Mr. and Mrs. Lewis H. Geiss and their two children were taken to the Pendleton hospital Monday from their farm. All are suffering from the "flu," Mr. Geiss being in the most serious condition.

The mountain harvest this year was not really finished until last Monday, when a small patch of grain was threshed at the Ernest March place. This is said to be the latest threshing ever done in the mountain country.

Several cases of Spanish influenza have appeared at Athena, which hitherto has been free from the epidemic. Among the households afflicted are those of Arnold Wood, John Stanton and Edgar Forrest. School had been reopened at Athena, only to be closed again.

The Weston schools, closed for some time because of the "flu," will be opened again next Monday. Telegrams have been sent to all teachers who were absent during the enforced vacation, asking them to return. All local influenza patients are getting better, and no new cases are reported.

The potato crop planted last spring with such joyous confidence by Bob Hodgson and Leon Lundell was harvested this week. These young men put in ten acres of mountain ground, and if hungry cows hadn't broken into their patch and feasted on the spuds their returns would have been gratifying. As it is, the crop exceeded expectations, not more than a third of it having been destroyed, when it looked like a total loss.

After finishing his seeding, Sim J. Culley has put his "cat" and teams to work in plowing summer fallow. He is plowing to a depth of nine inches or more in order to get under and break up the sole-leather crust formed by constant summer fallowing at an almost uniform depth. The process is quite difficult, and only eight or nine bottoms can be hauled by the "cat," when ordinarily twelve are used. The plan is experimental in a measure, and only a limited acreage will be so treated.

While the new Food Administration ruling which permits of the purchase of white flour without substitutes applies to bakers and all public eating places as well as to the homes, the administration advises that the bread allowance is not to be increased. In other words, a person is supposed to be just as saving with food now as when obliged to use substitutes. A letter received from the state administration indicates that on December 1st the individual allowance of sugar per month is to be increased to four pounds.

The Leader shares in the general opinion hereabouts that John English is a good old scout and a regular fellow. In recent letters from Jungo, Nevada, where he is engaged in government surveying, John sent \$20 for the Weston United War Work fund and \$2.00 for the Leader. John is as cautious as ever, however. He says: "Do you fumigate the sheet each week before sending it out? I am too far away from civilization to catch the 'flu' unless it is sent as a present."

G. H. Fontaine arrived in Weston yesterday from Great Falls, Montana, and reports the flu patients there in whom local people are interested to be out of danger. Mrs. Fontaine suffered a relapse, but is getting better again. Mr. and Mrs. Craig Driskell will leave Great Falls today or tomorrow for Weston.

This morning's casualty list contains the name of Peter Bue of Pendleton as killed in action.
