The average housewife does not realize the seriousness of the merchandise situation today, and thinks she can still buy all the goods she needs, especially in the house furnishings line.

The situation is more serious today than it has been any time since the war started. Commercial travelers from the east tell us there are acres upon acres of railroad tracks covered with freight cars of merchandise that cannot be moved, and mills and factories find it impossible to get materials in or ship goods out. The result is that with all the volume of business, there is a larger percentage of idle machinery in the country than has existed for several years.

We offer this advice to our customers—KEEP POSTED ON THE ADVANCE OF PRICES—WATCH OUR ADVERTISEMENTS CLOSELY—TAKE ADVANTAGE OF EVERY REDUCTION IN PRICE and of SPECIAL SALES. It is our firm conviction that a further shortage of merchandise is a certainty.
