

## The Strongest Plow of its Type

If your soil conditions are such that unusual plow strength is required, our John Deere Steel Gang Plow will suit you exactly.

This plow is made entirely of high grade steel—no breakable castings nor bendable pipes. The beams are guaranteed not to bend or break. Between the beams are front, rear and intermediate braces—the plows always stay in line.

No matter how many horses are used nor what the soil conditions may be, these plows stand up under the strain and do good work.

All three levers are handy for the operator, whether walking or riding. Raising or lowering the bottoms is easy—powerful springs have almost the effect of a power lift. Location of the land wheel makes it easy to turn square corners without raising the plows out of the ground. Extra clearance prevents clogging in trashy ground. As the result of a special lifting device, even width of cut can always be maintained.

We can furnish these plows equipped with either John Deere steel bottoms or Syracuse Chilled bottoms. These bottoms are equipped with John Deere Quick-Detachable Shares—easy to put on or take off, and they always fit closely.

Come in and ask us to show you our John Deere Steel Gang Plows.

## The Grain Drill with Double-Run Feeds

Here is the drill that plants the seed just right, regardless of whether or not the grain is treated or untreated, and regardless of how small a quantity you want to plant. The drill with double-run feeds that we can furnish has new features that compel accuracy and provide a wide range of adjustability. It puts every kernel of grain to work down in seed trenches of uniform width and depth. Kernels of every size and kind are delivered without being bruised or cracked.

The feature that we especially want you to come in and see is the adjustable gates that make it

possible to plant 48 different quantities of grain—wheat from 16 to 258 pounds per acre, and other grains in proportion. No wire reducers or other contraptions are required to reduce the quantity handled.

When you consider buying a drill, don't overlook the facts that our drill will operate on steep hillsides without side-end-play; the grain will not shift to one side, leaving part of the grain box empty; the grain box will not sag, even after years of use, and any broken or worn part can be replaced easily. All these good things are the results of the gear arrangement, the three-piece floating axle that is used for driving purposes only, and the bridge construction of grain box and frame with direct support on the long, strong wheel hubs.

The next time you are in town just take a look at the Van Brunt Drill with Double-Run Feeds.

Ask us about it and take home one of our booklets describing it.

Walla Walla, Wash.

## BREVITIES

All bills of the Weston garage are due the first of each month. J. F. Snider.

The Athena-Weston Post announce a dance for tomorrow night at Weston.

Mr. and Mrs. Willard Forth are receiving congratulations upon the arrival of a son at their home on Weston mountain.

Mr. and Mrs. Andrew Larson and Miss Glenadine Larson were visiting at the DeGraw residence from Walla Walla Sunday.

Mr. and Mrs. Wm. N. Snider of Tacoma are visiting relatives in this city. Mrs. Snider is a daughter of Mrs. M. W. Van Winkle.

Ward Baker has gone to Enterprise, Oregon, accompanying Roy Read. Friends here hope that Fortune will have a kindly smile for both of these popular ex-service men.

Miss Larson has completed her school year on Weston mountain and leaves soon for the east, where she will do special work this summer along educational lines. Miss Larson has been engaged to teach the sixth grade in Umatilla this year.

Mrs. C. C. Chase and two little sons motored down from Wallula and attended the Baptist association meeting Sunday in this city. Mr. Chase and family are preparing to move to Freewater to reside. Mr. and Mrs. Chase will conduct an ice cream and catering business there.

Four of the Ferguson boys, young mountain farmers, have homesteaded 2400 acres of land on the breaks of the Umatilla river near Bingham Springs. As the boys have already taken in 160 head of horses to pasture at \$2.50 per month each, it begins to look as though old H. C. of L. will soon have no terrors for them.

Billy and Lewis Van Winkle are evidently hoping to cut a swath in the strawberry market. They had two acres on the upper reaches of Pine creek, and have just finished planting two more. Billy Van and Guy Killgore demonstrated unusual speed in this bit of horticultural enterprise. They took up and set out 1500 plants in one day.

J. A. Lumden has received a new boiler from Walla Walla for installation at his feed mill, the boiler at present in use having proven inadequate. “Lum” developed a new wrinkle for unloading barley at the sidetrack below town. He rigged up a spout of corrugated iron, and it neatly shoots the barley from the car into a wagon on the road below. He shipped a car of his own barley from Bates to Weston, and still has about 90 tons of the valuable cereal in the elevator there.

Fred and Jasper Sams are back from an eventful bear hunt in the Blues. They encountered eight feet of snow in the timber near the toll gate while on their way to the Looking Glass. For a time they traveled nicely on the crust, but warm sunshine melted the snow to such an extent that finally their tired horses could neither get forward nor back. They had to turn the animals loose and take the back trail on foot. While slowly toiling along the Umatilla river breaks they were lucky enough to run across three bear and to bag one of them—a big black, weighing 400 pounds. Their success, however, involved a long walk to the Floyd Fox place after a team with which to haul the carcass out.

Mrs. Mark Henderson entertained last Wednesday evening at her attractive home on Weston mountain, the young people of the upland districts in honor of the fourteenth birthday anniversaries of two popular maids—the Misses Dorothy Tweedy and Dorothy Bowers. A wienie roast in the yard was a pleasing feature which created a great deal of merriment. Other refreshments dear to the heart of youth were generously served, after which games and music caused the time to pass rapidly. Those in attendance were unanimous in declaring the affair a most delightful one.

Mr. and Mrs. Joe Lawson, Tom Lawson and John Warner were in Weston Tuesday from Freewater. Joe Lawson resided in Weston in early years, as did also John Warner, and both of them like the town yet. The former owns considerable Freewater property that has advanced rapidly in value in recent months.

Mrs. Eva Hartman and Mrs. Lillian McMorris are leaving Pendleton the latter part of this week on their return home to Portland. They have been the guests there of their sister, Mrs. Abbie Mays. Mrs. Hartman has recovered from injuries resulting from a fall, which for a time kept her in St. Anthony's hospital.

Wheat fields throughout this section are greening rapidly under the influence of bright sunshine following the frequent rains. While late in getting started, the wheat is making up for lost time, and the prospect at present is considered favorable enough to suit the most pessimistic.

F. J. Van Winkle, former Weston teacher, was here this week from Portland on his way to Salt Lake City. Mr. Van Winkle may attend the pioneers' reunion on his return. He was the first secretary of the association and an ardent promoter of the first reunion.

Ray Gordon went to Walla Walla Wednesday after a new motorcycle, which he will put in commission on mail route No. 2 during the nice weather. Mrs. Gordon relieved him as carrier for the day.

Lester Hodgson is reported this week to be improving.

Charles M. Schneider was here this week from his newly-acquired farm near Mica, Wash.

Mrs. Ross Maloney is a hospital patient at Walla Walla, where she sustained a surgical operation Monday, performed by Dr. Thomas.

Apply engineering efficiency to state control of public utilities. Vote for Rhea Luper, republican nomination for public service commissioner. Adv.

Miss Thelma Anderson has returned to her home in this city, having completed a most interesting and successful year as teacher in the Homestead, Oregon, school.

Mr. and Mrs. Ralph G. Saling have leased the apartments in “The Locusts” formerly occupied by Mrs. Margaret Rabb, and are now comfortably established therein.

Mrs. Frederick Heath of Athena was a guest Sunday at the A. T. Metz home and assisted in celebrating the seventy-third birthday anniversary of the head of the house.

Albert O'Harra's right hand is out of commission, and is causing him considerable bother. He raked the member across a projecting copper rivet on a piece of harness, lacerating three fingers.

J. C. Davis is getting by with his work at the Culley farm as well as he can with a badly damaged foot. A horse stepped upon the member a few weeks ago, and symptoms of blood poisoning have lately developed.
