions found it necessary to cut through wire fences and go across the fields. Saturday his patrons assembled together and broke out the roads.

**THE MCCORMICK HARVESTER COMBINE IS NOW A GUARANTEED SUCCESS - - WE EXPECT TO HAVE A SAMPLE SOON**

It is run by two men. Cuts 9 feet wide, 15 to acres per day, using 8 horses. Does clean work in all grain and pays for itself in two ordinary crops.

Can you beat it? Can you equal it with a big combine?

Wouldn't two of these beat a big machine? If one meets with accident only two men are idle, and the other machine is still doing business.

On grain tanks for both wagon and field storage we are ready to give you figures that do the business. Come and see.

He said that the liquor interests are never inactive, and would make the strongest of fights to defeat the amendment. He said that if national prohibition is won the next campaign of the dry forces will be for world-wide prohibition.
